</table>
ICRIER has continued to provide policy support through research and knowledge sharing in the demanding economic environment of 2012-13. Research at ICRIER has addressed the challenges of improving the competitiveness of the Indian economy through domestic policy reform, stabilising the macroeconomic environment, and providing research support for building an external economic environment which is conducive to India’s economic agenda. The challenges of urbanisation, climate change, skill development, and institutional reform have been added as new areas of research at ICRIER.

A study commissioned by the Department of Commerce, Ministry of Commerce & Industry, Government of India this year on Special Economic Zones (SEZ) and led by Professor Arpita Mukherjee, is at the heart of domestic reform and competitiveness. Some of the other ongoing studies that reinforce our attention to domestic policy reform and competitiveness, focus on measuring competitiveness of Indian agriculture, estimating the compliance cost of direct taxes in India and assessing the implications of rationalising fossil-fuel subsidies in India.

Last year, ICRIER launched a major programme on urbanisation under my personal guidance in an honorary capacity. Funded by the Ministry of Urban Development, Government of India, this programme focuses on research in a number of critical themes of urbanisation in India by in-house researchers as well as external experts with a view to placing the debate on urbanisation within the overall economic policy discourse on the Indian economy. A parallel programme of capacity building on urbanisation has received strong support from state governments.

A very important area of growing importance in the years to come is the impact of climate change on competitiveness of cities. Research in this field at ICRIER is being funded by the Rockefeller Foundation. The programme is led by Professor Meenu Tewari, HUDCO Chair at ICRIER. In its second year, the HUDCO Chair has focused research on the quality of public service delivery in cities. This research has strong synergies with research on urbanisation at ICRIER.

ICRIER’s long standing emphasis on South Asian economic integration has provided key policy inputs to governments in the South Asia region – particularly in the bilateral trade dialogue between India and Pakistan. The ongoing study “Strengthening Research and Promoting Multi-level Dialogue for Trade Normalisation between India and Pakistan” under the leadership of Professor Nisha Taneja has generated several high-level exchanges between the two countries and kept the dialogue open despite a challenging overall environment. Bilateral economic relations are also being strengthened through research and seminars on Korea and Japan. ICRIER hosted a two-day international conference at New Delhi on the theme “The Changing Paradigm of India-Japan Relations”, which was inaugurated by Mr. Salman Khurshid, Minister for External Affairs, Government of India.

Research under the G20 programme has continued to constitute a major part of ICRIER’s international economic research agenda during the year. The G20 programme funded by the Department of Economic Affairs, Ministry of Finance, Government of India and led by Dr. Rajat Kathuria completed its second phase, studying and analysing issues that were the subject of discussion in the G20 inter-governmental deliberations.
ICRIER also organised the fifth annual international conference on the major policy concerns of G20 countries. Dr. Rajat Kathuria represented ICRIER in the Think-20 meetings in Moscow held on the sidelines of the G20 Leaders Summit in December 2012. Looking ahead, ICRIER is engaging with the Lowy Institute in Sydney on research cooperation in the G20 agenda as Australia assumes the Presidency of the G20 next year.

The coming two years are crucial for ICRIER as we set out to construct and occupy new premises in Saket, New Delhi. The change will be accompanied by expansion in the number of researchers and administrative support staff and also an increase in research activity. The fifth Dr. K. B. Lall Memorial Lecture, a flagship event of ICRIER, will be delivered by Nobel Laureate Professor A. Michael Spence on November 21, 2013. ICRIER will also host the annual Neemrana conference jointly with the National Bureau of Economic Research (NBER) in December 2013. No doubt our plate is full, but I am convinced that with the support of our well-wishers, we at ICRIER will achieve our ambitious targets in the coming years.

Isher Judge Ahluwalia
Chairperson, ICRIER
Board of Governors

Chairperson

Dr. Isher Judge Ahluwalia
32, Aurangzeb Road, New Delhi - 110 011

Dr. Raghuram G. Rajan
Chief Economic Adviser
Ministry of Finance
Government of India, Room No. 39A, North Block
New Delhi 110 001

Elected Members

Mr. Tarun Das
Founding Trustee,
Aspen Institute, India
102-B, Beverly Park-I, Mehrauli - Gurgaon Road,
Gurgaon - 122 009

34. Mr. Surendra Singh  
35. Mr. Premath Sinha  
36. Professor T. N. Srinivasan  
37. Mr. C. M. Vasudeva
This year, macroeconomic difficulties which were reflected in a large fiscal deficit, inflation and widening current account imbalances, stood alongside several disquieting microeconomic challenges relating to sluggish manufacturing, labour market rigidities, skill gaps, and an overhang of institutional fragility.

The Indian media polarised the Bhagwati-Sen debate as a choice between redistribution and growth, whereas in fact it is a matter, albeit tricky, of creating the right conditions for inclusive growth. The 5 percent increase in real GDP realised in 2012-13 must therefore be raised, and a number of forecasts for the next year from reputable institutions do offer a basis for cautious optimism. On the other hand, the gloomy predictions of a retreat to the “Hindu rate of growth” are decidedly overblown. They do, however, point to the critical need for domestic reform.

In keeping with its core mandate to increase the knowledge content of policy making, ICRIER undertook a range of studies through the year to support policymakers in their quest to unlock the tremendous untapped potential of the Indian economy.

The scope of ICRIER’s new and ongoing research included both the domestic economy and its interface with the global economy. The many new studies commissioned during the year are all united by the common aim to help create a solid basis for policy action to put the economy firmly back on the track of higher growth. ICRIER’s important studies included, “Revisiting Special Economic Zones (SEZ): A Review and Evaluation of India’s SEZ Policy”, “Preparing for the Urban Challenges of the 21st Century”, “Climate Change and the Economic Competitiveness of Cities: Making the Business Case for Adaptation”, “Estimating Domestic and Foreign Value added in Indian Export”, and “Stabilising Food Prices through Buffer Stocking and Trade Policies.” The precise research questions and expected policy outcomes of each of these studies are provided in the Annual Report.

Among the ongoing studies, the one on trade normalisation between India and Pakistan, ably led by ICRIER’s Professor Nisha Taneja, has drawn special attention. Several papers are being written in collaboration with the Institute of Business Administration (IBA), Karachi and the Sustainable Development Policy Institute (SDPI), Islamabad. Besides, two quarterly newsletters were published during the year. The inaugural lecture in the Distinguished Lecture series under the project “Strengthening Research and Promoting Multi-level Dialogue for Trade Normalisation between India and Pakistan,” was delivered by Dr. Ishrat Husain, Dean and Director, IBA, Karachi and former Governor, State Bank of Pakistan.

Another ongoing programme, the DEA-ICRIER collaboration on G20 Issues, for 2012-13 aimed at supporting policy formulation, capacity building, improving knowledge, and contributing to India’s negotiating positions at the G20 forum. A team of ten junior researchers, some of them based at the G20 Secretariat, and two external consultants were involved in preparing a monthly global economy bulletin, briefs, quick response notes, position pieces as well as bi-monthly updates in identified thematic areas. The fourth Annual G20 Conference organised in October 2012 by ICRIER and its partners, ADBI, World Bank, KAS and IMF, was held within the DEA-ICRIER programme. The conference papers have been brought together in a book being published by Springer-Verlag and scheduled for release in December 2013.

The urbanisation theme in ICRIER has gained solid traction. A number of capacity building and knowledge dissemination workshops were organised under the ongoing “Programme on Capacity Building and Knowledge Dissemination on Urbanisation” funded by the Ministry of Urban Development, Government of India. The workshops were conducted in Bhopal, Hyderabad, Delhi, Chandigarh, Guwahati and Pune. The importance of these workshops was significantly enhanced by the presence of the Chief Ministers of Andhra Pradesh,
Haryana, Assam, Maharashtra and Madhya Pradesh as chief guests at the inaugural sessions of the workshops held in their states. This year a closely related research programme devoted to the “Urban Challenges of the 21st Century” was also added to the growing list of research studies at ICRIER. Both these programmes mutually reinforce each other with significant synergy and are being skillfully led by Dr. Isher Judge Ahluwalia, the ICRIER Chairperson.

The Reserve Bank of India Chair, held this year by Professor Chetan Ghate, developed a theoretical framework to understand business cycles in India and other emerging markets. A simple model, built up jointly with Mr. Pawan Gopalakrishnan and Ms. Suchismita Tarafdar, attempted to understand the key stylised facts governing Indian business cycles during the period 1999-2010. A preliminary report that has been completed will be brought out as a working paper and presented at the Singapore Economic Review Conference in 2013.

The India KLEMS Project is part of the World KLEMS initiative, which uses the KLEMS framework for measuring productivity and is currently being undertaken by many developing economies of Asia and Latin America. This project, also funded by the Reserve Bank of India, attempts to generate an industry level productivity database consistent with official national accounts and input-output transactions tables in an internationally comparable framework for the period 1980-81 to 2008-09. The project has completed its second phase.

The Japan Project at ICRIER, established in 2007 with the support of the Sasakawa Peace Foundation (SPF), Tokyo, completed Phase II under the leadership of Ms. Sanjana Joshi. Mr. Naoki Oka, Senior Adviser, National Tax Administration, Japan was a visiting fellow at ICRIER during March 18-29, 2013. His research theme was “Cross-border flows of investment and dispute resolution and prevention in tax matters: Comparative study of India and Japan and lessons for the future.” To commemorate the 60th year of the establishment of diplomatic relations between India and Japan, the project organised a two-day international conference in New Delhi on the theme “The Changing Paradigm of India-Japan Relations.” The conference was inaugurated by Mr. Salman Khurshid, Minister for External Affairs, Government of India.

In the area of strategic economic relations, Ambassador Hemant Krishan Singh as the Wadhwani Foundation funded Chair issued regular policy briefs, brought out a series titled “India-US Insight”, and undertook research in key areas that seek to unlock the potential of India-US trade and investment ties. The ICRIER-Wadhwani Chair’s Policy Report “BIT and Beyond: Advancing India-US Economic Relations,” by Ambassador Hemant Krishan Singh and Ms. Tincy Sara Solomon was launched by Mr. Salman Khurshid, Minister of External Affairs, Government of India in the presence of Ms. Nancy Powell, US Ambassador to India.

The India-US trade dialogue, a component of our US-India Private Sector Advisory Group (PSAG) was at a standstill during the past year, although we at ICRIER have been trying to provide some momentum to restart the dialogue. ICRIER is the secretariat for the PSAG with Dr. Isher Judge Ahluwalia as the co-Chair. Two meetings of PSAG India were held in 2012. At the September 2012 meeting, papers on agriculture and education prepared in ICRIER were considered. Subsequently, in January 2013, a meeting was held to discuss the long-term strategy for intensifying India-US economic relations.

ICRIER’s HUDCO Chair Programme is a three-year project aimed at conducting research and undertaking capacity building activities on urban issues in India. The programme has three main components: (i) a seminar series on urbanisation and the competitiveness of cities; (ii) research on a subset of urban issues; and (iii) thematic capacity building workshops on select themes based on the research that is conducted under the programme. Prof. Meenu Tewari is the HUDCO Chair Professor at ICRIER.

Going forward, several new and exciting projects have been commissioned in 2012-13. The one that I would like to specially highlight is the project on Special Economic Zones (SEZ), led by Professor Arpita Mukherjee. This project is funded by the Ministry of Commerce & Industry, Government of India and will undertake a comprehensive
The policy has attracted a great deal of debate with its supporters arguing that it would attract more FDI, lead to higher exports, generate economic activity and employment. On the other hand, its critics have highlighted challenging issues such as agricultural land acquisition, duty foregone, low FDI and a growing trade deficit. The study aims at a comprehensive cost-benefit analysis of the competing claims and the results will provide substantive inputs for making informed policy choices in this area.

We have undertaken a lot more. An interesting project on “Cover Bond as a Complementary Source of Financing Mortgage Lending in India: Lessons from the Global Covered Bond Systems” has been commissioned this year. This study is perhaps the first of its kind in India and is led by Ms. Mira Tamboli with assistance from Ms. Neha Malik. Two projects on agriculture, namely, “Stabilising Food Prices through Buffer Stocking and Trade Policies” and “Measuring the Competitiveness of Indian Agriculture” led by Professor Anwarul Hoda and Dr. Pooja Sharma respectively seek to develop constructive policy inputs in this area. Ms. Amrita Goldar is spearheading a study on “Assessment and Implications of Rationalising Fossil-Fuel Subsidies in India” while Dr. Saon Ray is examining the “Impact of American Investment in India.” Another interesting study is attempting to estimate the “Compliance Cost of Direct Taxes in India” under my overall leadership, with significant contributions from two external consultants and from Ms. Neetika Kaushal and Ms. Mansi Kedia.

During the year several noteworthy events, including public lectures by distinguished international scholars and events with participation from cabinet ministers and high-level policymakers were successfully organised. Dr. Surjit Bhalla’s book “Devaluing to Prosperity: Misaligned Currencies and Their Growth” was released by Mr. P. Chidambaram, Hon. Finance Minister, Government of India. A number of seminars were held during the year on a range of issues, ably articulated by Dr. Rahul Khullar, Dr. Ejaz Ghani, Dr. Gurbachan Singh, Dr. David Kim, Dr. Marcos Prado Troyjo, Dr. Ganesh Wignaraja, Dr. Alok Bhargava, Dr. Munawer Sultan Khwaja and Dr. Christof Rühl.

I am delighted to announce that the 5th K. B. Lall Memorial Lecture, instituted to honour our founder Chairman, will be delivered by Nobel Laureate Professor Michael Spence on November 21, 2013 and the 15th Annual ICRIER-NBER-NCAER Conference will be held, as in the past at the Neemrana Fort Palace, during December 13-15, 2013. Scholars from India and the US will get together for a free flowing discussion on contemporary research themes. On the drawing board is a partnership with the Global Commission on Climate Economy for a report that seeks to review the state of policy around climate change from both macro and sectoral (agriculture and urbanisation) perspectives. This is an exciting new area of research for ICRIER which we hope to develop as a thrust area. Apart from this, based on the recommendation of the external evaluation committee established by our Board in 2011, from next year we will begin publishing a biennial flagship report on a specific theme of research interest to ICRIER. Many more exciting initiatives are being taken to strengthen the thematic research areas at ICRIER. We acknowledge our gratitude to our Board member, Dr. Raghuram G. Rajan for endowing a sum of Rs. 25 lakh in ICRIER to support the visit of two Indian scholars to attend the NBER Summer Institute every year. This year’s recipients, based on a rigorous selection process, were Dr. Rajeswari Sengupta and Dr. Jagannath Mallick.

It has been a little over nine months since I assumed the position of Director & Chief Executive of ICRIER. I take this opportunity to specially thank Dr. Isher Judge Ahluwalia, our Chairperson, for her unconditional support, my predecessor, Dr. Parthasarathi Shome, and all colleagues in ICRIER for the healthy state of research and finances at ICRIER which I inherited.

I hope you enjoy reading the snapshots of ICRIER’s activities in this Annual Report.

Rajat Kathuria
Director & Chief Executive, ICRIER

1. Macroeconomic Management in an Open Economy

Ongoing Projects (2)

**Reserve Bank of India Chair**

*Project Leader: Dr. Chetan Ghate*

*Commencement: June 1996*

*Expected date of completion: Ongoing*

*Funded by: Reserve Bank of India (Rs. 400.00 lakh)*

Emerging market business cycles form a new and exciting area in business cycle research. While a few theoretical frameworks have been developed to understand emerging market business cycles, these models are in their infancy. A simple model was developed (jointly with Pawan Gopalakrishan and Suchismita Tarafdar) that attempted to understand the key stylised facts governing the Indian business cycle during the period 1999-2010. In this framework, fiscal policy is embedded in a standard emerging market business cycle model with interest rate shocks. The aim of the study is to provide: (i) normative optimal taxation results; and (ii) a dynamic general equilibrium framework that replicates the key features of Indian data.

A preliminary report has been completed that will be brought out as a working paper. The paper will be presented at the 2013 Singapore Economic Review Conference.

**Fiscal Prudence: A Comparative Analysis of Germany and India**

*Senior Adviser: Dr. Shankar Acharya*

*Research Team: Alamuru Soumya, M. Shuheb Khan and Kirti Gupta*

*Commencement: February 2013*

*Expected date of completion: November 2013*

*Funded by: Konrad-Adenauer-Stiftung, India (Rs. 20.00 lakh)*

The global financial crisis (2008-10) dealt a severe blow to the world economy, which is yet to witness a sustained recovery. Fiscal prudence has become the key challenge for both advanced and emerging economies in this context. There is, however, no consensus on the nature of fiscal policies that need to be implemented as the debate between austerity and stimulus continues. The crisis led to some important lessons. The concept of fiscal space and tools has gained prominence for ensuring a quick response to the folding up of demand and providing short- and medium-term stabilisation. Hence, there is a need for policies that deal with both short- and long-term problems.

Against this backdrop, the study focuses on the comparison of fiscal strategies of Germany and India, efficacy of the policies used in both economies to weather the crisis, lessons learnt and the institutional underpinnings of fiscal prudence in the two countries. The study also examines the flexibility of fiscal rules, given the high levels of public debt and deficit. It further intends to compare the evolution of fiscal policy in India and Germany from 1980-2012, the impact of the financial crisis on both countries including the transmission channels and seeks to highlight lessons that Germany and India can learn from each other. The study also aims to review the literature on fiscal sustainability and construct a conceptual framework to examine the sustainability of fiscal policy in both countries.
Completed Project (1)

DEA-ICRIER Research Programme on G20 Issues

Project Leader/Coordinator: Dr. Rajat Kathuria and Dr. Pooja Sharma
Research Team: Dr. Renu Kohli and Dr. Susan Thomas (External Consultants), Dr. Francis X Rathinam, Dr. Ranjan Kumar Dash, Alamuru Soumya, Shuheb Khan, Manjeeta Singh, Kuntala Bandyopadhyay, Kirti Gupta, Kavleen Chatwal, Jaskiran Ahluwalia, Aastha Dara and Tincy Sara Solomon
Commencement: July 2012
Date of completion: June 2013
Funded by: Department of Economic Affairs, Ministry of Finance, Government of India (Rs. 155.3 lakh)

The DEA-ICRIER Programme on G20 Issues for 2012-13 aimed at supporting policy formulation, capacity building, improving knowledge, and contributing to India’s negotiating positions at the G20 forum. The programme covered four broad thematic areas comprising: (i) the global economy and the framework for strong, sustainable and balanced growth; (ii) international financial architecture; (iii) financial regulatory reforms; and (iv) energy, commodities and climate change.

A team of ten junior researchers at ICRIER (based at ICRIER and the G20 Secretariat) and two external consultants were involved in preparing a monthly global economy bulletin, briefs, quick response notes, position pieces as well as bi-monthly updates in the identified thematic areas. Other responsibilities included preparation of strategy and research papers, and organisation of brainstorming sessions. The Annual G20 Conference organised in October 2012 by ICRIER and its partners was partly sponsored by the programme. The conference proceedings are available on the ICRIER website and an edited book on the conference will be published by Springer-Verlag in late 2013.

2. Financial Sector Liberalisation and Regulation

Ongoing Projects (2)

Cover Bonds as a Complementary Source of Financing Mortgage Lending in India: Lessons from the Global Covered Bond Systems

Project Leader: Ms. Mira Tamboli
Research Team: Neha Malik
Commencement: May 2013
Expected date of completion: March 2014
Funded by: Housing & Urban Development Corporation Ltd. (HUDCO), (Rs. 20.18 lakh)

The Indian housing finance market grew to $90 billion in December 2009. However, funds in excess of $200 billion are still required to meet the funding shortage. Since it is critical for India’s development to close this $200 billion funding gap, it is important that financial institutions engage in viable long-term financing options.

Globally, securitisation and covered bonds are used to access long-term funding for the housing market. Securitisation was one of the primary mechanisms of sourcing mortgage financing in the US until the financial crisis of 2008. Subsequently, due to the lack of investor confidence, the volume of mortgage securitisation has shrunk considerably,
while covered bond issuance is benefiting from a market environment of heightened sovereign risk and favourable regulatory treatment. The critical need for finding alternative sources of long-term funding, amidst the rising popularity of covered bonds across the globe has created an opportunity for developing a covered bond market in India. Covered bonds have the potential to provide long-term funding in the mortgage markets from a diverse investor base and can complement securitisation to form part of a well-diversified liquidity management programme for financial institutions.

The research project seeks to provide a historical overview of covered bond systems and analyse their key design features in selected countries. The focus will be on a legal and regulatory framework, structure of the issuer, cover assets, valuation criteria, etc. The project will compare select global covered bond systems, evaluate the applicability of their features to the Indian market and offer broad guidelines for developing a covered bond system in India.

**Securities Transaction Tax in India: Motives, Revenues and Effects**

**Project Leader:** Dr. Saon Ray  
**Research Team:** Neha Malik  
**Commencement:** April 2013  
**Expected date of completion:** November 2013  
**Funded by:** MCX-SX (Rs. 4.71 lakh)

In India, Securities Transaction Tax (STT) was introduced on all securities transactions in the secondary markets and derivatives in 2004. The rationale was to mobilise additional revenue and to regulate the activities of speculators in the stock market. However, in the Indian context, there is little empirical research that systematically analyses the impact of STT on the volume of trade, inter-day trading, liquidity, bid-ask spread, retail participation, volatility and market efficiency, etc. Given this backdrop, the project analyses the impact of STT in a developing country, where all segments of the market are not well developed, and the goal of the regulator is to encourage greater participation in the market rather than dampening it.

The objective of the project is to: (i) track the effect of STT on stock markets in India during the last eight years in order to gauge the temporal impact of taxes, especially on the market structure and migration of transactions to tax-havens, and their impact on the overall health of the equity markets; and (ii) undertake policy simulation to determine the effect of increased transaction costs due to STT on transaction volume, velocity, market efficiency, market capitalisation and economic growth in India.
3. Trade Openness, Restructuring and Competitiveness

Ongoing Projects (16)

**Programme on Capacity Building and Knowledge Dissemination on Urbanisation in India**

**Project Leader:** Dr. Isher Judge Ahluwalia  
**Research Team:** Dr. Simanti Bandyopadhyay, Dr. Radhicka Kapoor, Kanak Tiwari, Tanushree Bhan, Kartik Misra, Ruchika Singh, Sabayasachi Tripathi, Dr. Deepak Santhanakrishnan, Dr. Jyotsna Bapat, Tarika Khanna and Debraj Bagchi  
**Commencement:** July 2012  
**Expected date of completion:** June 2014  
**Funded by:** Ministry of Urban Development, Government of India (Rs.145.04 lakh)

India’s historic transition to a predominantly urban economy in the next 40-50 years will throw up numerous challenges for urban planners, city managers and urban local bodies (ULBs). These urban challenges range from dealing with worsening urban congestion, to handling escalating demands for land, water, energy, housing and basic urban services (sanitation, waste management, public health) for millions of new and existing urban residents. Enhancing the capabilities of ULBs, many of which are frequently strapped for resources and limited by inadequate institutional capacity, is therefore critical.

Building on the Report of the High Powered Expert Committee on Urban Infrastructure and Services, 2011, Ministry of Urban Development, Government of India, HPEC (Ahluwalia, 2011) Report, ICRIER has launched a “Programme on Capacity Building and Knowledge Dissemination on Urbanisation in India.” This programme is funded by the Ministry of Urban Development. The conference to launch the programme was held on August 31, 2012 in New Delhi. Mr. Kamal Nath, Minister of Urban Development was the Chief Guest, and there were participants from Gujarat, Maharashtra, Madhya Pradesh, Andhra Pradesh, Karnataka, West Bengal, Assam, and Mizoram. Urban planning, unlocking land value and transit-oriented development were the principal themes for discussion.

A number of capacity building and knowledge dissemination workshops have been organised in Bhopal, Hyderabad, Delhi, Chandigarh, Guwahati and Pune. Officials from state governments and ULBs of nearly 25 states have participated, besides professionals and academicians with expertise in different sectors of urban development. The importance of these workshops has been enhanced by the presence of the Chief Ministers of Andhra Pradesh, Haryana, Assam, Maharashtra and Madhya Pradesh, who were chief guests at the inaugural sessions of the workshops held in their states.

The themes covered by the six regional workshops were: (i) Bhopal – e-Governance; (ii) Hyderabad – Urban Governance; (iii) Delhi – Water and Sanitation; (iv) Chandigarh – Water and Sanitation; (v) Guwahati – Solid Waste Management; and (vi) Pune – Urban Sustainability. At the workshop in Pune, there was a special lecture on “Sustainable Urbanisation” by Mr. Montek Singh Ahluwalia, Deputy Chairman, Planning Commission, followed by an address by Mr. Prithviraj Chavan, Chief Minister, Maharashtra, who shared his thoughts on the challenges of sustainable urban development in Maharashtra.
Programme on Research on Urbanisation in India: Preparing for the Urban Challenges of the 21st Century

Project Leader: Dr. Isher Judge Ahluwalia
Research Team: Dr. Simanti Bandyopadhyay, Dr. Radhicka Kapoor, Kanak Tiwari, Tanushree Bhan, Kartik Misra, Ruchika Singh, Sabyasachi Tripdhi, Dr. Deepak Santhanakrishnan, Dr. Jyotsna Bapat, Tarika Khanna and Debraj Bagchi

Commencement: December 2012
Expected date of completion: November 2014
Funded by: Ministry of Urban Development, Government of India (Rs. 120.00 lakh)

Closely associated with the “Programme on Capacity Building and Knowledge Dissemination on Urbanisation in India,” is the “Programme of Research on Urbanisation in India: Preparing for the Urban Challenges of the 21st Century.” The two programmes are significantly synergistic and mutually reinforce the process of learning and disseminating knowledge.

The research programme focuses on seven themes: (i) water, sewerage, waste water treatment, and solid waste management; (ii) unlocking urban land value; (iii) municipal finance; (iv) governance and administrative reforms; (v) planning: land use, zoning and transit-oriented development; (vi) sustainable project management and implementation; and (vii) e-Governance. The research papers are intended to inform policy, and will be published as working papers in the first instance, and subsequently developed into thematic papers for professional journals and other publications. A number of studies under the different themes (listed below) have been initiated, while others will be taken up during the coming year.

i. Towards achieving Service Level Benchmarks for Water Supply in Indian Cities
   Kanak Tiwari and Dr. Deepak Santhanakrishnan

This study attempts an overview of the performance of states and cities with respect to service level benchmarks for water supply, as formulated by the Ministry of Urban Development in 2008. It focuses on good practices and analyses what worked and what did not in terms of achieving these standards of service delivery. It attempts to extract strategies and enabling factors that have acted as catalysts in some of the successful initiatives. The study explores both state-wide approaches (e.g. Maharashtra) and city-level practices to create a relationship-matrix of these enabling factors. It assimilates the lessons to recommend generic strategies and policies that can be adapted for other cities and towns.

ii. Decentralised Composting and Biomethanation of Solid Waste Management in India
   Dr. Isher Judge Ahluwalia and Tarika Khanna

This study examines the case for decentralised composting and biomethanation as an environmentally and financially sustainable option to process and manage municipal solid waste. It reviews current practices in some of the major cities of India. The challenges of segregation of dry and wet waste at the household level, the availability of land, issues such as the scale of operations and transport subsidy on chemical fertilisers, are explicitly addressed.
iii. Property Taxation: A Comparison of Delhi and Bengaluru

Dr. Simanti Bandyopadhyay

Property tax is a major source of revenue for ULBs. Adequate coverage, a proper methodology for assessment of the tax, and changing valuation of properties in the face of rising prices, are some of the major factors that affect the ability of ULBs to realise the potential of revenue from property tax. This study attempts to identify the factors responsible for the differences in performance of Delhi and Bengaluru. In Delhi, a transition from rental valuation to unit area based valuation has not been successful in bringing about the desired revenue; Bengaluru has achieved greater success. This is so even though there are similarities in the approach to reform and both cities have used the Geographic Information System (GIS) and Information Technology (IT). The interaction between policy and administrative reforms to support the change in the outcomes emerges very clearly from this study.

iv. Unlocking Land Value for Financing Urban Development in India

Dr. Isher Judge Ahluwalia

This study highlights the importance of unlocking land value for financing urban infrastructure development. Considering the large financing requirements of urban infrastructure and the strained finances of ULBs as well as state governments, instruments such as tax increment financing, betterment levies, development charges and special assessments are examined for their potential in unlocking urban land value in India’s urban infrastructure development. The study presents evidence from international experience in this area.

v. Planning for Urban Development in India

Dr. Isher Judge Ahluwalia

This study presents a brief overview of the present approach to urban planning in India. It highlights the importance of an integrated approach to the planning of transportation and land use. It presents the conundrum of high population density and low FSI (floor space index) in Indian cities and calls for integrating urban design with planning for urban development. The challenges of inclusion of low-income households in urban planning in the light of the political economy of land acquisition in India are also examined. The study presents alternative models of land assembly and the role of instruments, such as impact fee or betterment charges for revenue mobilisation in the course of putting urban infrastructure in place.

vi. The Importance of Regional Perspectives in Urban Planning

Kanak Tiwari

This study presents an approach to urban planning that takes into account regional sharing of resources, urban-rural synergy and better management and planning of peri-urban areas. It examines the forces that have led most cities in India to become urban agglomerations and the larger cities to transform into metropolitan regions with the attendant challenges. It explores the institutional arrangements that need to be created to manage and plan for the entities that go beyond municipal boundaries. The study also looks at new planned development coming up as a result of transport corridors and opportunities for regional linkages between these and the proximate existing cities.
vii. Policy Initiatives for Promotion of Urban Agglomeration in India
   Sabyasachi Tripathi

This study attempts to identify which policies can help to promote urban agglomeration for rapid and sustainable economic growth in India. It covers the areas of transport infrastructure, efficient land use and its integration with transport planning as well as administrative reforms for better delivery of public services. Only when ease of living is improved together with ease of doing business can agglomeration economies be harnessed.

viii. Using GIS for Greater Efficiency in Operations and Better Delivery of Services by ULBs in India
   Tanushree Bhan

This paper explores the use of GIS technology to improve the system of service delivery and bring about transparency and accountability in the functioning of ULBs. A few good practices have been deconstructed to identify the role of GIS and the enabling factors that have led to a smooth transition from a manual system to IT-enabled administrative arrangements for operations as well as service delivery in Indian cities.

ix. Approaches to Sustainable Management and Implementation of Urban Infrastructure Projects in Public Transport
   Dr. Deepak Santhanakrishnan and Pavan Kumar Ankinapalli

This study examines the risks, opportunities, best practices and conditions (social, economic, institutional and policy) that are crucial for designing, managing and implementing urban infrastructure projects in public transport in a sustainable manner. It seeks to identify the challenges in creating enabling conditions for service provision and potential trade-offs through selected case studies from Indian cities (e.g. Ahmedabad, Indore).

x. The Challenge of Productive Employment Creation in Urban India
   Dr. Radhicka Kapoor

Besides an infrastructure and service delivery crisis, the unprecedented rate of urbanisation in India is creating an employment and poverty crisis. While the former is the principal focus of the “Programme on Research on Urbanisation in India,” the latter is equally important. For Indian cities to emerge as engines of growth, a process of structural transformation is necessarily associated with urbanisation. It requires jobs to be reallocated from low-productivity to high-productivity sectors. The generation of productive employment is, therefore, central to the process of fostering inclusive economic growth.

This study will attempt to answer some pressing issues: How do we provide high-productivity jobs for the rapidly rising urban population? How do we energise jobs in manufacturing and how can governments create an enabling environment for productive employment generation in the manufacturing sector? How can labour policies be redesigned to reduce growth in the casualisation and informalisation of jobs? How can India take advantage of its demographic dividend, which has the potential of increasing its growth rate and labour force? The study will provide key insights into the manner in which productive employment generation will drive urbanisation and be crucial to India’s future, productivity and economic growth.
xi. JNNURM Heritage Cities: Way Forward
   Dr. Jyotsna Bapat

This study is based on the premise that investing in regeneration of inner city historical districts and conservation of urban heritage creates assets that give multiple economic and social returns. The study begins by reviewing projects and practices of improving heritage cities under the Jawaharlal Nehru National Urban Renewal Mission (JNNURM). These range from repair of sidewalks in a historical precinct to formulation of a heritage plan for an entire city. Taking care of deficiencies in infrastructure in heritage cities and sites is the first step. But regenerating cities through conservation needs much more, e.g., creating livelihoods, attracting investments, blending urban design with architectural heritage, deriving a special character for the city from its cultural heritage, and improving the overall liveability and quality of these areas. The study brings out the social and economic implications and impacts of such interventions and attempts to demonstrate that the immense wealth of urban heritage in India is largely untapped in terms of being a revenue generator for cities.

The HUDCO Chair Programme

Project Leader: Professor Meenu Tewari
Research Team: Kartik Misra and Zeba Aziz
Commencement: March 2012
Expected date of completion: February 2015
Funded by: Housing and Urban Development Corporation (HUDCO), (Rs.60.00 lakh)

ICRIER’s HUDCO Chair Programme is a three-year project aimed at conducting research and undertaking capacity building activities on urban issues in India. The programme has three main components: (i) a seminar series on urbanisation and the competitiveness of cities; (ii) research on a subset of urban issues; and (iii) thematic capacity building workshops on select themes based on the research that is conducted under the programme.

During 2012-13, four seminars were held as part of the seminar series on Urbanisation and the Competitiveness of Cities. In the first seminar, Dr. Ejaz Ghani, Lead Economist at the World Bank presented his research on changing trends in the location of manufacturing in Indian cities. In the second seminar, Dr. Isher Judge Ahluwalia presented the findings of the HPEC (Ahluwalia, 2011) Report. The third seminar was delivered by Dr. Anant Sudarshan, Sustainability Science Fellow, Harvard University, who presented a research paper on the relative effectiveness of policy tools aimed at demand management of electricity consumed by urban households in New Delhi. In the fourth seminar, Dr. Indro Ray of ICRIER presented his research findings on the relationship between the housing foreclosure crisis in the US and the regional economic structure at the county-level.

Research under the programme included a study on the work carried out by Transparent Chennai to innovatively map the delivery of urban services to the poor in a large metro area. The project was led by Ms. Nithya Raman, Institute of Financial Management and Research (IFMR) and was titled, “Making Visible the Invisible City – Dynamics of a New Approach to Analysing Access of the Urban Poor to Basic Services.”

The second research study (which is continuing into the second year of the HUDCO Chair Programme) is led by Prof. Meenu Tewari and examines how service delivery innovations are sustained over time. It has already analysed the Bangalore Water Supply and Sewerage Board’s (BWSSB) programme on providing paid piped water connections to the urban poor.
Finally, a capacity building workshop was led by Professor Meenu Tewari in Surat on the issue of urban competitiveness and climate change adaptation. The workshop involved presentations and interactive discussion with municipal officers, planners, climate related non-profit organisations in Surat, among other stakeholders.

**Barriers to Compliance and Compliance Cost of Direct Taxes in India**

**Project Leader:** Dr. Rajat Kathuria  
**Research Team:** Dr. Arindam Dasgupta and Dr. Surajit Deb (External Consultants), Neetika Kaushal  
**Commencement:** November 2012  
**Expected date of completion:** October 2013  
**Funded by:** Directorate of Income Tax, Ministry of Finance, Government of India (Rs. 120.90 lakh)

India has one of the lowest tax-GDP ratios among emerging economies. Indian tax policymakers and administrators are faced with a major challenge of minimising tax base erosion to raise revenue. This objective must be achieved without increasing the cost of compliance for taxpayers. Complexity in tax procedures discourages tax compliance, resulting in increasing the tax gap and lower tax revenue. Such difficulties lead to high cost incidence for the taxpayer and any other party who is assessing and submitting tax returns on the taxpayer’s behalf. The compliance cost of taxation is viewed as economically undesirable primarily due to the deadweight loss it imposes on society, regressive appeal and overall inefficiency. Since no research on the compliance cost of taxation has been conducted on a large scale, encompassing all categories of taxpayers in India, the study is novel and at the same time imperative for policy formulation. The study identifies the factors, (administrative procedures and discretionary provisions) that act as barriers to compliance and provide a measure of the cost of compliance with direct taxes for taxpayers in India. It focuses on individuals and businesses (small, medium and large) including domestic and foreign enterprises. For the purpose of the study, data will be obtained from a primary survey of 5000 stakeholders to be conducted across 12 cities and an empirical model will be built to estimate the measure of compliance cost.

**Revisiting Special Economic Zones (SEZ): A Review and Evaluation of India’s SEZ Policy**

**Project Leader:** Dr. Arpita Mukherjee  
**Research Team:** Subhobrota Ray, Dr. Parthapratim Pal and Saubhik Deb (External Consultants), Debolina Mukherjee, Deboshree Ghosh and Deepti Mathur  
**Commencement:** May 2013  
**Expected date of completion:** November 2013  
**Funded by:** Department of Commerce, Government of India, and Export Promotion Council for EOUs and SEZs (Rs. 50.21 lakh)

India was one of the first Asian countries to recognise the effectiveness of the Export Processing Zone (EPZ) model in promoting exports, with Asia’s first EPZ set up in Kandla in 1965. The SEZ Act was introduced in 2005. Since then, this policy has been widely debated. Supporters of this policy argue that it would attract more foreign direct investment (FDI), lead to higher exports, generate economic activity and employment, etc., whereas the opponents highlight the problems, such as agricultural land acquisition, duty foregone, low FDI and growing trade deficit.

This study aims to: (i) examine the objectives laid down under the SEZ policy and how far these have been achieved; (ii) undertake a comparative analysis of incentives, concessions, exemptions etc; (iii) conduct a cost-benefit analysis of SEZs; (iv) understand the sectoral and regional patterns of the SEZ sector; (v) analyse the incentives provided under the Free Trade Agreements (FTAs) and their effect on the growth of businesses in SEZs; (vi) identify global
best practices in countries where SEZs have been successfully implemented and to understand if the incentives offered can be replicated in India; (vii) examine WTO compatibility of the SEZ schemes; and (viii) make policy recommendations to the Indian government. The study is based on primary and secondary data findings.

**Subsidies Provided to the Services Sector in India**

**Project Leader:** Dr. Rupa Chanda  
**Research Team:** Shravani Prakash and Sasidaran Gopalan (External Consultants)  
**Commencement:** May 2013  
**Expected date of completion:** January 2014  
**Funded by:** Ministry of Commerce & Industry, Government of India (Rs. 32.77 lakh)

Unlike the area of goods, the General Agreement on Trade in Services (GATS) so far does not contain any substantive discipline on subsidies with respect to trade in services. However, Article XV of the GATS recognises that subsidies may have distortive effects on trade in services. Consequently, members have made a commitment to enter into negotiations in order to develop the necessary multilateral discipline on subsidies to services. Although these negotiations commenced more than a decade ago, they have been inconclusive and have mainly focused on the working definition of subsidies and on information exchange. Overall, little progress has been made in understanding the nature of these subsidies and their likely impact on trade flows.

The purpose of this study is to examine the subsidies provided to services by selected developed and developing countries, namely US, Canada, UK, China and India. Three services will be chosen for each country. The objective will be to: (i) identify the various forms in which subsidies are granted; (ii) understand whether and how they may distort trade; (iii) give a comparative picture of subsidies provided to services across the selected countries; (iv) assess if India’s trade interests are affected by subsidies provided to services in other countries; (v) assess if these subsidies are compatible with the countries’ GATS commitments; and (vi) provide some directions for developing discipline in services subsidies.

The study will be based on secondary and primary research and will also involve two stakeholder consultations at defined stages of the project.

**Stabilising Food Prices through Buffer Stocking and Trade Policies**

**Project Leader:** Professor Anwarul Hoda  
**Research Team:** Shweta Saini  
**Commencement:** May 2013  
**Expected date of completion:** May 2014  
**Funded by:** Centre for Development Research (ZEF), University of Bonn, Germany (Rs.30.4 lakh)

This study, undertaken in cooperation with ZEF, will analyse the buffer-stocking policies in India, and make recommendations aimed at ensuring that the stocking operations are cost effective and achieve stabilisation and food security objectives. In the wake of the 2008 global food crisis, decisions on strategic buffer stocking of food grains have become a major issue, particularly for populous countries like India and China. Such decisions have cost and price repercussions at both intra-country and global levels. Countries view buffer stocks as a potential means to dampen short-term price volatility, while using most production enhancing policies to work only in the longer term. But public buffer stocking does not come free of cost and its operations can be marred by systemic inefficiencies. Therefore, there is a need to revisit not just the buffer stocking operations but also the policy itself.
This project involves modeling exercises to compute the fiscal costs of alternative stabilisation policy objectives that can be achieved through such buffer stocking operations. A key feature of this project is to construct and empirically test simulation models that incorporate the links between agricultural commodity prices, commodity storage, its trade options, and different price stabilisation policies in the short- and medium-term (1-3 years) context.

**Impact of American Investment in India**

*Project Leader: Dr. Saon Ray*

*Research Team: Smita Miglani and Neha Malik*

*Commencement: December 2012*

*Expected date of completion: August 2013*

*Funded by: American Chambers of Commerce in India (Rs. 25.10 lakh)*

The importance of trade and investment in India has grown following the opening of its economy. There are several ways in which investment can contribute to a country’s growth i.e. through creation of high-quality jobs, transfer of technology and exports. The impact of FDI in a country depends on many factors including policies and institutions, the nature of the regulatory framework and the labour market as well as the quality of investment. The US is India’s largest trade and investment partner and is engaged with India at various levels of economic cooperation. This study investigates the socio-economic impact of American investment in India, identifies the challenges faced by American investors and highlights future opportunities. The study uses both primary and secondary data as part of the analysis.

**Measuring the Competitiveness of Indian Agriculture**

*Project Leader: Dr. Pooja Sharma*

*Research Team: Manjeeta Singh*

*Commencement: July 2013*

*Expected date of completion: July 2014*

*Funded by: Commission for Agricultural Costs and Prices, Ministry of Agriculture, Government of India (Rs. 24.67 lakh)*

Today, while making its recommendation with respect to the minimum support prices (MSPs) of agricultural commodities, the Commission for Agricultural Costs and Prices (CACP) takes into account a range of factors, including the domestic terms of trade and cost of production of the commodities. However, it does not fully factor in prevailing world commodity prices. In recent years, the government has been able to raise the MSPs, partly on account of high world prices of these commodities. It is felt that eventually the CACP and the government will need to take into consideration, more systematically, India’s competitive position in world markets while fixing the MSPs. Substantial and systematic differences in domestic and world reference prices or excessive unevenness in protection accorded to different agricultural products can have adverse economic impact. The coefficients of competitiveness and protection are considered very useful instruments for evaluating agricultural price policy by allowing analytically sound comparison of domestic and world prices for a given commodity. Improved measurement of the international competitiveness of Indian agriculture would enable the CACP and the government to make more informed policy and programmatic decisions, potentially allowing for a more balanced and improved allocation of domestic resources.

With this aim, the CACP has invited ICRIER to conduct a research study to measure and evaluate the competitiveness of a set of 12 agricultural commodities, out of a total of 24, for which the CACP presently announces MSPs periodically. The study will provide estimates of alternative measures of protection for the period 2000-01 to 2011-12. The study will be conducted in consultation and collaboration with the CACP.
Facilitating Investments between India and the European Union: The case of Bilateral Investments between India and Germany

**Project Leader:** Dr. Arpita Mukherjee  
**Research Team:** Tanu M. Goyal, Ramneet Goswami and Tincy Sara Solomon  
**Commencement:** January 2013  
**Expected date of completion:** November 2013  
**Funded by:** Konrad-Adenauer-Stiftung (KAS) (Rs. 20.00 lakh)

India and the EU are negotiating a Broad-based Trade and Investment Agreement (BTIA). Within the EU, Germany is an important investor for India and a key source country for technology transfer. A number of Indian companies have invested in Germany and some of these investments are linked to acquisition of technology. Recent policy measures in India and the economic slowdown in Germany have impacted investment flows. The BTIA is likely to affect the flow of investment and transfer of technology between India and Germany. Given this background, the study analyses the trends and patterns in bilateral investments between India and Germany and attempts to understand mutual opportunities and prospects for investment. The study also aims to identify the barriers to investment and examine the expectations of investors from the India-EU BTIA (currently being negotiated). The objective is to make policy recommendations to the Indian and German governments and suggest strategies for the BTIA and beyond to facilitate an increase in bilateral investment flows in the two markets. The study is based on a primary survey and secondary data analysis.

Linkage between Index of Industrial Production (IIP) Growth Rate and Export Growth Rate

**Project Leader:** Dr. Deb Kusum Das  
**Research Team:** Professor Biswa Nath Goldar (External Consultant) and Amit Sadhukhan  
**Commencement:** March 2013  
**Expected date of completion:** September 2013  
**Funded by:** Ministry of Commerce & Industry, Government of India (Rs.17.90 lakh)

This study aims to analyse the observed volatility of the Index of Industrial Production (IIP) in relation to exports and vice-versa. The period of study is 2006-2012. In particular, it will examine the relation between the growth of IIP and the growth of exports in the Indian manufacturing sector at different disaggregative levels. This will be done using 397 IIP product items, which are utilised for constructing the IIP by the Central Statistical Organisation. The products which show a positive association with IIP growth and export growth are expected to have different policy implications than the products which show a negative association. The study, therefore, seeks to identify such products and proposes possible policies to address the issue.

The Indian Economy at the Crossroads

**Project Leaders:** Dr. Rajat Kathuria and Dr. Saon Ray  
**Research Team:** Dr. Deeparghya Mukherjee and Mansi Kedia  
**Commencement:** June 2013  
**Expected date of completion:** December 2013  
**Funded by:** Information Technology and Innovation Fund (ITIF) (Rs. 16.2 lakh)

Over the past few decades, the literature on economics has documented the impact of India’s liberalisation policies (since 1991) on its robust economic growth. Emphasis was placed on free markets and open and non-discriminatory trade. As the race for innovation and technology-based economic growth has intensified, countries are increasingly
turning to protectionist measures often termed, “innovation mercantilism”, such as forcing technology or intellectual property transfer as a condition of market access, erecting trade barriers, and manipulating standards, preventing foreign competitors from gaining advantage.

This study, jointly conducted by ITIF and ICRIER, will attempt to validate the concerns raised by foreign countries and provide arguments for and against India’s choice of policy instruments to achieve strong and sustained economic growth in the future. The study will focus on ICT, biotechnology and pharmaceuticals, and iron and steel industries – three sectors which potentially face the maximum barriers to free trade and investment in the country.

The research will be based on analysis of trade data in each of these sectors, and primary data collected during stakeholders’ consultations. Recommendations based on the research findings will provide a vision for the future, outlining India’s domestic and international policy stance.

**An Inquiry into the Impact of India’s “App Economy”**

- **Project Leader:** Dr. Rajat Kathuria
- **Research Team:** Dr. Sahana Roy Chowdhury and Mansi Kedia
- **Commencement:** July 2013
- **Expected date of completion:** December 2013
- **Funded by:** Internet and Mobile Association of India (Rs.10.46 lakh)

Mobile applications have created a new trend in content creation and dissemination on mobile platforms. Lightweight and function-specific applications, more popularly known as “Apps”, are driving consumption in this industry, and will only increase as newer devices are introduced in the market. The ecosystem around applications in India has been evolving rapidly over the last few years, and has resulted in the emergence of new business models.

The aim of this study is to capture and analyse the entire value chain of the App economy in India, including importantly its impact on growth and employment. The study will attempt to provide an estimate of people engaged in application development and its supporting ecosystem.

The research will be based on both primary and secondary data analysis. The primary data collection will be conducted in several rounds for application developers, platform developers, and subsequently for application publishers, such as device manufacturers and service providers. The findings will help provide policy recommendations on the constraints to improving the ecosystem around applications supported on smart phones and tablets in India.

**Estimating Domestic and Foreign Value added in Indian Export**

- **Project Leader:** Dr. Deb Kusum Das
- **Research Team:** Sreerupa Sengupta
- **Commencement:** July 2013
- **Expected date of completion:** October 2013
- **Funded by:** Ministry of Finance, Government of India (Rs. 8.75 lakh)

The increasing importance of vertical specialisation trade has been a notable feature of rapid economic globalisation and regional integration. In an attempt to analyse the depth of participation in global production chains, the study will provide an accounting framework for decomposing Indian exports into value added components by source. The study funded by the Ministry of Finance aims to estimate the shares of domestic and foreign value added in Indian exports.
at a detailed product level. This quantitative assessment will be done by combining information from trade statistics with input-output transaction tables. The study will generate a disaggregated sector database on value added trade and also analyse how the export value added decomposition may affect issues in international trade and open-economy macroeconomics.

**Impacts of Taxes on Commodity Derivatives Transactions**

*Project Leader:* Dr. Saon Ray  
*Research Team:* Neha Malik  
*Commencement:* November 2012  
*Expected date of completion:* August 2013  
*Funded by:* Multi-Commodity Exchange of India Ltd. (Rs. 6.40 lakh)

Commodity futures in India were introduced with the dual purpose of promoting price discovery and enhancing risk management in the commodities market. This study examines the rationale behind a Commodities Transaction Tax (CTT) introduced in the Indian Union Budget 2013-14. It also examines the proposition that such taxes generate additional revenue by analysing the effect of CTT on the total volume traded as well as the overall efficiency of the commodity market. For this purpose, the study probes theoretical arguments as well as available empirical evidence in the context of financial transaction taxes.

**Estimates of Productivity: KLEMS Project**

*Project Leader:* Dr. Deb Kusum Das  
*Research Team*: Dr. Suresh Aggarwal and Dr. Abdul Azeez Erumban (External Consultants), Sreerupa Sengupta and Pilu Chandra Das  
*Commencement:* September 2009  
*Expected date of completion:* December 2013  
*Funded by:* Reserve Bank of India (Rs. 174.00 lakh)

The India-KLEMS Project is a part of the World KLEMS initiative, which uses the KLEMS framework for measuring productivity and is currently being undertaken by many developing economies of Asia and Latin America.

This project attempts to construct an internationally comparable dataset on the Indian economy for the period 1980-81 to 2009-10 for productivity measurement at a disaggregated industry-level covering the entire economy. Time series data on gross output, gross value added, capital, labour and intermediate inputs (energy, material and services) for a disaggregated internationally comparable industrial classification have been constructed. The project generates an industry-level productivity database, consistent with official national accounts and input-output transaction tables.

Two of the three phases of the study have been completed, namely: (i) construction of productivity estimates for 26 subsectors comprising the Indian economy using the value added approach (phase-1); and (ii) gross output approach (phase-2), respectively.

---

1 The project work is being carried out under the guidance of the Advisory Committee chaired by Professor K. L. Krishna and research adviser, Professor B. N. Goldar.
Completed Projects (4)

Non-Alcoholic Beverages Sector in India: Constraints and Prospects
Project Leader: Dr. Arpita Mukherjee
Research Team: Debolina Mukherjee, Deboshree Ghosh and Divya Satija
Commencement: June 2012
Completion: February 2013
Funded by: Indian Beverage Association (Rs. 30.20 lakh)

The non-alcoholic beverages sector is a key constraint in the food processing industry. It is a labour-intensive sector with strong backward and forward linkages. The objective of the study is to: (i) analyse the contribution of this industry to GDP, exports, investment and employment generation; (ii) identify the key growth drivers; (iii) analyse the barriers to the growth of the sector; and (iv) make policy recommendations to improve the productivity and competitiveness of the sector and develop India as a food processing hub. Based on secondary data and a primary survey of around 500 stakeholders, the results show that India has the advantage of a large market, rich raw material base and supply of a skilled workforce. However, the country has not been successful in developing an agro-processing hub due to various barriers, such as lack of raw materials of processible quality, infrastructure bottlenecks, high and multiple regulation and lack of coordination between different regulatory bodies, among others. The study prioritises the reforms which, if implemented, will reduce agricultural wastage, enable the food processing sector to grow and create employment opportunities. The study’s findings will be published in the form of a book.

Study on Petrochemical Feedstock
Project Leader: Dr. Saon Ray
Research Team: Amrita Goldar, Swati Saluja and Gautam Mohan
Commencement: November 2011
Completion: August 2012
Funded by: Chemicals and Petrochemicals Manufacturers’ Association (CPMA) (Rs. 40.00 lakh)

This study examined the hydrocarbon feedstock scenario for petrochemicals in India in terms of availability, pricing, regulatory and fiscal issues. The products of the industry are the building blocks in many industries including polymers, synthetic rubber, synthetic fibres, fibre intermediates and basic chemicals. The study examined the feedstock scenario in the neighbouring region and assessed the competitive position of Indian petrochemical producers vis-à-vis producers in these countries. Based on secondary data and stakeholders’ consultations, the research identified the future challenges to growth of the sector in India and made policy suggestions to strengthen India’s competitive position. The study found that feedstock costs were key determinants of the cost competitiveness of the petrochemical sector. India’s predominantly naphtha-based industrial structure is susceptible to risks emanating from high international prices, but the possibility of producing a wide-ranging product and by-product basket offsets this to an extent. This was analysed through a per unit production cost estimation and comparison of ethylene cracking for naphtha and natural gas. The study also noted that India has one of the highest levels of indirect tax incidence on raw materials for petrochemicals compared to many developing and developed countries. The Indian import duty structure provides for no incremental tariff protection between key petrochemical inputs and their end-products (building blocks) or for products such as polymers of downstream industries. There is also an urgent need to correct the duality in the fiscal structure across the petrochemical value chain for India to emerge as a globally attractive location for investment in the petrochemicals sector.
Advancements in Tax Administration: Lessons and Experiences of the UK, Brazil and India

**Project Leader:** Dr. Parthasarathi Shome  
**Research Team:** Gautam Ray, Rajiva Ranjan Singh and Neetika Kaushal  
**Commencement:** November 2011  
**Completion:** July 2013  
**Funded by:** Prosperity Fund, UK (Rs. 101.00 lakh)

The revenue authorities, in their effort to close the tax gap, often resort to non-competitive tax policies to deal with the non-compliant attitude of businesses. It is imperative to know whether such practices are successful in meeting their objectives. There exists a huge gap in the Indian tax administration that results in not only increased compliance cost of taxpayers but also a higher administrative burden for the tax department. Many developed countries have adopted best practices to improve their capacity on formulation of the tax administration policy. This project attempts to examine the methods adopted by global revenue authorities to increase the efficiency of their tax administrations and suggest lessons that our tax administration can learn from the experience of these countries. The study aims to analyse international best practices followed by both developed economies like the UK, Canada and Australia and emerging economies like Brazil. Another objective of the project is to create a platform for meaningful engagement between taxpayers and tax administrators. This objective was attained through an intensive dialogue process held across five metros (Bengaluru, Chennai, Kolkata, Mumbai and New Delhi) that brought together tax administrators, tax practitioners, private businesses, and tax advisers. On the basis of the issues highlighted in the discussions, six themes shortlisted for the study included information technology to facilitate taxpayer services, data warehousing and analysis, reforming the audit selection and dispute resolution procedure. Eleven papers on these themes were written by former and present tax officials, tax practitioners and academicians. The papers were published in a book titled *Indian Tax Administration: A Dialogue* edited by Dr. Parthasarathi Shome and published by Orient Blackswan. The book was launched by Dr. Bimal Jalan at the conference on “Tax Administration: A Dialogue” held on June 24-25, 2013 in New Delhi to disseminate the findings of the study.

A Study of India’s Investment Environment, Major FDI Inflows, and Suggestions for Taiwan’s Businessmen

**Project Leader:** Dr. Rajat Kathuria  
**Research Team:** Mansi Kedia  
**Commencement:** May 2012  
**Completion:** May 2013  
**Funded by:** Taipei Economic and Cultural Centre in India (Rs. 40.25 lakh)

As a part of its Look East Policy, India is trying to increase economic engagement with its East Asian neighbours. Taiwan, one of the leading economies of East Asia, is an important and integral part of the global economy. India’s strategic ties with Taiwan in trade and investment will help support its growth and development agenda. Unfortunately, current FDI inflows from Taiwan to India are abysmally low. This study analysed the potential to develop a mutually beneficial relationship addressing the growth imperatives of both countries. The study examined the investment climate in India with respect to Taiwanese business, focusing on select sectors and states. The sectors included ICT, machine tools, retail, transport and logistics, auto and auto components, and food processing. The selected states were Tamil Nadu, Gujarat, Karnataka, Maharashtra, West Bengal, and the National Capital Region (Delhi, Gurgaon, and Noida). Primary and secondary data analysis established the tremendous potential for collaboration between the two countries beyond the sectors and states identified. The process to promote increased collaboration is already underway with representatives from both countries signing agreements to facilitate increased FDI. However, barriers
to investment continue to exist and India must expedite the process of domestic reforms to create an attractive environment for Taiwanese investors. Additionally, the study has made specific recommendations for industry associations and businesses at the micro level.

4. Regional Economic Cooperation with Focus on South Asia

Ongoing Projects (2)

Strengthening Research and Promoting Multi-Level Dialogue for Trade Normalisation between India and Pakistan

Project Leader: Dr. Nisha Taneja
Research Team: Dr. Sanjib Pohit, Dr. Vaqar Ahmed, Saad Rajput, Dr. Rupa Chanda, Abid Q. Suleri, Muhammed Adnan, Kiran Javaid, Farah Shahid, Dr. Hadia Majid and Nadia Mukhtar (External Consultants), Dr. Saon Ray, Sanjana Joshi, Akanksha Awal, Mishita Mehra, Prithvijit Mukherjee, Samridhi Bimal, Isha Dayal, Radhika Saini, Palakh Jain and Shrvani Prakash
Commencement: August 2012
Expected date of completion: March 2015
Funded by: UK Government Agencies (Rs. 624.00 lakh)

India and Pakistan are in the process of normalising their trade relations. This will not only unleash trade potential but will also open up opportunities for investment and joint ventures. In keeping with the overall aim of improving trade and investment relations between India and Pakistan, the project’s endeavour is to: (i) catalyse and inform a more participatory policy debate through targeted and practical research; and (ii) foster multi-level dialogue platforms for interface among policymakers, business persons and academics.

The project’s research studies are being conducted in collaboration with the Lahore University of Management Studies (LUMS) and the Sustainable Development Policy Institute (SDPI), Islamabad. ICRIER has signed MOUs on research collaboration with both these institutions. In addition, a quarterly newsletter is being brought out containing short policy-oriented analytical contributions by well-known experts on themes relating to India-Pakistan trade normalisation. Two issues of the newsletter were published this year. With the aim of widely disseminating the findings of the research and to provide regular updates on the various activities, the project has launched a web portal www.indiapakistantrade.org linked to the ICRIER website.

The findings of the research studies as well as the trade perception survey were presented at the project’s first annual conference in March 2013. A conference volume is being published. Brief summaries of the studies presented at the conference are as follows.

i. Normalising India-Pakistan Trade

Dr. Nisha Taneja, Mishita Mehra, Prithvijit Mukherjee, Samridhi Bimal and Isha Dayal

With the trade normalisation process between India and Pakistan gathering momentum since November 2011, new opportunities for enhancing bilateral trade have opened up between the two countries. This study estimates the trade potential between India and Pakistan, and examines how this potential can be realised. Using the Trade Possibility Approach for all items traded, followed by selecting only those items in which the countries have a Revealed Comparative
Advantage (RCA) to export, the trade potential between India and Pakistan is estimated to lie between US$10.9 billion and US$19.8 billion. The study finds that this trade potential remains unrealised largely due to impediments in transport and transit facilities, restrictive visa regime, continuation of large informal trade flows, and presence of ‘perceived’ non-tariff barriers to trade between India and Pakistan.

ii. Informal Flow of Merchandise from India: A Case for Pakistan
   
   Dr. Vaqar Ahmad and Saad Rajput

   The restrictive trading environment has for several decades encouraged informal trade flows between India and Pakistan. The study prepares estimates of the magnitude of informal trade flows from India to Pakistan. It is based on a primary survey in several markets across key Pakistani cities, including Lahore, Karachi, Peshawar, Rawalpindi and Bahawalpur. The results of the survey indicate that the current annual inflow of informally traded commodities from India to Pakistan is US$4.2 billion. The study also identifies the key Indian goods that are imported informally into Pakistan, namely textiles, pharmaceuticals, tobacco, automobiles, herbs and spices, cosmetics, jewellery, fruits and vegetables.

iii. Trade Perception Survey
   
   Dr. Sanjib Pohit, Dr. Nisha Taneja, Mishita Mehra and Prithvijit Mukherjee

   A trade perception survey was conducted for the first time across several cities in India and Pakistan. The study presents the statistical results of several hypotheses related to aspects of trade and business environments, such as level of awareness, market access, infrastructure and customs facilitation. The survey also presents results of the perceptions of traders about the expected changes in these parameters. The survey will be repeated next year.

iv. Quantifying the Gains from India-Pakistan Trade Integration: A CGE Modeling Approach
   
   Dr. Sanjib Pohit and Radhika Saini

   This paper analyses the welfare effects of bilateral trade liberalisation between India and Pakistan. Using a Computable General Equilibrium (CGE) model, this paper estimates the potential benefit to India and Pakistan under various simulations of trade liberalisation. The research shows that there are avenues for significant mutual gain and that the benefits extend not only to India and Pakistan, but also to other South Asian economies. However, the analysis also shows that the realisation of these benefits depends crucially on productivity gains in the modes of transportation services between India and Pakistan.

v. Trade in Services between India and Pakistan
   
   Dr. Rupa Chanda

   This paper rests on the premise that improved trade relations in services between the two countries will not only help diversify the trade basket and build confidence through the mobility of people, but will also create synergies for merchandise trade through cooperation. The study does the following: (i) investigates the current trends in the services sectors of both economies; (ii) analyses bilateral trade and its subsectoral components; (iii) identifies avenues where there is potential for further trade; and (iv) makes recommendations to remove the current constraints to trade in services. The paper lays special emphasis on trade possibilities in the health, IT and BPO as well as the tourism sectors. Overall, the study concludes that it would be useful for India and Pakistan to begin by liberalising the more contentious
service sectors, such as tourism and IT and then use an incremental, phased and prioritised approach for the remaining sectoral coverage.

vi. **FDI in India: Prospects for Pakistan**  
   *Dr. Vaqar Ahmed, Abid Q. Suleri and Muhammed Adnan*

The study aims to highlight Pakistan’s investment opportunities in India. A consultation was undertaken with the business community in Pakistan (engaged in outward investment in sectors such as leather, sports, surgical equipment, engineering, auto, education, textile and steel), to ascertain their interest to invest in these sectors in India. The study also discusses the concerns of Pakistani investors and their preparedness to benefit from this opportunity.

vii. **Foreign Direct Investment in Pakistan: Prospects for India**  
   *Palakh Jain*

This study does the following: (i) examines the possibilities of flow of investment from India to Pakistan; (ii) analyses the recent changes in the policy environment and identifies possible barriers that investors envisage; (iii) identifies sectors in Pakistan in which there is potential for Indian investors; and (iv) makes suggestions for possible measures that can be undertaken to increase Indian investment in Pakistan.

viii. **India-Pakistan Bilateral Trade in the Sports Goods Sector**  
   *Kiran Javaid and Farah Shahid*

Examining the sports goods sectors in India and Pakistan, this study finds that bilateral trade in the sports goods industry has been increasing, with India’s exports to Pakistan being greater than those of Pakistan’s to India. The paper also identifies commodities in the sports sector for which India and Pakistan have comparative advantage and recommends trade between the two countries in these goods. Further analysis is then conducted using a gravity model, which indicates that trade remains far below the potential and is influenced by factors such as GDP, transportation costs, contiguity and historical integration.

ix. **Trade between India and Pakistan in Textiles**  
   *Dr. Saon Ray, Mishita Mehra and Prithvijit Mukherjee*

This study analyses the trade in textiles and clothing between India and Pakistan, which accounts for 22 percent of the total trade between the countries. The majority of this trade takes place in textiles, especially cotton, owing to large cotton production in both India and Pakistan. The paper examines the current trends of trade in cotton and other textiles, transit routes for this trade as well as the regional distribution of production in India and Pakistan. The study finds that there are several products in which India and Pakistan each have comparative advantage, but these are not being traded. The total potential for trade in textiles between the two countries remains untapped, and stands at approximately five times the current value of exports.
x. India-Pakistan Trade: An Analysis of the Health Sector
Hadia Majid and Nadia Mukhtar

This study examines the synergies between the health sectors in India and Pakistan, focusing chiefly on pharmaceutical products, medical equipment, surgical instruments and health services. The authors find that Pakistan imports those commodities in the health sector from other countries that also constitute India’s exports to the world, indicating opportunities for trade between the economies. Trends in the trade and production of goods and services in the health sector have been examined; and the study finds that Pakistan could benefit from India’s high-quality medical treatment and personnel, while India could gain from imports of surgical and pharmaceutical goods from Pakistan.

xi. Enhancing India-Pakistan Trade and Connectivity within the South Asian Context
Shravani Prakash

The South Asian Free Trade Agreement (SAFTA) members can draw lessons from the physical connectivity, trade and transit facilitation measures as well facilitative government structures in regional arrangements, such as the Association of Southeast Asian Nations (ASEAN) and Greater Mekong Subregion (GMS). The study recommends that South Asian countries should open trade and transport routes across each other’s territories – particularly by using Myanmar, Pakistan and Afghanistan as land bridges. It also suggests the revival of a regional overland road link between Kabul and Yangon via Dhaka for the facilitation of trade in the region.

Integrating South and East Asia: An Analysis of the Economic Effects of Intensified Regional Cooperation and Integration

Project Leader: Professor Anwarul Hoda
Research Team: Dr. Rajat Kathuria, Dr. Arpita Mukherjee, Professor Meenu Tewari, Durgesh Kumar Rai, Manjjeeta Singh, Mansi Kedia and Tanu M. Goyal
Commencement Date: August 2012
Expected date of completion: October 2013
Funded by: Asian Development Bank (Rs. 97.30 lakh)

Over the past two decades, there has been a growing momentum for closer regional cooperation and integration (RCI) among South and East Asian economies. Recent developments in the global economy have accelerated the push for and pace of RCI between the two sub-regions. Market-led as well as bilateral and regional initiatives are expected to strengthen cooperation among the two sub-regions. This research project seeks to provide comprehensive and high-quality research on the scope for and implications of RCI between South and East Asia.

The project consists of four studies: (a) Production networks and barriers to trade and investment in India; (b) Potential for involving India in regional production networks; (c) Mapping the future of high value manufacturing (HVM) in India; and (d) Integrating South and East Asia – the case of liberalising services under the India-Thailand CECA. All the studies involve both desk work and field surveys and interviews.

The first draft of the report has been submitted and the findings of the studies are proposed to be discussed at an ADB workshop in Manila after which the report will be finalised.
Completed Projects (3)

Strengthening the Textile and Clothing Sector in South Asia

Project Leaders: Dr. Nisha Taneja and Dr. Saon Ray
Research Team: Dr. Saman Kalegama, Dr. Safdar Sohail, Dr. Khondaker Moazzem and Paras Kharel (External Consultants), Prithvijit Mukherjee and Mishita Mehra
Commencement: October 2011
Completion: March 2013
Funded by: Asian Development Bank (Rs.55.00 lakh)

With the abolition of the Multifibre Agreement (MFA) in 2005, exporting countries were forced to become more competitive as they no longer had assured markets. Each South Asian country adopted strategies to cope with the changed scenario.

The central question that the study addresses relates to the firm-level strategies adopted in upgrading the value chain by the textile and clothing sector in South Asian countries. It also examines whether firm-level capabilities built through global value chains are now being transferred to regional networks. This study has been undertaken in five South Asian countries: Bangladesh, India, Nepal, Pakistan and Sri Lanka. ICRIER was the nodal agency coordinating the study in the five countries.

The study on the Bangladesh readymade garments (RMG) sector shows that the competitiveness of the sector has increased since the phasing out of the Multifibre Agreements (MFA) in 2005. The changes in process upgradation have been due to adoption of better machinery, while product upgradation has been due to product varieties in design and the use of better fabrics. The regional value chain emerging between Bangladesh and India is at an early stage. The study on India points to the evidence of product, process and even functional upgrading in the Indian RMG firms. Process upgrading has occurred mainly due to the introduction of new production machinery, and product upgrading has taken place through reduction in reworking rates. Indian firms are selling products in the Middle East under their own brands. Upgrading is limited in smaller firms that cater largely to the domestic market. There is evidence of the emergence of a regional chain through production linkages with Bangladesh. The Nepal study reported a decline in exports from Nepal. Most of the firms surveyed revealed that they were involved in the design of their exports and they could select the raw materials required. This was mostly true of the products exported to the EU but not the US. The Pakistan study examined the textile and clothing sector and noted that 70 percent of the fabric used was cotton. The study observed some process upgrading as the average order size has increased, while the order cycle has reduced. Improved process management and new processes and technology contributed significantly to this reduction in manufacturing time. The Sri Lankan study notes that post-MFA, the garment industry moved up the value chain as firms engaged in independent marketing, the use of brands, product design and development, and promoting organic and fair trade garments. The forward linkages in value chain development with regard to South Asia have been minimal, though Sri Lanka is sourcing inputs from India and Pakistan in the region.
Enhancing Bilateral Trade, Investment and Collaboration in Services: India and the European Union

**Project Leader:** Dr. Arpita Mukherjee  
**Research Team:** Tanu M. Goyal, Divya Satija, Ramneet Goswami and Smita Miglani  
**Commencement:** January 2012  
**Completion:** December 2012  
**Funded by:** Konrad-Adenauer-Stiftung (Rs. 20.00 lakh)

India and the EU are negotiating a comprehensive bilateral Free Trade Agreement (FTA), known as the India-EU Broad-based Trade and Investment Agreement (BTIA). This study examined the scope for enhancing trade, investment and collaboration in services between India and the EU. The study was based on primary survey and secondary information analysis and focused on selected sectors of interest to India and EU member states, namely logistics, energy, IT and IT-enabled services (ITeS), retail, and professional services. Within each sector it analysed the trade potential, investment and collaboration, studied the pattern of bilateral trade flows and identified the areas of future cooperation in addressing the barriers faced in each other’s markets. The findings of the study are being published in the form of a book.

Joint Feasibility Study on Enhancing Trade, Investment and Cooperation between India and Taiwan

**Project Coordinator:** Dr. Arpita Mukherjee  
**Research Team:** Dr. Rajat Kathuria, Divya Satija, Durgesh Kumar Rai, Mansi Kedia, Dr. Parthapratim Pal (External Consultant), Smita Miglani, and Tanu M. Goyal  
**Commencement:** August 2011  
**Completion:** January 2013  
**Funded by:** Ministry of External Affairs, Government of India (Rs. 20.00 lakh)

This joint research project by ICRIER and Chung Hua Institute of Economic Research (CIER) examined the feasibility of an India-Taiwan Comprehensive Economic Agreement. The study, based on secondary information analysis and a primary survey, found that India and Taiwan exhibit strong complementarities in investment and there is scope for enhancing cooperation in a number of sectors, such as ICT and food processing. If the two countries enter into a bilateral trade agreement, the gains are more likely to be in favour of Taiwan for trade in goods. The study highlighted that unless India implements domestic reforms, it is unlikely to benefit from trade agreements. India should evaluate the impact of its trade agreements and examine how its relationship with Taiwan fits into the overall framework of its policy related to East Asia and trade agreements, such as the Regional Comprehensive Economic Partnership (RCEP).
5. WTO Related Issues

Ongoing Projects (2)

WTO and Trade Policy
Project Leader: Professor Anwarul Hoda
Research Team: Pritha Banerjee
Commencement: August 2009
Expected date of completion: Ongoing

The Trade Policy and World Trade Organization (WTO) research and capacity building project was developed to enhance trade policy and WTO research at ICRIER and to provide Indian policymakers a deeper understanding on how to take forward India’s interests in the multilateral trading system. The principal objectives of the research programme were to: (i) engage in policy-oriented research; (ii) assist the Ministry of Commerce & Industry in policy making; (iii) constructively engage with stakeholders at regular intervals; (iv) organise stakeholder meetings to elicit suggestions on the possibilities of and opportunities for agreement in multilateral trade negotiations; and (v) help India to effectively participate in the reform of the global governance and trade agenda.

During the year, the main work undertaken was a study of India’s agricultural trade policy from the perspective of the WTO obligations and sustainable development, jointly with the International Centre for Trade and Sustainable Development (ICTSD), Geneva. Professor Anwarul Hoda and Dr. Ashok Gulati, Chairman of the CACP, co-authored the paper, “India’s Agricultural Trade Policy and Sustainable Development Goals.”

Dissemination activities include the publication of a quarterly, Trade Policy and WTO Newsletter, which reviews critical developments in trade and investment policies in the national, regional and multilateral spheres, besides featuring articles on selected subjects relevant to trade policy (the publication was suspended during the last six months but is proposed to resume from the third quarter of 2013).

Issues and Challenges in Food Security for India and the Role of Trade
Project Leader: Dr. Pooja Sharma
Research Team: Deepti Sethi (External Consultant) and Uttara Balakrishnan
Commencement: July 2012
Expected date of completion: August 2013
Funded by: Department of Commerce, Ministry of Commerce & Industry, Government of India (Rs. 28.40 lakh)

The issue of food security has come to the forefront owing to rising food prices and overall food price volatility in recent years. It is also on the agenda of the G20, and is being discussed at various forums including the WTO. The term “food security” finds mention in the WTO Agreement on Agriculture (AoA) and also in the revised agriculture negotiations text (TN/AG/W/4/Rev.4 dated 6 December 2008) being discussed under the ongoing Doha Round of trade negotiations in the WTO.

This study aims to develop a comprehensive understanding of the numerous dimensions of the subject - legal, political and economic from India’s perspective, so as to ensure a holistic, integrated, and effective response at the national and global levels. In this regard, the study attempts a detailed analysis of the different aspects of food security from a trade
perspective. It further addresses the issues and challenges related to food security in the context of the existing trade rules (related to the subject) as well as the modalities being discussed in the ongoing Doha Round negotiations.

**Completed Project (1)**

**Analysis of the Use of Export Restrictions (including Export Taxes) by Selected Countries**

- **Project Leader:** Professor Anwarul Hoda
- **Research Team:** Shravani Prakash (External Consultant)
- **Commencement:** July 2012
- **Completion:** January 2013
- **Funded by:** Ministry of Commerce & Industry, Government of India (Rs. 12.50 lakh)

Rising international commodity prices and the worldwide scarcity of basic foodstuffs since 2008 prompted the widespread use of export restrictions, particularly by developing countries. In this context, it was proposed in the G20 as well as in the WTO that the ability of governments to put export restrictions on foodstuffs should be curtailed. Similar concerns arose with regard to the ability of the WTO members to put export restrictions on non-renewable natural resources to the detriment of the interests of importing countries. There are specific rules in the WTO relating to export restrictions on foodstuffs and natural resources. The idea of the proponents was to make adjustments in these rules so as to make it more difficult for governments to impose such export restricting measures.

With this background, the study analysed worldwide trends and the impact of export restrictions imposed over the last ten years. An inventory of export restrictions on foodstuffs, industrial raw materials and natural resources, applied by the top 30 WTO members, was compiled. The data was analysed to highlight the trends in export restrictions with respect to natural resources and foodstuffs. Further, a comparison was made between developing and developed countries with regard to the adoption of such methods in order to understand the underlying reasons. The impact of these export restrictions on domestic and world prices of foodstuffs was analysed, based on a quantitative and qualitative examination of selected case studies. The study included a literature review of the methodology of the studies that examined the causes of volatility in food prices, such as export restrictions. On the basis of projections of the import requirement of natural resources and an assessment of the need to use export restrictions on essential foodstuffs in future, the study made recommendations regarding India’s stand on export restrictions in future discussions in international forums.

The report, which was submitted in January 2013, was accepted by the Ministry of Commerce & Industry, Government of India.
6. Strategic Aspects of India’s International Economic Relations

Ongoing Projects (2)

ICRIER-Wadhwani Chair in India-US Policy Studies
Project Leader: Ambassador Hemant Krishan Singh
Research Team: Sanjay Pulipaka and Aman Raj Khanna
Commencement: September 2011
Expected date of completion: August 2014
Funded by: Wadhwani Foundation (Rs. 150.00 lakh)

This research programme is designed to promote the strategic potential of India-US relations and accelerate India’s economic development with the following overarching objectives: (i) increase awareness in the US of the Indian perspective on the bilateral agenda of the two nations; (ii) provide an independent platform for public policy discussion and formulation to support the India-US Strategic Partnership; and (iii) advance India’s emergence as a major economy and a strong pillar of the international community in the 21st century.

In pursuit of these objectives, the programme conducts research activities in three broad areas: (i) Economic Acceleration (trade and investment, energy); (ii) Defence and Security; and (iii) Regional and Global Cooperation (broadening Indo-Pacific convergence, building understanding on regional issues).

The programme outputs include: (i) regular policy briefs and research papers; (ii) working group meetings, seminars and international conferences; and (iii) policy reports on key identified issues. The ICRIER-Wadhwani Chair is undertaking research projects in areas that can unlock the potential of India-US trade and investment ties. In partnership with its counterpart, the CSIS Wadhwani Chair in Washington DC, it seeks to create a policy climate that benefits the long-term interests of both.

Strategic Aspects of India’s International Economic Relations: US-India Private Sector Advisory Group
Project Leader: Professor Anwarul Hoda
Research Team: Dr. Pawan Agarwal (External Consultant), Pritha Banerjee and Ranjana Khare
Commencement: 2007
Expected date of completion: Ongoing
Funded by: Department of Commerce, Ministry of Commerce & Industry, Government of India (Rs. 30.00 lakh)

The US-India Private Sector Advisory Group (PSAG) was set up in 2007 as an adjunct to the ministerial level India-US Trade Policy Forum by the Government of India and the Government of the United States. The objective of the PSAG is to provide strategic recommendations and policy insights that generate new initiatives to assist the Trade Policy Forum to strengthen and expand bilateral US-India trade and investment. ICRIER functions as the secretariat. The PSAG Co-Chairs are Dr. Isher Judge Ahluwalia (ICRIER) and Dr. Fred Bergsten (Peterson Institute for International Economics). The other members of the group from India include important representatives of the Federation of Indian Chambers of Commerce and Industry (FICCI), Confederation of Indian Industry (CII), National Association of Software and Services Companies (NASSCOM), Apollo Hospitals, and the National Manufacturing Competitiveness Council (NMCC).
The Trade Policy Forum and the PSAG were active during 2010 and 2011. Three papers were prepared at ICRIER, namely: (i) “Logistics Services in India: Issues and Strategies”; (ii) “Private Sector Participation in Urban Infrastructure: Challenges and Opportunities”; and (iii) “Proposal of the Private Sector Advisory Group for a US-India Technology Trade Agreement.” Based on these papers, a joint report of the Indo-US PSAG was prepared and presented to the Minister of Commerce and Industry, Government of India and to the US Trade Representative in 2011.

Under this project, two meetings of PSAG (India) were held in 2012. In the first meeting, two papers prepared by ICRIER under the PSAG programme were discussed and cleared. These included: (i) “Issues in India’s Education Sector in the light of India-US Economic Relations”; and (ii) “Prospects for India-US Cooperation and Trade in the Agricultural Sector.”

A closed door meeting was held in January 2013, with invitees who were not members of the PSAG, to discuss the long-term strategy for strengthening Indo-US economic relations. For the meeting, ICRIER prepared a consolidated note based on papers prepared by ICRIER, NASSCOM and CII, which later formed the basis of discussions in the closed door meeting of PSAG (India).

Completed Project (1)

ICRIER-SPF Japan Project: Phase II

Project Leader: Ms. Sanjana Joshi
Research Team: Dr. Biswajit Nag, Dr. Pinaki Dasgupta and Dr. Rajeev Anantaram (External Consultants), Isha Dayal
Commencement: April 2012
Completion: March 2013
Funded by: Sasakawa Peace Foundation, (Rs. 50.00 lakh)

The Japan Project at ICRIER, established in 2007 with the support of the Sasakawa Peace Foundation (SPF), Tokyo, completed Phase II. The objective was to promote the Japan Project at ICRIER as a pivot for research initiatives and studies on Japan and Indo-Japanese ties.

Mr. Naoki Oka, Senior Adviser, National Tax Administration (Japan) was a visiting fellow at ICRIER during March 18-29, 2013. His research theme was “Cross-border flows of investments and dispute resolution and prevention in tax matters: Comparative study of India and Japan and lessons for the future.” The comparative study focused on: (i) measures to counteract base erosion and profit shifting arrangements; and (ii) Indian and Japanese measures to resolve and prevent tax disputes, with the intention of drawing some lessons for improvements.

In 2013, two studies were undertaken. The first study titled, “India-Japan CEPA: Firm Specific Collaboration and Strategic Options” was conducted by Dr. Biswajit Nag and Dr. Pinaki Dasgupta, Associate Professors, Indian Institute of Foreign Trade (IIFT). This study tries to gauge the advantages of the India-Japan Comprehensive Economic Partnership Agreement (CEPA) and identify sectors wherein the benefits of trading with Japan lie. Considering that the CEPA encompasses trade in goods, services and FDI, the study also tries to suggest the way forward for Japanese investments in India.

The second study titled, “Prospects for Japanese Investment in the White Goods Sector in India” was undertaken by Dr. Rajeev Anantaram, Professor, International Management Institute (IMI). This study suggests measures that must be undertaken by Japanese firms in order to gain market share in the electronic goods industry in India and “make-up for their lost time” as latecomers. This is pertinent considering that they face competition from various Korean firms, which have a first mover advantage in the white goods sector in India.
7. Environment and Climate Change

Ongoing Projects (2)

Climate Change and the Economic Competitiveness of Cities: Making the Business Case for Adaptation

Project Leader: Professor Meenu Tewari
Research Team: Dr. Saon Ray, Dr. Sahana Roy Chowdhury, Dr. Indro Ray, Dr. Anant Sudarshan (External Consultant), Amrita Goldar, Vidhya Unnikrishnan and Zeba Aziz
Commencement: November 2012
Expected date of completion: October 2014
Funded by: Rockefeller Foundation (Rs.185.00 lakh)

This study deals with two pressing challenges of the 21st century: (i) urbanisation; and (ii) the urgent need for cities to adapt to the risks of climate change. The aim of the study is to understand the conditions that can foster climate resilient and inclusive urban growth. It uses mixed methods to gain policy driven insights on how cities adapt to climate risks based on a comparative case analysis of four rapidly growing secondary cities in India: Surat, Kochi, Pune and Ludhiana.

The study specifically hopes to make a “business case” for motivating greater public and private investment in securing the economic competitiveness of cities in the face of climate risks.

During the first year of the research, the study concentrated on Surat. Based on field visits, data analysis, and an interactive workshop with municipal and other city officials, a set of papers on Surat’s adaptation and resilience strategies are being prepared.

Assessment and Implications of Rationalising Fossil-Fuel Subsidies in India

Project Leader: Ms. Amrita Goldar
Research Team: Swati Saluja
Commencement: April 2013
Expected date of completion: November 2013
Funded by: International Institute for Sustainable Development (IISD) (Rs. 10.8 lakh)

The existing literature shows that fossil-fuel subsidy reforms will lead to increases in the prices of petroleum products and electricity for one or more consumer groups. The study aims to model the impacts of energy subsidy reforms in India. The impact analysis modelling for fossil-fuel based consumer and producer subsidy reforms in India will be done using the Social Accounting Matrix (SAM) framework.

As a first step, a modified SAM with detailed information on petroleum products and electricity sectors will be constructed. This SAM will then be used for analysing a change in the subsidy regime on the directly linked sectors and the entire economy, using tools such as the multiplier and structural path analysis. By maintaining a focus on the distributive impact of reforms on households throughout the analysis, the modified SAM analysis will try to look at the resulting reduction in fuel demand and switching between fuels among different household categories. The impact of increased prices of fossil fuels on electricity generators and the resultant increase in electricity tariffs will also be modelled.
Public Lectures and Discussions

Lecture on “Normalising India-Pakistan Trade Relations” by Dr. Ishrat Husain, Dean and Director, Institute of Business Administration (IBA), Karachi
February 5, 2013

An important component of ICRIER’s recently launched project, *Strengthening Research and Promoting Multi-level Dialogue for Trade Normalisation between India and Pakistan* is the ‘Distinguished Lecture Series’. The objective is to bring internationally renowned experts to put forward their perspectives on India-Pakistan trade normalisation before a wider audience.

The inaugural lecture in this series was delivered by Dr. Ishrat Husain, Dean and Director, Institute of Business Administration, Karachi and former Governor, State Bank of Pakistan, on February 5, 2013 in New Delhi. The initial guest remarks were made by Mr. Salman Bashir, High Commissioner of Pakistan to India. The lecture was followed by a panel discussion moderated by Dr. Isher Judge Ahluwalia, Chairperson, ICRIER. The panelists included Mr. Sunil Munjal, Joint Managing Director, Hero MotoCorp and member India-Pakistan Forum at CII, and Dr. Surjit Bhalla, Chairman, Oxus Investments.

Dr. Husain stated that intransigence between India and Pakistan has impeded intra-regional trade flows within South Asia and, consequently, the region remains the least integrated region of the world. While welcoming the healthy developments in the past one year in resuming better bilateral trade relations, he emphasised that both India and
Pakistan need to carefully delineate the path to normalisation with due sensitivity and care for the atmospherics and narratives in both countries. He stressed the need for developing an enduring, uninterruptible and long-term relationship through better trade facilitation, visa liberalisation, people to people contact, banking presence, telecommunication links, investment promotion, and cultural, educational and scientific exchange. He also pointed out that there was consensus among all major political parties in Pakistan on the need to continue trade normalisation with India. Dr. Husain’s key message was that both countries must continue to engage in dialogue and conversation even in times of exogenous shocks, political difficulties, crisis or misunderstanding. In this context, he felt that ICRIER’s project had the potential to play an important role in bringing together research communities and experts in the two countries and developing mutual understanding.

The lecture was attended by over 150 people who included senior members from the policy establishment, well-known scholars and experts as well as several industry representatives. The lecture was widely covered by the media.
Conferences and Workshops

Conferences

Strategic and Economic Capacity Building Programme: Stakeholders’ Conference
July 30, 2012

The Strategic and Economic Capacity Building Programme (SECP) at ICRIER focused on South Asia’s increasing need for research and capacity building in formulating the region’s policy stance on strategic and economic international relations. To conclude the programme, a Stakeholders’ Conference with domestic and international participation was held on July 30, 2012 in New Delhi. The keynote address was delivered by Mr. Shiv Shankar Menon, National Security Adviser, Government of India.

The conference covered four sessions: (i) Strategic and Security Issues; (ii) Sustainable Development, Infrastructure and Population; (iii) South Asian Trade and Economy; and (iv) Soft Power Ideologies. The sessions were chaired by Mr. Kanwal Sibal, Former Foreign Secretary, India, Dr. R. K. Pachauri, Director General, The Energy Research Institute, Mr. Shahid Javed Burki, former Finance Minister, Pakistan, and Dr. Robert Bradnock, Visiting Senior Research Fellow, King’s College, London. Ambassador Santosh Kumar was the Project Leader.

Capacity Building and Knowledge Dissemination on Urbanisation in India: Preparing for the Urban Challenges of the 21st Century
August 31, 2012

The inaugural address was delivered by Mr. Kamal Nath, Union Minister for Urban Development, Government of India. The session was chaired by Mr. Arun Maira, Member, Planning Commission. Dr. Isher Judge Ahluwalia, Chairperson ICRIER, introduced the themes of this programme. These included: urban planning, transit-oriented development, municipal finance, water and sanitation, governance reforms, e-governance, unlocking the value of urban land and sustainable project management.

The next session was chaired by Dr. Sudhir Krishna, Secretary, Ministry of Urban Development, Government of India. It focused on the theme of unlocking the value of urban land. Mr. Navin Mittal, Special Commissioner, Greater
Hyderabad Municipal Corporation, presented the case of Hyderabad’s Outer Ring Road as one of the pioneering examples of unlocking land value. Dr. P. K. Mohanty, Mission Director, Ministry of Housing and Urban Poverty Alleviation, Government of India and Mr. I. P. Gautam Principal Secretary, Urban Development and Housing, Gujarat shared key insights on the importance of spatial planning for sustainable urban development. The session on land use and urban transport was chaired by Mr. B. I. Singal, Director General, Institute of Urban Transport, New Delhi. In this session, the speakers, Mr. S.P.S. Parihar, Principal Secretary, Urban Development, Madhya Pradesh and Professor Shivanand Swamy, Center for Environmental Planning and Technology (CEPT), Ahmedabad discussed how urban planning should be integrated with transport and shared examples from Madhya Pradesh and Gujarat, respectively.

**Global Economic Cooperation: Views from G20 Countries**

October 7-9, 2012

ICRIER along with the Asian Development Bank Institute (ADBI), Department of Economic Affairs (DEA, MoF), International Monetary Fund (IMF) and Konrad-Adenauer-Stiftung hosted its fourth G20 conference from October 7-9, 2012 in New Delhi. The objective of the conference was to bring together academicians and key policymakers from G20 countries and International Financial Institutions (IFIs) to deliberate on a range of issues. The discussion was centred around six principal topics which included: (i) The Euro-zone Crisis: Short-Run Challenges and Options; (ii) Global Imbalances and their Consequences: Past, Present and Future; (iii) Financial Regulatory Reforms: Not Far Enough or Overkill? (iv) Reforming the International Monetary System (IMS): The Need for a New Framework; (v) A Macroeconomic Policy Agenda for EMEs: What does Research Tell Us? and (vi) Austerity, Growth and Public Policy.

The inaugural lecture was delivered by Dr. Montek Singh Ahluwalia, Deputy Chairman, Planning Commission. The other speakers included: Dr. Subir Gokarn, Deputy Governor, RBI, Mr. Vadim B. Lukov, Ambassador-at-Large, Coordinator of the Ministry of Foreign Affairs of the Russian Federation on G20 and BRICS, Mr. Pierre Jacquet, President, Global Development Network, Mr. Onno Ruhl, Country Director, World Bank, India, Mr. Anand Sinha, Deputy Governor, RBI, Mr. Jae-ha Park, Deputy Dean, ADBI, Dr. Bimal Jalan, former Governor, RBI and Dr. Shankar Acharya, Honorary Professor, ICRIER.
The participants were of the view that the G20 has played a major role in coordinating macroeconomic policies to revive the world economy, and its role as a coordination mechanism is likely to be crucial in the years to come. As the premier forum for international cooperation on the most important aspects of the international economic and financial agenda, its objective is: (i) policy coordination among its members in order to strengthen financial regulations; (ii) reduce systemic risks; (iii) prevent future financial crises; (iv) reform the prevailing international financial architecture; and (iv) achieve global economic stability and sustainable growth using, as a basis, nine clearly identified development pillars. Its focus, therefore, is on bringing clarity in these important new issues of concern while continuing the dialogue on the issues of stabilisation and rebalancing thrown up by the economic crisis. The participants felt that the G20 would be relevant only if it endorses the mission of other international organisations’ initiatives rather than setting out to accomplish everything on its own.

7th Annual IZA and World Bank Conference on Employment and Development
November 5-7, 2012

In order to stimulate and promote research on employment and labour economics in low and middle income countries, the World Bank and IZA in partnership with ICRIER and Delhi University organised a conference on “Employment and Development” during November 5-7, 2012. The special theme of this year’s conference was “Youth Employment and Entrepreneurship.” The keynote address was delivered by Dr. Kaushik Basu, Chief Economist and Senior Vice President, World Bank. Other notable speakers were: Dr. Klaus F. Zimmermann, Director, IZA, Dr. Arup Banerji,
Director, World Bank, Dr. Shankar Acharya, Honorary Professor, ICRIER, Dr. Ashwini Deshpande, Professor, Delhi School of Economics, Dr. Pronab Sen, Country Director, International Growth Centre and Dr. David A. Robalino, World Bank and IZA.

The conference provided an opportunity for discussion on issues pertaining to the: (i) design of social assistance and social insurance policies and their role in promoting human capital investment and improving labour market outcomes especially among disadvantaged youth; (ii) design of vocational education and training programmes to promote higher employability and productivity for youth; (iii) design of activation and active labour market policies for youth; (iv) role of labour market policy and institutions in alleviating the constraints to the creation of productive and rewarding jobs for youth; (v) challenges young entrepreneurs are facing; and (vi) role of the regulatory framework, entrepreneurial education and business assistance.

The Changing Paradigm of India-Japan Relations
December 17-18, 2012

In order to mark 60 years of diplomatic relations between India and Japan, an international conference on “The Changing Paradigm of India-Japan Relations” was organised in New Delhi, during December 17-18, 2012. The conference was structured around four themes: (a) India-Japan Strategic Partnership; (b) Regional Dimensions of India-Japan Relations; (c) India-Japan Bilateral Economic Cooperation; and (d) The Future Outlook for India-Japan Relations.

The keynote address was delivered by Mr. Salman Khurshid, Minister for External Affairs, Government of India. The other speakers at the conference included Mr. Yuji Takagi, President, Sasakawa Peace Foundation, Mr. Takeshi Yagi, Ambassador of Japan, India, Mr. Hiroshi Watanabe, CEO and Executive MD, Japan Bank for International Cooperation (JBIC), Dr. Tomohiko Taniguchi, Visiting Professor, Meiji University, Dr. C. Raja Mohan, Distinguished Fellow, Observer Research Foundation (ORF), Mr. Toshiro Nishizawa, Director General, Country Credit Department, JBIC, Dr. Shujiro Urata, Professor, Waseda University, Dr. Sanjaya Baru, Director for Geo-economics and Strategy, International Institute for Strategic Studies (IISS), and Mr. Amitabh Kant, CEO and MD, Delhi Mumbai Industrial Corridor Development Corporation (DMICDC).

The conference deliberated on: (i) the changing paradigm of India-Japan relations; (ii) how they have evolved over the years in the bilateral as well as regional context; and (iii) prospective future engagements in sectors such as IT, healthcare, tourism and scientific innovation along with defence and national and regional security. The participants were
of the view that over the past several years, there has been an attempt to evolve a shared approach and understanding to reinforce bilateral cooperation and to build a strategic and global partnership between the two countries. With the Comprehensive Economic Partnership Agreement (CEPA) signed in August 2011, there is a strong base for carrying this partnership forward.

**Emerging Asia: Track 1.5 India-US**

February 19, 2013

The ICRIER-Wadhwani Chair’s first international conference held on February 19, 2013 in New Delhi brought together senior officials, strategists, economists, military and regional integration experts to discuss India’s “Look East Policy” and the US “pivot” or rebalance towards Asia in a Track 1.5 format. The event was a collaborative effort of the ICRIER-Wadhwani US Chair with its counterpart CSIS-Wadhwani India Chair and the CSIS Sumitro Chair for Southeast Asia Studies, with participation and support from the Ministry of External Affairs, Government of India and the US Department of State.

The keynote address was delivered by Mr. Shyam Saran, former Foreign Secretary, Government of India. The other participants included Ambassador H. K. Singh, Chair Professor, ICRIER, Ambassador Karl F. Inderfurth, Senior Adviser and Wadhwani Chair in US-India Policy Studies (CSIS), Mr. Ernie Bower, Senior Adviser and CSIS Sumitro Chair for Southeast Asia Studies, Ambassador Ronen Sen, former Ambassador to the US, Ambassador C. R. Gharekhan, former Permanent Representative of India to the United Nations, Dr. C. Raja Mohan, Distinguished Fellow, ORF, Mr. Pinak Chakravarty, Secretary (Economic Relations), Ministry of External Affairs (MEA), Government of India, Mr. Gautam Bambawale, Joint Secretary (East Asia), MEA, Government of India, Dr. Ted Osius, Senior State Department Visiting Fellow, CSIS Sumitro Chair for Southeast Asia Studies and Wadhwani Chair in US-India Policy Studies (CSIS), Ms. Persis Khambatta, Fellow, Wadhwani Chair in US-India Policy Studies (CSIS), Ambassador David L. Carden, US Ambassador to the ASEAN, Dr. Alyssa Ayres, Deputy Assistant Secretary for South and Central Asia, US Department of State, Mr. Walter Douglas, Minister-Counsellor for Public Diplomacy, Embassy of the United States of America, New Delhi, Mr. Farooq Sobhan, former High Commissioner of Bangladesh to India and Professor Fukunari Kimura, Chief Economist, Economic Research Institute for ASEAN and East Asia (ERIA).

The participants stressed the need for all stakeholders with shared interests in the region to identify areas of convergence and explore the possibility of enhanced collaboration between India, ASEAN and the US in shaping the region’s evolving
security architecture and economic integration. The conference resulted in two policy reports titled, “Asia’s Arc of Advantage: India, ASEAN and the US – Shaping Asian Architecture” and “Enhancing India-ASEAN Connectivity,” published by ICRIER and CSIS, respectively in 2013.

**Normalising India-Pakistan Trade**

March 14-15, 2013

As part of ICRIER’s project on Strengthening Research and Promoting Multi-level Dialogue for Trade Normalisation between India and Pakistan, the first annual conference, “Normalising India-Pakistan Trade Relations” was held on March 14-15, 2013 in New Delhi. The inaugural address was delivered by Mr. Pawan Kumar Bansal, Union Minister for Railways, Government of India. Special addresses were delivered by Dr. Salman Shah, former Finance Minister, Pakistan and Mr. S. R. Rao, Commerce Secretary, Government of India. The participants included members of the Indian Parliament Mr. N. K. Singh, and Mr. Mani Shankar Aiyar, Mr. Rajeev Kher, Additional Secretary, Ministry of Commerce & Industry, Government of India, Dr. Hafiz Ahmed Pasha, Dean, Beaconhouse National University, Lahore and former Commerce Minister, Pakistan, Dr. Manzoor Ahmad, Senior Fellow, International Centre for Trade and Sustainable Development, Geneva, Dr. Sanjay Kathuria, Lead Economist, Regional Integration, World Bank, Dr. Vaqar Ahmed, Deputy Executive Director, Sustainable Development Policy Institute (SDPI), Islamabad, and Dr. Sanjaya Baru, Director for Geo-economics and Strategy, IISS, New Delhi.
The conference deliberations were structured in five sessions: (i) Expansion of trade in goods; (ii) Barriers to trade; (iii) Trade perception survey; (iv) Sector studies focusing on energy, textiles and sports goods; and (v) Trade in services and FDI. Papers were presented on preliminary first year findings of the trade perception surveys conducted in India and Pakistan on the estimation of trade potential between the two countries and on regional integration of supply chains. It was highlighted that barriers to trade, especially non-tariff barriers between India and Pakistan must be identified and overcome. Trade in agriculture, automobiles, textiles and the energy sector needs to be encouraged to exploit the trade potential between the two countries. The conference also identified several areas of mutual interest and potential collaboration between India and Pakistan. It ended with a panel discussion on “India-Pakistan Trade: The Way Forward.”

**Fiscal Policy Achievements and Challenges in Asia: Implications for India**
May 6, 2013

The conference, “Fiscal Policy Achievements and Challenges in Asia: Implications for India” was jointly organised by ICRIER and IMF on May 6, 2013 in New Delhi to consider fiscal policies across the region over the past decade, with an emphasis on subsidy reform. The highlights of the *Spring 2013 Asia Pacific Regional Economic Outlook* from the IMF were also presented at the conference.

The first session titled, “Fiscal Policy in Asia: Dampening Cyclical Fluctuations and Increasing Space to Support Inclusive Growth” discussed policy achievements across Asia over the past decade as well as the challenges that remain. It was pointed out that over the past decade fiscal policy in many Asian economies has become more successful in dampening output fluctuations. Nevertheless, key fiscal policy reforms remain a priority to foster income redistribution and support economic rebalancing. In several countries, government revenues remain low due to widespread exemptions and the tax structure is not growth-friendly. There also appears to be a need to improve the composition of public expenditure where spending on education, social safety nets and infrastructure need to be raised partly by gradually replacing generalised subsidies by better targeted measures, such as direct cash transfers. In the second session titled, “Subsidy Reform: Lessons and Implications,” an overview of the magnitude of energy subsidies worldwide was presented and subsequently the reform experiences and challenges were discussed. The discussions pointed out that energy subsidies remain sizable and impose substantial fiscal costs in developing and emerging economies from most regions. They also produce adverse environmental, social and macroeconomic effects, including the crowding out of growth-enhancing public spending. Based on the experience of 28 major energy subsidy reform episodes across the globe, lessons on “how to do” successful reforms were identified. The session also discussed the fiscal and welfare implications of fuel subsidy reforms in India.
Indian Tax Administration: A Dialogue
June 24-25, 2013

ICRIER organised the conference on “Indian Tax Administration: A Dialogue” on June 24-25, 2013 in New Delhi to disseminate the findings of the study on “Advancements in Tax Administration: Lessons and Experiences of UK, Brazil and India.” This was the first research project to start a dialogue between tax officials and tax payers in India through consultation meetings and discussion forums held across five metros. Presenting successful models from the finest administrations across the globe, the conference aimed to compose a veritable picture of tax administration reforms that policymakers in India could consider. Approximately 70 participants including serving and retired tax revenue officers, lawyers and chartered accountants from eminent firms, industry representatives and academics attended the conference. The conference discussions focused on the administrative challenges facing India as it contemplates tax reforms, including a detailed analysis of the organisational structure, risk assessment and management in audit selection along with the procedure of dispute resolution and computerisation in both direct and indirect tax administrations. At the conference, the findings of an investigation into the newly established large taxpayer units (LTU) at the central level for large enterprises and a statistical study of the effectiveness of value added taxes of state-level administrations were also presented.
Workshops

Second Workshop on Productivity Study
April 26, 2012

The Second Annual India KLEMS Productivity Workshop was organised on April 26, 2012 in New Delhi. Dr. K.L. Krishna, Retired Professor, Delhi School of Economics, presented the project overview and Dr. Isher Judge Ahluwalia, Chairperson, ICRIER made the introductory remarks. The workshop was divided into two sessions: (i) Construction of Gross Output and Intermediate Input Series; and (ii) Productivity Estimates for Sectors in the Indian Economy.

The first session was chaired by Professor T.C.A. Anant, Chief Statistician of India and Secretary, National Statistical Commission and presentations were made by Ms. Sreerupa Sengupta and Ms. Kuhelika De, Research Assistants, ICRIER. This was followed by a discussion on gross output and intermediate input series estimates with Mr. S. K. Das, Director General, Central Statistics Office, Government of India and Mr. G. C. Manna, DDG, Central Statistics Office. The second session was chaired by Dr. Aditya Bhattacharjeya, Professor, Delhi School of Economics and presentations were made by Dr. B. N. Goldar, Professor, Institute of Economic Growth, Delhi, Dr. Deb Kusum Das, External Consultant, ICRIER, and Dr. Suresh Aggarwal, Professor, University of Delhi. This was followed by a discussion on productivity estimates in the Indian economy with Dr. Simrit Kaur, Professor, Faculty of Management Studies, University of Delhi, Dr. Laveesh Bhandari, Director, Indicus Analytics, and Dr. Sandip Sarkar, Senior Fellow, Institute for Human Development, New Delhi.

Growth Models and Policy Processes in India and China
June 22, 2012

ICRIER organised a workshop in collaboration with the Fung Global Institute (FGI), Hong Kong and the World Bank on June 22, 2012 in New Delhi. The workshop covered four major themes: (i) Growth Models; (ii) Policy Processes; (iii) Agriculture; and (iv) Urbanisation and Sustainability. The session on growth models focused on the key characteristics of traditional growth models in China and India and the strengths and downsides of each country’s model in terms of policy and outcomes. The session on policy processes addressed the issue of policy formulation and implementation in China and India. The session on agriculture addressed the nature of agricultural reforms in India and China and the important lessons that both can learn from each other. The final session on urbanisation and
sustainability focused on the policy frameworks required for managing urbanisation in a sustainable way in China and India.

The opening remarks at the workshop were made by Dr. Isher Judge Ahluwalia, Chairperson, ICRIER, Dr. Parthasarathi Shome, Director & CE, ICRIER, Dr. Geng Xiao, Director of Research, FGI, and Dr. Roberto Zagha, Country Director, World Bank, India. The other speakers included Dr. Surjit Bhalla, Chairman, Oxus Investments, Dr. N.R. Bhanumurthy, Professor, National Institute of Public Finance and Policy, Dr. Louis Kuijs, Project Director, FGI, and Dr. Pronab Sen, former Principal Adviser, Planning Commission.

Regional Capacity Building and Knowledge Dissemination Workshop with focus on Urban Governance
October 11, 2012

The first Regional Capacity Building and Knowledge Dissemination Workshop under ICRIER’s Programme on Urbanisation in India was held in Bhopal on October 11, 2012. The focus of the workshop was e-Governance. The participating cities were from Madhya Pradesh, Chhattisgarh, Maharashtra and Gujarat.

Mr. Babulal Gaur, Minister of Urban Administration and Development Department, Madhya Pradesh, addressed the inaugural session. Dr. Isher Judge Ahluwalia made the opening remarks, followed by a presentation of the HPEC (Ahluwalia, 2011) Report. The presentations by the participating states focused on the use of ICT for efficient delivery of public services. The mobile governance initiative of Surat, e-procurement of public goods and services in Raipur, and the electronic redressal of citizens’ grievances in Navi Mumbai, were some of the good practices that were shared. The feasibility of public-private partnerships in improving service delivery was also discussed. The workshop concluded with a dialogue on the importance of administrative reforms including the setting up of municipal cadres in enhancing the effectiveness of e-Governance.

Regional Capacity Building and Knowledge Dissemination Workshop on the Challenges of Urbanisation with focus on Governance
November 5-6, 2012

The second Regional Capacity Building and Knowledge Dissemination Workshop was held in Hyderabad in partnership with the Administrative Staff College of India, during November 5-6, 2012. The focus of the workshop was urban
governance, and the participating cities were from Andhra Pradesh, Karnataka, Kerala, Maharashtra, Tamil Nadu, and Puducherry.

The inaugural session was addressed by Mr. Nallari Kiran Kumar Reddy, Chief Minister, Andhra Pradesh. The urban team presented the findings and recommendations of the HPEC (Ahluwalia, 2011) Report. The presentations on the first day covered the themes of water reforms in Mumbai, solid waste management in Puducherry, municipal finance in Kerala, GIS-based property tax reform in Bengaluru, and financial sector innovations for urban development in Tamil Nadu. The challenges of service delivery to the urban poor in Andhra Pradesh were also discussed. Among the speakers were Ms. Anita Ramachandran, Head, Mission for Elimination of Poverty in Municipal Areas (MEPMA), Andhra Pradesh, Mr. R. B. Bambale, Deputy Municipal Commissioner, Greater Mumbai, Thiru S. Rajamanickam, Commissioner, Puducherry, Dr. Radhakrishnan Kurup, Joint Director, Urban Affairs, Kerala, Mr. K. R. Niranjan, Special Commissioner, and Mrs. Anita Praveen, Managing Director, Tamil Nadu Urban Infrastructure Financial Services Ltd. (TNUIFSL).

Ms. Minnie Mathew, Chief Secretary, Andhra Pradesh, identified the importance of maintaining infrastructure assets in good condition and the need to decongest cities to make them liveable. Mr. Sam Bob, Principal Secretary, Urban Development, Andhra Pradesh emphasised the importance of cities as engines of growth, and the role of e-Governance in improving the standards of service delivery in India. Mr. Anoop Singh, Special Secretary, Department of IT and Communications, Andhra Pradesh, Mr. Ramesh Babu, Municipal Commissioner, Hyderabad, and Mr. C. Vijayaraj Kumar, Additional Commissioner, Corporation of Chennai, showcased some good practices in their cities that leveraged technology for efficient service delivery.

Strengthening Textiles and Clothing Sector in South Asia
November 16, 2012

As part of a study funded by ADB, ICRIER organised a workshop, “Strengthening Textiles and Clothing Sector in South Asia” on November 16, 2012 in New Delhi. The workshop commenced with remarks by Ms. Kavita Iyengar, Economist, ADB, on the textile and clothing sector in South Asia, followed by a brief introduction to the study by Dr. Nisha Taneja, Professor, ICRIER.

The second session of the workshop was devoted to presentations by foreign participants and the in-house team on the textiles and clothing sector in different South Asian countries. Mr. Khalid Mahmood, Director, Centre for Enterprise, Trade and Development (CEETAD), Lahore spoke about the growing clothing sector in Pakistan and pointed out the
changing nature of the organisation of production. Mr. Paras Kharel, Research Coordinator, South Asia Watch on Trade, Economics and Environment (SAWTEE), Kathmandu pointed out the weakening of the clothing sector in Nepal after the phasing out of the MFA and highlighted new avenues for future growth in the sector. Dr. Khondaker Golam Moazzem, Additional Director Research, Centre for Policy Dialogue (CPD), Dhaka made a presentation on the growth of the clothing sector in Bangladesh and the successful integration with the global value chain and stressed the need for greater regional integration. Ms. Ashani Abayasekara, Research Assistant, Institute of Policy Studies (IPS), Colombo highlighted the importance of the policy regime which shaped the clothing sector in Sri Lanka and specified the challenges that the industry faces today. Dr. Saon Ray, Senior Fellow, ICRIER discussed the importance of government policies that shaped the clothing sector in India and mentioned different ways in which the sector has integrated into various value chains. The workshop concluded with closing remarks by Dr. Nisha Taneja.

India’s Macroeconomic Outlook and Prospects for India-Japan Cooperation
December 14, 2012

This workshop, jointly organised by ICRIER and JBIC, was held on December 14, 2012 in New Delhi. Presentations were made by Mr. Toshiro Nishizawa, Director General, JBIC and Mr. Ichiro Hayashidani, Director (Asia and Oceania), JBIC. Mr. Nishizawa presented JBIC’s views on the Indian economy and key policy issues. He discussed the causes of current stagflation, steps to reduce the deficit, and JBIC’s role in developing India’s financial and investment environment for the next few years. Mr. Hayashidani, in his presentation, “Is the Economy Turning Around?” drew comparisons between the Indian economy’s performance pre-2008 sub-prime crisis and post-crisis period. He acknowledged that the Indian economy is more resilient than other Asian countries to external shocks due to high domestic demand and expanding revenue expenditure and consumption in rural areas on account of the government’s rural enactments and policies.

The presentations were followed by a discussion on the key issues of infrastructure and investment. It was suggested that JBIC should: (i) explore the public-private partnership model in infrastructure development; (ii) consider investing in lower ranked states like Chhattisgarh and Jharkhand that are rich in natural resources; and (iii) focus on the quality rather than just the quantity of infrastructure created.

Regional Capacity Building and Knowledge Dissemination Workshop on Service Delivery of Water and Sanitation: Challenges faced by Metropolitan Cities
February 6, 2013

The third Regional Capacity Building and Knowledge Dissemination Workshop was held in New Delhi on February 6, 2013. It focused on the challenges faced by metropolitan cities in delivering water and sanitation. The participating cities included Delhi, Kolkata, Chennai, Mumbai, Bengaluru, Pune, Surat, Hyderabad, Ahmedabad, and Jaipur.

The opening remarks by Dr. Isher Judge Ahluwalia were followed by a presentation by Ms. Debashree Mukherjee, CEO, Delhi Jal Board. Ms. Malini Shankar, former Principal Secretary, Water and Sanitation, Maharashtra, shared the experience of the Maharashtra Sujal Nirmal Abhiyan, a state-wide campaign for improving water and sanitation services. Engineers from a number of ULBs and several water and sanitation boards presented their successful initiatives and discussed the challenges that their cities face.
The discussions focused on the water and sanitation scenario in different states in general and the strategies to manage the rapidly increasing demand for water, given the limited supply of water, in particular. The participants also examined ongoing programmes to achieve 24x7 supply of water. The importance of water conservation and reduction of water losses emerged as the major challenges facing the ULBs.

Regional Capacity Building and Knowledge Dissemination on Urbanisation in India: Challenges of delivering Water and Sanitation Services in Urban India
February 20, 2013

The fourth Regional Capacity Building and Knowledge Dissemination Workshop was held in Chandigarh in partnership with CII on February 20, 2013. The focus of the workshop was on challenges in service delivery of water and sanitation in urban India. The participating cities were from Punjab, Haryana, Uttar Pradesh, and the National Capital Region of Delhi and Union Territory of Chandigarh.

The inaugural session was addressed by the Chief Minister of Haryana, Mr. Bhupinder Singh Hooda. Dr. Isher Judge Ahluwalia initiated the discussion with an overview of the state of service delivery in Indian cities. The urban team presented the findings and recommendations of the HPEC (Ahluwalia, 2011) Report.
Thematic presentations were made by Mr. Suresh Kumar Nangia, Principal Secretary, Water and Sanitation, Punjab, Mr. Rakesh Verma, Municipal Commissioner, Ludhiana, and Ms. Nandini Palwal, Additional CEO, Delhi Jal Board, among others. The discussions that followed shed light on some initiatives to improve the standards of delivery, for example, the use of IT to improve billing and collection systems by the Delhi Jal Board, 100% treatment of waste water and partial reuse of treated water for irrigation of public parks by Chandigarh.

**Capacity Building Workshop on Climate Risks and Urban Competitiveness**  
March 14, 2013

The first Capacity Building Workshop under the ICRIER-HUDCO Chair Project was held in Surat on March 14, 2013. Its theme was climate risks and urban competitiveness, targeted at municipal and public officials in Surat as well as other stakeholders.

The workshop had two sessions. In the first session, Prof. Meenu Tewari gave an overview of the ongoing ICRIER project on “Climate Change and the Economic Competitiveness of Cities” funded by the Rockefeller Foundation. The presentation focused on: (i) the need to safeguard cities against the risks of climate change; and (ii) a general comparative overview of three cities, namely, Surat, Kochi and Pune on aspects such as industrial structure, infrastructure, municipal capacity, and climate projections. Mr. Kamlesh, Secretary, Surat Climate Change Trust and President, Southern Gujarat Chamber of Commerce and Industry gave a brief overview of Surat’s efforts on climate change adaptation. The second session was planned as a breakout enabling small interactive group discussions with municipal officers and other stakeholders around a structured set of questions dealing with Surat’s development, climate change adaptation experiences, perceptions, achievements and future plans.

**Economic Reforms and India-Japan Partnership for Mutual Benefit**  
March 18, 2013

The third Annual ICRIER-PRI Workshop was organised by ICRIER in collaboration with the Policy Research Institute (PRI), Ministry of Finance, Japan on March 18, 2013 in New Delhi. The inaugural remarks were made by Dr. Parthasarathi Shome, Adviser to the Finance Minister, Government of India. The guest speakers included Mr. Nobumitsu Hayashi, President, PRI, Mr. Shin Oya, Chief Representative, JBIC, Mr. Hisao Nakajima, President/Director, Nomura Research, Dr. Chetan Ghate, RBI Chair Professor, ICRIER, Dr. Partha Chatterjee, Assistant Professor, Faculty of Management Studies, New Delhi, Ambassador H.K. Singh, Chair Professor, ICRIER, Dr. Pronab Sen,
Country Director, International Growth Centre, New Delhi, Mr. Ajay Shankar, Member Secretary, NMCC, Government of India and Mr. Anwarul Hoda, Professor, ICRIER.

The workshop stressed on the need for comprehensive economic partnership between India and Japan. India’s economic reforms and the fiscal stance that India has adopted since the global financial crisis were also discussed. The Japanese participants were of the opinion that India’s fiscal policy needed to change in view of recent global changes and domestic inflationary conditions. The rapidly increasing current account deficit was seen as a cause of concern for India. However, in case of Japan, deflation was the primary concern for the Japanese government. It was suggested that in order to attract greater foreign investment, the Indian economy should: (i) become more competitive and attractive; (ii) have better infrastructure (transport and logistics); and (iii) have well-defined labour laws and taxation system.

**Regional Knowledge Dissemination and Capacity Building Workshop on Urbanisation with focus on Solid Waste Management**
April 29-30, 2013

The fifth Regional Knowledge Dissemination and Capacity Building Workshop on Urbanisation with focus on Solid Waste Management in India was held in Guwahati during April 29-30, 2013. The special focus of the workshop was on the North Eastern states. The participating cities were from Assam, Sikkim, Manipur, Meghalaya, Mizoram, Nagaland, Tripura and Arunachal Pradesh.

Mr. Tarun Gogoi, Chief Minister, Assam was the Chief Guest at the inaugural session. This session presented good practices in community participation in decentralised composting and other innovations in managing municipal solid waste. The discussions focused on the applicability of the lessons learnt from Pune and Pammal to the North Eastern states. In the subsequent sessions, the participants from the eight states shared the challenges they faced in collection, transportation and disposal of municipal waste.

**Regional Capacity Building and Knowledge Dissemination Workshop on preparing for the Urban Challenges of the 21st Century with focus on Sustainable Cities**
June 17-18, 2013

The sixth Regional Capacity Building and Knowledge Dissemination Workshop on preparing for Urban Challenges of the 21st Century” was organised in partnership with Bharati Vidyapeeth Institute for Environmental Education and
Research (BVIEER) in Pune during June 17-18, 2013. The focus was on sustainable cities. The participating cities were from Maharashtra, Gujarat and Goa.

A distinguishing feature of this workshop was a special lecture on “Sustainable Urbanisation” by Mr. Montek Singh Ahluwalia, Deputy Chairman, Planning Commission. In his address Mr. Prithviraj Chavan, Chief Minister, Maharashtra and Chief Guest at the session, highlighted the challenges of urban sustainability in Maharashtra.

The presentations at the workshop were based on themes such as water demand management, urban waste management, urban planning and environmental sustainability. Ms Malini Shankar, Principal Secretary, Water Resources Management, Maharashtra, presented the highlights of the state-led reform programme for improving the delivery of water and sanitation in Maharashtra. The representatives from Rajkot, Surat, Pune and Goa shared their experiences in managing solid waste and sewerage in their cities. Innovations in urban planning, such as town planning schemes, were presented by the participating cities. The discussion on the need for preserving urban biodiversity in the concluding session of the workshop was led by Dr. Erach Bharucha and his team from BVIEER.
Seminars

India-US Economic Partnership: Bilateral Investment Treaty and Beyond
May 1, 2012

As part of the Eminent Speakers Series under the ICRIER-Wadhwani Chair in India-US Policy Studies, a background seminar was delivered by Dr. Rahul Khullar, Commerce Secretary, Government of India on May 1, 2012.

Dr. Khullar outlined the recent pattern of India-US bilateral trade and investment and assessed the prospects for a Bilateral Investment Treaty (BIT) and Bilateral Investment Promotion and Protection Agreement (BIPA). He pointed out that India’s trade with the US has declined as a proportion of India’s global trade and the American share in FDI inflows into India has also come down in comparison to other countries. According to Dr. Khullar, the BIT had the potential to pave the way for greater trade and investment between the two countries. However, this would have to await an ongoing review of India’s overall BIT strategy, given recent experiences. Looking ahead, he also shared the assessments of India’s existing CEPAs/FTAs with ASEAN and Japan.

Urbanisation and the Competitiveness of Cities
May 17, 2012

The newly launched ICRIER-HUDCO Seminar Series on “Urbanisation and the Competitiveness of Cities” aims to enable innovative policy-oriented research for wider discussion and dissemination among researchers, policymakers, and urban practitioners with the objective of drawing insights from ongoing research for urban policy and practice.

The inaugural seminar was delivered by Dr. Ejaz Ghani, Economic Adviser, World Bank, on the theme, “Is India’s Manufacturing Sector moving out of Cities?” on May 17, 2012 at ICRIER, New Delhi. Dr. Isher Judge Ahluwalia, Chairperson, ICRIER and Dr. A.N. Krishnamurthy, Executive Director, Training, HUDCO, jointly chaired the seminar. Two distinguished guests, Mr. Ajay Shankar, Member Secretary, NMCC and Dr. John Blomquist, Senior Economist, Social Protection Unit, World Bank, led the discussion.

India’s IT Industry in the 21st Century: Vanguard of the Services Export Revolution
June 14, 2012

As part of the ICRIER-KAS Quarterly Seminar Series, Mr. Som Mittal, President, NASSCOM, made a presentation on the theme, “India’s IT Industry in the 21st Century: Vanguard of the Services Export Revolution” on July 14, 2012 at ICRIER, New Delhi. Dr. Shankar Acharya, Honorary Professor and Member, Board of Governors, ICRIER chaired the seminar and Mr. Anwarul Hoda, Professor, ICRIER, was the lead discussant.

Mr. Som Mittal focused on the performance and contribution of the IT sector to India’s economic growth. He highlighted NASSCOM’s role in facilitating this growth in terms of employment generation, IT infrastructure development, technological upgradation, enhancing global outreach, and higher research and development spend, among others. He pointed out the immense potential in the IT industry and that Indian IT firms are successfully penetrating markets in Latin America and the Middle East. According to him, even though India faces competition from emerging economies, which are replicating its processes and models, India will continue to retain its position, given its low-cost advantage. It was highlighted that the key policy and institutional challenges that paralyse growth include absence of brand India, immigration and regulatory barriers, skill shortages and lack of fiscal support for new market development.
Enhancing India-EU Bilateral Trade, Investment and Collaboration in Services
July 6, 2012

The stakeholder consultation on “Enhancing India-EU Bilateral Trade, Investment and Collaboration in Services” was organised by ICRIER in collaboration with FICCI and KAS on July 6, 2012 in New Delhi. This was a part of ICRIER’s ongoing project supported by KAS that aims to provide inputs to the current India-EU Bilateral Trade and Investment Agreement negotiations.

The discussions focused on five sectors: retail, energy, logistics, IT/ITeS services and professional services. The presentation on the primary survey findings by ICRIER researchers was followed by a panel discussion between industry and sector experts. The issues discussed included: (i) potential areas of trade and investment; (ii) measures to enhance trade and collaborations; and (iii) barriers to trade and investment and how these can be addressed through domestic reforms and trade negotiations. The key inputs from the stakeholders’ consultation will be incorporated in the final project report.

India on the Move: Modernising Infrastructure to meet India’s Needs
July 16, 2012

As part of the ICRIER-CSIS-CII, Emerging Indian Economy: Signature Speaker Series, Mr. John Flannery, President & CEO, General Electric (GE), India delivered a seminar on “India on the Move: Modernising Infrastructure to meet India’s Needs” on July 16, 2012 in New Delhi.

The objective of this interactive event, bringing together leading stakeholders from Indian business and industry, was to highlight the role of infrastructure in India’s economic growth and prospects for India-US collaboration in this vital field. Ambassador H.K. Singh, ICRIER provided an overview of the infrastructure sector in India. Mr. John Flannery highlighted the important role of infrastructure in boosting employment and investment in the Indian economy. His remarks focused in particular on the energy sector where he flagged the need for removing constraints in power generation, transmission and pricing. Mr. Flannery concluded with the observation that a proactive mindset in government, incentives for companies, and better infrastructure could provide multiple short- and long-term benefits for a quick revival of the Indian economy. Lead discussants from Indian businesses provided sectoral assessments on power, roads, smart grids, solar energy, airports and infrastructure financing.

Advancing US-India Economic Relationship: Bilateral Investment Treaty and Beyond
July 18, 2012

As part of the Roundtable Series under the ICRIER-Wadhwani Chair in India-US Policy Studies, a discussion on the theme, “Advancing US-India Economic Relationship: Bilateral Investment Treaty and Beyond” was organised on July 18, 2012. The principal researchers on BIT and BIPA at the counterpart Wadhwani Chairs in ICRIER and CSIS, Washington DC - Mr. Matthew Stokes, Visiting Fellow, CSIS and Ms. Tincy Sara Solomon, Research Assistant, ICRIER, presented their initial findings.

The objective of this roundtable discussion was to analyse the background and current status of negotiations on an India-US BIT and BIPA as well as to identify avenues for making progress on this complex issue, given the need to
boost bilateral trade and investment. The discussion was widely attended by stakeholders from the Government of India, CII, USIBC, FICCI, NASSCOM and the US Embassy. The discussion concluded with the understanding that there were some grounds for cautious optimism regarding the ability of India and the US to move forward with the BIT; however, the process was unlikely to be completed soon.

**Sovereign Default Fears and Banking Induced Recessions**  
July 18, 2012

The seminar on “Sovereign Default Fears and Banking Induced Recessions” by Dr. Alok Johri, Associate Professor, Department of Economics, McMaster University was held on July 18, 2012 at ICRIER, New Delhi. Against the background of renewed interest in linkage between sovereign defaults and recession following the euro-zone debt crisis, Dr. Johri used a dynamic general equilibrium open economy model to show how a recession in the euro-zone could be triggered before the occurrence of a sovereign default. A great deal of the existing literature focuses on how recessions happen following a sovereign default. This is the first attempt to model a banking capitalisation crisis in the European context, and has strong normative implications.

**Taiwan-India Economic Cooperation: State of Play and Prospects**  
July 24, 2012

A seminar on “Taiwan-India Economic Cooperation: State of Play and Prospects” was jointly organised by CIER, Taiwan, ICRIER, New Delhi, Ministry of Foreign Affairs, Taiwan, and Bureau of Foreign Trade, Ministry of Economic Affairs, Taiwan on July 24, 2012 in Taipei, Taiwan.

The seminar was inaugurated by Mr. Pradeep Kumar Rawat, Director General of the India-Taipei Association and Mr. Dale Jieh, Deputy Chief Negotiator, Ministry of Economic Affairs, Taiwan. A team of four researchers from ICRIER - Dr. Rajat Kathuria, Dr. Arpita Mukherjee, Ms. Mansi Kedia and Ms. Divya Satija made presentations on collaborations in the ICT sector, recent trends and developments in India and its WTO and FTA strategy, FDI in India and the services sector in India, including bilateral trade in the services sector, respectively. The seminar was well attended by policymakers, academia, and businessmen from Taiwan. The key outcome of the seminar was the understanding that the ongoing collaborative research between the two countries would continue the findings presented at a conference in January, 2013.

**India-US Strategic Partnership**  
August 6, 2012

As part of the ICRIER-Wadhwani Programme of Research Studies on India-US Relations and Policy Issues, Mr. Ranjan Mathai, Foreign Secretary, Government of India, delivered a talk on “India-US Strategic Partnership.” Mr. Mathai’s talk provided a detailed analysis of India’s multi-sectoral strategic engagement with the US, comprising political, defence and security, economic and people-to-people relations. He referred to the increase in the number of dialogues between the two countries as well as growing convergence between India and the US on regional and global issues. Mr. Mathai also stressed the need to invest greater effort, including political initiatives, to sustain the momentum of bilateral trade and economic relations. The talk was attended by leading experts on strategic and international affairs.
The Saudi-Iranian Cold War: Implications for Friends and Foes  
September 4, 2012

The ICRIER-Wadhwani Programme of Research Studies on India-US Relations and Policy Issues organised a talk by Dr. Jon B. Alterman, Zbigniew Brezinski Chair in Global Security and Geostrategy, and Director, Middle East Programme at CSIS, Washington DC, in September 2012. Dr. Alterman provided a historical perspective on the broad “pathology of conflict” behind the growing Saudi-Iranian rivalry today, describing this as fundamentally a nationalist battle in which the sectarian issue is only part of the narrative. Looking ahead, it was his assessment that in the near term, regional volatility will persist. The interactive discussion following Dr. Alterman’s presentation covered, inter alia, the future of the Arab Spring and prospects for internal change in various countries.

Transforming Cities with Transit: Transit and Land use Integration towards Sustainable Urban Development  
September 10, 2012

Mr. Hiroaki Suzuki, Lead Urban Specialist, World Bank, gave a talk on how integration of transport and land use leads to sustainable development. This seminar was held at ICRIER and was attended by researchers in the urban team and eminent urban professionals. Mr. Suzuki presented some major insights from his recent book, Transforming Cities with Transit, which explores the complex process of transit and land-use integration in rapidly growing cities in developing countries. He began by presenting some global best practices of transit-oriented metropolises with relevance to cities in the developing world. He then moved on to discuss the key institutional, regulatory and financial constraints which hamper integration and opportunities to utilise transit to guide sustainable urban development. He concluded by outlining key recommendations for creating more sustainable cities of the future, ranging from macro-level strategies that influence land development and governance at the metropolitan scale to micro-level initiatives like transit-oriented development, which can radically transform the patterns of urban development.

The discussion that followed, revolved around promising strategies for advancing environmental sustainability, economic competitiveness, and socially inclusive development in fast-growing cities, and how transit and land-use integration is increasingly being embraced by policymakers at all levels of the government.

Pew Perspective on the Indian Economy and the US Election  
September 12, 2012

As part of the ICRIER-Wadhwani Chair Roundtable Series, Mr. Bruce Stokes, Director, Pew Global Economic Attitudes, Pew Research Centre, Washington DC, made a presentation at ICRIER on the Pew Global Economic Attitudes Survey in India. The survey results were extremely informative with regard to the views of the Indian public on the current economic climate, government performance and expectations for the future. The survey highlighted and compared perspectives across age-groups and socio-economic strata. Mr. Stokes also made a presentation on a similar, intensive survey conducted in the US which pointed to the manner in which evolving demographics and economic climate affect electoral outcomes, as significantly demonstrated in the 2012 US presidential election.
Advancing a Defining Partnership for the 21st Century
September 17, 2012

At this ICRIER-Wadhwani Chair Eminent Speaker Series, Ms. Nirupama Rao, Indian Ambassador to the US and Ms. Nancy Powell, US Ambassador to India put forward their perspectives on the convergence and challenges in the Indo-US bilateral relationship. The session was chaired by Mr. Ronen Sen, former Indian Ambassador to the US, and included well-known strategic affairs experts, Dr. C. Raja Mohan and Dr. Sanjaya Baru, as discussants. The event was attended by leading members of the strategic and international affairs community in New Delhi, business and industry representatives, and received wide coverage in the Indian and international media.

Shocks: What do SVAR Models tell us about the Post-War Business Cycle?
October 10, 2012

The seminar, delivered by Dr. David Kim, Senior Lecturer, School of Economics, University of Sydney, focused on the shocks driving post-war business cycle fluctuations. The key question raised by Dr. Kim was: Does SVAR (Structural Vector Autoregressive Model) based evidence justify discarding the technology shock-driven real business cycle (RBC) hypothesis? He investigated the plausibility of technology shocks as a driving force of US business cycle fluctuations by revisiting some of the most commonly understood SVAR models, namely SVAR models of Cochrane, Gali, Shapiro and Watson, King, Plosser, Stock and Watson. Across all versions of these models, technology shocks are as important in explaining economic fluctuations as aggregate demand shocks combined. Technology shocks retain sizable conditional correlations with output in the post-war US data. The SVAR evidence suggests that the technology shock-driven models should not be discarded as a positive theory of the business cycle. Recent theoretical advances with investment-specific technology or varying factor shares may help in justifying the empirical importance of technology shocks.

Brazil as a Rising Economic Power
October 10, 2012

Dr. Marcos Troyjo, Co-Director, BRICLab, Columbia University, spoke about the Brazilian economic model of high growth and social inclusion. He showed how Brazil has increased its economic growth in the past ten years, and how the Brazilian economy has expanded the domestic market for higher consumption levels and income distribution mechanisms, thereby lifting the lives of millions in the country. However, low productivity, poor infrastructure and
outdated labour and fiscal laws have stalled Brazil’s growth rate in recent months. The questions that Dr. Troyjo raised regarding the Brazilian economic model were: (i) Is Brazil really adopting a development model that will take it towards global economic leadership; or (ii) Is it just experiencing a cyclical growth pattern that will lose momentum? He ended the discussion by asking: Can Brazil’s rise as an economic power be sustained over time or is the country destined to fall short of its vast potential?

Asia and Pacific Regional Economic Outlook: October 2012 Update
October 17, 2012

Dr. Thomas Richardson, Senior Resident Representative, International Monetary Fund (IMF), New Delhi presented the “Asia and Pacific Regional Economic Outlook” at ICRIER. He began by analysing the slowdown in growth in the Asia-Pacific region and highlighted the major role that external factors have played in it. He stated that the weaker momentum of growth in China and India weighed heavily on the regional economies in Asia. For Asia as a whole, during the first two quarters of 2012, GDP growth fell to its lowest rate since 2008. Subsequently, with the financial condition being more accommodative and capital flows resuming, the IMF predicts that growth will pick up gradually and Asia will remain the leader in global growth, expanding over two percentage points faster than the world average. Dr. Richardson concluded by stating that policymakers should focus on structural and fiscal reforms for more inclusive and sustained growth in the future.

Differential Effects of Financial Development on India’s Industrial Performance
November 12, 2012

Dr. Nitin Gupta, Arndt-Corden Department of Economics, Australian National University, made a presentation at ICRIER based on his paper, “The Differential Effects of Financial Development on India’s Industrial Performance.” He focused on the differential impact of increased financial development on industrial output across state and industry categories. The main findings were: (i) financial depth facilitates increased use of contract labour by industries, which in turn, mitigates the effects of industrial disputes and increases output; (ii) beneficial impact is uniformly felt across the country, regardless of state-level labour regulations, but financial depth has failed to directly benefit industries with the greatest need for external financing, namely those with moderate and high dependence on external sources of finance; and (iii) increased financial depth alleviated the working capital constraints of firms, but not their investment constraints. Finally, the speaker made a case for comprehensive labour reforms and specific policies to improve the quality of intermediation in the Indian financial markets.

Covered Bonds: An Alternative Source of Financing Mortgage Lending in India
December 4, 2012

This seminar, presented at ICRIER by Ms. Mira Tamboli, a financial consultant in Housing Finance and Asset Securitisation, examined the potential of building and promoting a covered bond market in India, and put forth guidelines and considerations for the development of best practices and legislation. Ms. Tamboli gave an overview of the instrument and examined the merits of covered bonds by comparison with mortgage-backed securities. A brief discussion followed on the benefits to issuers, investors and the government. Given the absence of legislation, a suitable structure for covered bond issuance as an interim solution was also discussed. By making a case for adopting legislation with broad policy considerations on key issues, the seminar provided a starting point for discussion on the issuance of covered bonds in India.
Services Sector as an Engine of Inclusive Growth

December 19, 2012

As part of the ICRIER-KAS Seminar Series 2012, this seminar at New Delhi focussed on the services sector as an engine of inclusive growth. The key speakers were Mr. Rajeev Kher, Additional Secretary, Ministry of Commerce & Industry, Government of India, Mr. Sumanta Chaudhuri, Joint Secretary, Ministry of Commerce & Industry, Government of India, Dr. Donghyun Park, Principal Economist, ADB, Dr. Arpita Mukherjee, Professor ICRIER, Dr. Rupa Chanda, Professor, Indian Institute of Management (IIM), Bengaluru and Dr. Ejaz Ghani, Economic Adviser, World Bank.

Dr. Park stressed that development of the services sector was the top priority for the developing Asian economies and pointed out the reasons for slow growth in productivity of services. He recommended that there should be higher investment in physical infrastructure and human capital, which would help create the supply of productive factors required for a strong services sector. Dr. Mukherjee presented a paper on “Services Sector as an Engine for Inclusive Growth: The Case of India,” highlighting the importance of services in India. Dr. Rupa Chanda’s presentation on “Managing Labour Services Exports: Role of Interstate Cooperation” highlighted that migration under Mode 4 largely takes place temporarily for providing skilled and less-skilled services. In his presentation, “Outsourcing and Diaspora”, Dr. Ejaz Ghani pointed out that diaspora-based contracts mainly serve to lower costs for companies as developers in India are paid the market-wage for their work.

Trade Policy in PRC and India in the New Era of Slower World Growth: Challenges and Policy Options

January 8, 2013

Dr. Ganeshan Wignaraja, Director of Research, ADBI, highlighted that after the 2008 crisis, the GDP growth gap between China and India has been narrowing, but India still has a long way to go to reach China’s level, be it in terms of its share in world GDP, participation in production networks, poverty reduction or world trade. Though figures for these indicators are improving for the Indian economy, China remains ahead owing to its “first-mover advantage” in undertaking economic reforms that have strengthened its global standing as a major FDI and exporting destination. Though India was an original member of the WTO, and China only joined it in 2001, the latter forged ahead owing to more coordinated and credible reforms. According to Dr. Wignaraja, though both India and China undertook a gradual approach to reforms rather than a “big-bang” approach, the initial conditions and the timing of reforms are what made the difference. The challenges and opportunities for India in narrowing the gap with China are: (i) a rising working
population vis-à-vis China; (ii) improvement in education; (iii) higher expenditure and staff in R&D; (iv) improvement in infrastructure, including transport and power, to help reduce the cost of doing business in the country, which is much higher than in China; and (v) improving logistics systems, highlighted as a major problem by international businesses in conducting operations in India.

**Stochastic Convergence of Real Wages in Indian Manufacturing: Time Series Evidence with Two Structural Breaks**

January 14, 2013

Dr. Homagni Choudhury, Lecturer in Economics, Aberystwyth University (Wales, UK) examined time series data on real wages per worker across 51 industries from the organised manufacturing sector in India for the period 1973-2003 to determine whether there is stochastic convergence of wages across industries. In his analysis, he used a minimum Lagrange Multiplier (LM) unit root test that endogenously determines two structural breaks in intercept and slope. The LM unit test aided the identification of the effect of India’s two distinct phases of reforms – 1980s (weak reforms) and 1990s (strong reforms) – on the changes in relative real wages identified for each industry. Dr. Choudhury’s analysis provided evidence that real wages per worker are stochastically converging between industries in India. Dr. Choudhury also pointed out that, given the heterogeneous characteristics of industries in India, “stochastic convergence” implied that real wages between industries converge to an industry-specific “compensating differential”, and it did not mean that there was an absolute convergence in wages, rather, there was conditional convergence.

**Is India Hedged against Systemic Risk? An Attempt at an Answer**

January 17, 2013

Dr. Gurbachan Singh, Visiting Faculty at the Indian Statistical Institute (ISI), New Delhi, presented his research at ICRIER on the risks facing the Indian economy and the corresponding mitigating factors. He proposed a few policy changes based on his extensive analysis of secondary data governing the different dimensions of systemic risk. The types of risks identified in the research were a mix of familiar and unfamiliar ones, driven by asset markets, banks, fiscal deficit, current account deficit and inflation. The discussion on mitigating factors focused on banking policies, inflation management, economic growth and government-led bailouts. Dr. Singh highlighted the manner in which these mitigating factors deflect a crisis, albeit at a huge cost. For example, he pointed towards the high opportunity cost of ex-ante bailouts and rapid inflation leading to default in real terms. He also explained how India’s misplaced confidence in the public sector-driven banking industry was not a reliable ‘hedge’ against systemic risk.

One of the key policy recommendations made by Dr. Singh was the use of an extended fiscal policy focusing on tax-evasion and deficit-reduction. He also recommended the adoption of a credit line from the IMF or any other multilateral organisation to reduce the risk of FII outflows. In conclusion, he argued that India’s progress towards macroeconomic stability should not be driven by financial repression, jumps in inflation rate or frequent explicit and implicit bailouts.

**Firms’ Fundamentals, Macroeconomic Variables and Quarterly Stock Prices in the US**

January 21, 2013

Dr. Alok Bhargava, Professor, University of Maryland, presented his research at ICRIER on a model that examined the effects of firms’ fundamentals and macroeconomic variables on the quarterly stock prices of over 3,000 US firms during the period 2000-07. While employing the technique of maximum likelihood, he accounted for firms’
fundamentals such as total assets and long-term debt, and macroeconomic variables such as unemployment and interest rates, to test the adequacy of these variables in determining the quarterly stock prices of firms in various Global Industry Classification Standard (GICS) industries. Owing to the fixed nature of supply of stocks in the short run, Dr. Bhargava considered panel data to overcome the shortcomings of previous research that considered cross-sectional data by allowing for variability in stock prices, firms’ fundamentals and macroeconomic variables.

His main findings were: (i) the estimated coefficients of lagged stock prices in the simple random effects model were in the interval 0.90-0.95; and (ii) comprehensive dynamic models showed that firms’ earnings per share, total assets and long-term debt, dividends per share, unemployment and interest rates were significant predictors; (iii) controlling for random effects, stock prices did not follow a random path; and (iv) there were varying effects of different macroeconomic variables on individual firms, according to his analysis of GICS industries.

Tax Administration Modernisation: Trends and Challenges, and SME Tax Regime in CIS Countries
January 28, 2013

In his presentation at ICRIER, Dr. Munawer Sultan Khwaja, Fiscal Economist, World Bank, argued that tax reform was a major concern in public finance and that effective administration was important for many reasons. The discussion revolved around five major areas of reform required in tax administration globally: (i) use of third party information; (ii) risk management; (iii) consolidation of organisational structures; (iv) integration of tax and social contribution; and (v) taxpayer segmentation and specialisation. Country examples were cited to explain details and experiences in these areas. Further, Dr. Khwaja talked of the unique case of small and medium enterprises (SME) tax regimes in Commonwealth of Independent States (CIS) countries. After introducing the idea of SME taxation in CIS countries, four SME taxation regimes in these countries were discussed, namely patents, presumptive taxation based on indicators, turnover-based tax and cash flow-based taxation. Various issues with SME tax regimes were discussed in general and Kazakhstan in particular. This was followed by a discussion on the options for reforms at the policy and administrative levels. It was mentioned that international experience from OECD countries could be helpful in the design of some of these reform programmes.

Knowledge Dissemination Seminar: Presentation of the HPEC (Ahluwalia, 2011) Report
January 29, 2013
The first Knowledge Dissemination Seminar of ICRIER’s HUDCO Chair Programme was delivered by Dr. Isher Judge Ahluwalia, Chairperson ICRIER, and Chair of the High Powered Expert Committee (HPEC) on Urban Infrastructure and Services.

Dr. Isher Judge Ahluwalia, Dr. Rajat Kathuria, Director, ICRIER, Prof. Meenu Tewari, HUDCO Chair, ICRIER and Mr. V. P. Baligar, Chairman and Managing Director, HUDCO made their opening remarks on the challenges of urbanisation, and summarised the initiatives undertaken by ICRIER and HUDCO. Prof. Meenu Tewari outlined the objectives of the seminar which were to: (i) share the findings of the HPEC (Ahluwalia, 2011) Report on urban investment and infrastructure in India; and (ii) collectively understand how the findings and approach of the study could be taken forward to the states.

The highlights of the HPEC (Ahluwalia, 2011) Report revealed the current scenario of urbanisation in India - one of growth but lacking in service delivery - which in turn was undermining the economic potential of urban areas. The discussions led by Dr. Isher Judge Ahluwalia and Mr. V.P. Baligar revolved around the need for interventions at the ULB and state levels, examples of initiatives to bolster municipal finance, capacity building efforts, etc. The seminar concluded by reinforcing the importance of these ideas and the need to continue the discourse by conducting such events.

**Energy Outlook 2030**
February 1, 2013

A talk on “Energy Outlook 2030” was organised by ICRIER on February 1, 2013 by Professor Christof Rühl, Group Chief Economist and Vice President, British Petroleum. Professor Ruhl spoke on the global energy trends of various regions of the world from 1990 to 2030. According to the Energy Outlook 2030, population and income growth were the key drivers behind the growing demand for energy. Between 2011 and 2030, both world primary energy consumption and energy production were projected to grow by 1.6 percent per year with developing countries driving this growth. According to Professor Ruhl, the world’s appetite for primary energy will rise significantly. Industry is expected to lead the growth of final energy consumption, accounting for 57 percent of the projected growth of final energy demand to 2030. The transport sector will experience the weakest growth as OECD’s transport demand was projected to decline. According to estimates, energy intensity (the amount of energy consumed per unit of GDP) will decline in all regions by 2030. Professor Rühl concluded by emphasising the necessity to increase supply and raise competition to meet the growing energy demand across the world.

**The US Pivot towards Asia**
February 7, 2013

At this ICRIER-Wadhwani Chair Eminent Speaker Series, Dr. Satu P. Limaye, Director, East West Centre, Washington DC, outlined the dimensions of the US “pivot” towards Asia, stressing that while it may not have lived up to the perception of a major rebalance of military forces, the increasing US non-military engagement with Asia needed to be considered as an integral part of the strategy. He highlighted the increasing reallocation of diplomatic and economic resources to the region and intensification of people-to-people relations. He also made a brief comparison of the RCEP and TPP initiatives and possible economic implications for both India and the US.
Information or Money? Using Peer Comparisons and Financial Incentives to reduce Electricity Demand in Urban Indian Households

February 19, 2013

The third seminar of the ICRIER-HUDCO Seminar Series on Urbanisation and Competitiveness of Cities titled, “Information or Money? Using Peer Comparisons and Financial Incentives to reduce Electricity Demand in Urban Indian Households?” was delivered by Dr. Anant Sudarshan, Sustainability Science Fellow, Harvard University on February 19, 2013 in New Delhi. The seminar was chaired by Dr. Rajat Kathuria, Director, ICRIER and Dr. Akshay Sen, Assistant General Manager, Economics, HUDCO. Three sector experts – Dr. Rohini Somanathan, Professor, Delhi School of Economics, Mr. I. A. Khan, Adviser, Energy, Planning Commission, Government of India and Mr. Ashish Khanna, Lead Energy Specialist, World Bank, New Delhi – were the discussants.

Dr. Anant discussed the importance of demand-side interventions in residential electricity consumption to energy and climate policy across the world. He presented his evaluation of the relative effectiveness of different policy tools and instruments aimed at changing behaviour and reducing electricity demand. His research indicated that pure behavioural intervention using peer comparisons were the most effective in sustained electricity reduction, while financial incentives coupled with the above had a deteriorating effect.

Macroeconomic Context and Budget Priorities 2013-14

February 21, 2013

The first ICRIER-KAS Seminar on “Macroeconomic Context and Budget Priorities 2013-14” was held on February 21, 2013 in New Delhi. Mr. Tomislav Delinic, Resident Representative in India, KAS, India Office made the opening remarks. The keynote address was delivered by Dr. Saumitra Chaudhuri, Member, Planning Commission and Member, Economic Advisory Council to the Prime Minister, Government of India. Dr. Chaudhuri made a presentation on “Growth with Stability, Inclusion and 8 percent+ Growth” emphasising the key issues of concern, such as growth recovery being far more rapid than expected followed by an unexpected deep and persistent slowdown, decline in investment and persistent inflation. He was optimistic that India could return to an 8 percent growth rate and macroeconomic stability, if there were no external shocks or slippages in infrastructure investments.

Dr. Shankar Acharya, Honorary Professor, ICRIER made a presentation on “Macroeconomic Context and Budget Priorities 2013-14.” This session was chaired by Dr. Chetan Ghate, RBI Chair Professor, ICRIER. Three experts,
Development at the WTO: Looking beyond the Doha Round  
February 25, 2013

Dr. Sonia Rolland, Associate Professor, Northeastern University, School of Law, US, presented a seminar on “Development at the WTO: Looking beyond the Doha Round” at ICRIER on February 25, 2013.

In her presentation Dr. Rolland stated that, while there have been major transformations in the role of developing countries in world trade since the Uruguay Round, the debate on development at the WTO has remained largely unchanged. According to her, there appeared to be a disconnect between development requirements and the WTO discipline, and between the participation of developing countries and WTO institutions. Though there was a substantial increase in the number of developing countries in the WTO, the rules have not changed. The Doha Round was initiated to bring development issues within the mainstream but the developing countries had struggled so far in taking this forward. Dr. Rolland proposed two paradigms for reframing the relationship between trade and development. First, she advocated an ad hoc paradigm in which pragmatic case-by-case consideration of trade and development could be made. Second, there was need for a normative co-constituent paradigm in which trade liberalisation and development are adopted as complementary core principles to inform WTO law and institutions. However, to move forward, she stressed there was need to: (i) increase human and financial resources; (ii) ensure a shift in practices of members and organisations; (iii) make use of interpretative decisions by the General Council; (iv) bring the interpretation of WTO agreements in line with contemporary developments in public international law; and (v) re-examine the negotiation process.

An Overview of India’s Approach to Key Intellectual Property Issues at Home and Abroad  
February 28, 2013

A seminar on “An Overview of India’s Approach to Key Intellectual Property (IP) Issues at Home and Abroad” was delivered by Dr. Bona Muzaka, Senior Lecturer, International Political Economy, Department of European and International Studies, King’s College, London on February 28, 2013 at ICRIER.

Dr. Bona’s presentation focussed on the importance of the generic industry to the Indian economy and the issues it currently faces. According to Dr. Bona, the industry contributed 1.55 percent to India’s GDP and employed 4.2 million people. She mentioned that during the past few years, the Indian government had taken various measures to reform the sector. These included amendments in the Indian Patent Law, Biological Diversity Act (2002), etc. However, there still remained many IP issues related to pharmaceuticals in the country. The pharmaceutical policy in India was part of the industrial policy. Until 2010, 1,053 patents had been issued, after which no new patents were issued to the manufacturers of medicines. At the international level, India was not a member of various international forums, such as UNITAID, UPOV, despite considerable pressure from many countries including the US and the EU. Dr. Bona said there was high potential for the Indian biotech sector in the coming years but there was need for coordination between various ministries dealing with IP issues together with a proper IP coordination policy in place. She suggested that the country should introduce some TRIPS + provisions in the area of plant varieties and copyright in Indian patent law.
How China impacts Contemporary India-Japan Relations
March 9, 2013

ICRIER, in association with the Centre for Asia Studies and Chennai Centre for China Studies, organised an international seminar on “How China Impacts Contemporary India-Japan Relations” on March 9, 2013 in Chennai. The seminar focused on the issues relating to India-Japan economic and strategic relations in the light of China’s rise.

The opening remarks were made by Mr. R. S. Vasan, Head, Strategy and Security Studies, Centre for Asia Studies, Chennai and the inaugural remarks were delivered by Ambassador H. K. Singh, Professor, ICRIER-Wadhwani Chair in India-US Policy Studies. The speakers in the first session were Dr. Yoichiro Sato, Director, International Strategic Studies, Ritsumeikan Asia Pacific University, Japan, Dr. Madhu Bhalla, Professor, Department of East Asian Studies, University of Delhi, and Dr. D. S. Rajan, Director, Chennai Centre for China Studies. The session discussed the Indo-Japanese perspectives on China as a security challenge. The second session highlighted the growing impact of the China factor in deepening India-Japan economic relations. The speakers were Mr. Toshiro Nishizawa, Head of Country Credit Department, JBIC, Japan, Mr. N. Krishnaswami, Secretary General, Indo-Japan Chamber of Commerce and Industry and Ms. Isha Dayal, Research Assistant, ICRIER. In the third session the speakers were Dr. Ram Upendra Das, Senior Fellow, Research and Information System for Developing Countries (RIS), Dr. V. Suryanarayan, Professor and Founding Director, Centre for South and Southeast Asian Studies, University of Madras, Mr. R. S. Vasan, Head, Strategy and Security Studies, Centre for Asia Studies, Chennai and Ms. Sanjana Joshi, Senior Consultant, ICRIER. The session focused on the regional dimensions on India-Japan political, security and economic relations.

Economic Reforms and Total Factor Productivity Growth of Indian Manufacturing: An Inter-State Analysis
March 13, 2013

The seminar on “Economic Reforms and Total Factor Productivity Growth of Indian Manufacturing” was delivered by Dr. Arnab Deb, School of Business, Galgotias University on March 13, 2013 at ICRIER. The session was chaired by Professor B. N. Goldar. Dr. Deb began by highlighting the evolution of Indian industrial policy since independence and went on to focus on the post-1991 reforms and their impact on productivity in manufacturing. Inter-state variations in productivity were discussed for the period 1970 to 2004 that covers both the pre-reform and post-reform period.
Dr. Deb explained that the total change in productivity had been broken down into three components: (i) efficiency change, (ii) technical change, and (iii) scale change. To measure these different components of productivity change, he used the Non-Parametric method, and the Data Envelopment Analysis, while also highlighting the caveats of the method. The empirical findings from this study showed an increase in Total Factor Productivity (TFP) in the post-reform period compared to the pre-reform period of the Indian economy. This TFP growth was more due to technological change (technological progress) than the other two components of change in TFP (i.e. the efficiency change and the scale change). Some states such as West Bengal and Andhra Pradesh experienced positive TFP growth, but negative technological change. The positive TFP growth in these states was mainly due to positive scale effect. The talk was followed by an animated discussion on data and methodological issues.

**Revisiting India’s Look East Policy**

March 14, 2013

At this ICRIER-Wadhwani Chair Eminent Speaker Series, Dr. Frederic Grare, Senior Associate and Director, South Asia Programme, Carnegie Endowment for International Peace in Washington DC, outlined the economic and political factors that resulted in the initiation of India’s Look East Policy, including the end of the Cold War and the need for diversified international trade. In the context of India-ASEAN connectivity, Dr. Grare flagged the role of India’s North Eastern states in guiding policy-making. He also pointed out that India’s eastern seaboard should play a major role in building convergence between India and East Asian countries, for which major infrastructure investments are needed.

**Mobile Broadband and Spectrum**

March 15, 2013

In a seminar organised by ICRIER on March 15, 2013, Mr. Parag Kar, Vice President, Government Affairs, Qualcomm (India & South Asia), presented his findings on the economics of mobile broadband spectrum in India. He began by highlighting the complexity of the subject and reasons why it was misunderstood. As India stepped into a new paradigm of “mobile data”, there was an urgent need for policy intervention to enable its faster adoption. Affordable tariffs could be a driver of mobile broadband in India, if operators were assigned additional spectrum. The current level of spectrum available to operators is miniscule compared to global averages, and the allocation mechanism is non-transparent.

According to Mr. Kar, harmonising spectrum enables scale to be achieved that eventually brings down the cost of service provision. Affordable tariffs and devices could drive the adoption of mobile broadband in India. Mr. Kar also highlighted the costs and benefits associated with each band of spectrum. The 2.1 GHz band, with best characteristics, is deployed in all three ITU regions. He recommended that additional slots in the 2.1 GHz band be made available by reallocating the current unused spectrum of 1900 MHz. This would be an ideal situation benefitting all stakeholders, including the government, defence establishments, consumers, operators, and vendors. It would be difficult to achieve similar success using other bands of spectrum. The only other option that comes close to 2.1 GHz is the 900 MHz band.
Establishing Relationship between the recent Foreclosure Crisis and Regional Economic Structure in US Counties  
March 19, 2013

The fourth seminar of the ICRIER-HUDCO Seminar Series on Urbanisation and Competitiveness of Cities titled, “Establishing Relationship between the recent Foreclosure Crisis and Regional Economic Structure in US Counties” was delivered by Dr. Indro Ray, Research Associate, IIHS on March 19, 2013 in New Delhi. Prof. Meenu Tewari, Visiting Professor, ICRIER, was the chair of the seminar.

Dr. Ray’s presentation was focused around identifying various factors that contributed to high rates of residential foreclosures that, in turn, triggered a decline in the US economy in 2007, unleashing a severe global financial crisis. It was found that regions with diversified workforce were less likely to have higher rates of foreclosure; regions that depended heavily on sectors related to the housing market were hit hard. Additionally, areas that saw faster growth in small size firms were more resilient to the housing crisis. The results pointed towards an economic structure at the regional level that not only supports sound economic growth but also helps regions better absorb external shocks.

India’s Economic Outlook in the Current Global Scenario  
March 22, 2013

The seminar on “India’s Economic Outlook in the Current Global Scenario” was delivered on March 22, 2013 by Dr. Thomas Richardson, IMF Senior Resident Representative, New Delhi. The session was chaired by Dr. Shankar Acharya, Honorary Professor, ICRIER. Dr. Richardson drew on the IMF’s latest World Economic Outlook update and pointed out that global growth was projected to increase during 2013. Projections for growth in the emerging markets and developing economies also showed an upward trend. However, downside risks remained significant including renewed setbacks in the euro area and risks of excessive near-term fiscal consolidation in the US. Further, weakness in advanced economies will spill over to the emerging markets through channels of external trade. With regard to India, he said that the IMF had adjusted India’s growth projection downward. According to Dr. Richardson, slowdown in investment, high inflation, and high fiscal deficit had raised concerns about India’s growth. He stressed the importance of financing imports, as it had an influence on the current account deficit which was currently widening. Dr. Richardson suggested boosting investment as the key to restarting growth, while simultaneously focusing on environment and land policy.

Fiscal Prudence: A Comparative Analysis of Germany and India  
March 25, 2013

A brainstorming session on “Fiscal Prudence in Germany” with Dr. Heribert Dieter, Senior Research Associate, The German Institute for International and Security Affairs, Berlin was organised on March 25, 2013 at ICRIER, New Delhi.

Discussing fiscal issues in Germany, Dr. Dieter said that an unsustainable level of sovereign debt was not a new phenomenon. However, the implications were severe, including a near wash-out of savings of an entire generation. Hence, fiscal prudence was a socially and economically accepted norm by the government as well as society. Sovereign debt level had increased from 17 percent of GDP during the 1970s to 80 percent today. According to Dr. Dieter, this was because politicians were averse to reducing spending during economic boom which had increased during recession. Fiscal prudence had become even more difficult because of the unexpected unification of Germany and the euro zone crisis.
Dr. Dieter explained that in Germany, half the budget expenditure was on social welfare schemes. This was intrinsically problematic in a demographically ageing country as fiscal priorities were geared towards meeting greater social security benefits as opposed to creating new jobs to maintain employment levels, as in the case of India. The implicit government debt level factoring in the social promises made to future generations of Germany was approximately 200 percent of GDP. Germany was undertaking regulatory change in order to cope with the rising fiscal burden. A Stability Council was appointed in 2010 to monitor the implementation of new fiscal rules. Government debt witnessed a change in structure – there was greater international holding of sovereign bonds. There was general consensus that there must be concerted effort to achieve fiscal consolidation as fewer people will be able to service the debt in future.

**12th Five Year Plan: Challenges and Opportunities for the Social Sector**

May 27, 2013

The seminar, “12th Five Year Plan: Challenges and Opportunities for the Social Sector” was organised on May 27, 2013 in New Delhi. This seminar was the second ICRIER-KAS seminar for the year and fifth in the series of seminars jointly organised by the two organisations. The seminar focused on India’s low human development indicators particularly with regard to access to education and health in comparison with other countries. The discussion also focused on the prospects that the country’s 12th Five Year Plan (2012-17) holds for improvements. After the opening remarks by Dr. Rajat Kathuria, Director & CE, ICRIER and Mr. Tomislav Delinic, Resident Representative to India (officiating), KAS, the keynote address was delivered by Dr. Syeda Hameed, Member, Planning Commission, Government of India. Dr. Hameed’s address focused on the policies and programmes pertaining to the social sector in the 11th and 12th Plans and highlighted the concerns and constraints that need to be addressed to achieve the targets set under each of them. She pointed out that the 12th Plan is about faster, more inclusive and sustainable growth with specific and regularly monitored targets in the fields of education, health, etc. At the seminar, the key presentation was made on “Challenges and Opportunities for the Social Sector” by Dr. Sonalde Desai, Professor, University of Maryland. This was followed by a panel discussion moderated by Dr. Santosh Mehrtra, Director-General, Institute of Applied Manpower Research. The panelists included Dr. Nisha Agrawal, CEO, OXFAM India, Dr. Amir Ullah Khan, President, Glocal University, and Ms. Caitlin Wiesen, Country Director, UNDP India.
Trade Hyperglobalisation and Its Future
June 21, 2013

Dr. Arvind Subramanian, Dennis Weatherstone Senior Fellow, Peterson Institute for International Economics, delivered a seminar at ICRIER on June 21, 2013 on “Trade Hyperglobalisation and its Future.” The seminar was chaired by Dr. Isher Judge Ahluwalia, Chairperson, ICRIER. Dr. Subramanian started his presentation with a timeline of globalisation taking into account the trade to GDP ratio and delineated the major features of today’s trading system as: (i) hyperglobalisation, that is the rapid rise in trade integration; (ii) dematerialization of globalisation, namely the importance of services; (iii) rise of a mega-trader China, the first since imperial Britain; (iv) proliferation of regional trade agreements and the imminence of mega-regional ones; and (v) decline of barriers to trade in goods but the continued existence of high barriers to trade in services. With regard to trade integration and its implications for India, Dr. Subramanian pointed out that, while there is considerable liberalisation in India such as in FDI and finance, there is need for further liberalisation in government procurement and services. Suggesting that it was time for India to become less defensive and more proactive, he stressed that India should consider introducing a model of cooperative federalism under which competition in trade should be extended to the states in India too, as this would make the states competitive and lead to higher economic growth of the country as a whole.

British Petroleum Statistical Review of World Energy 2013
June 27, 2013
The seminar focused on discussing the key results of the *BP Statistical Review of World Energy 2013* compiled by British Petroleum (BP). The *Statistical Review* is released by BP every year with details on energy reserves, production, consumption and trade trends as well as emission trajectories. At the seminar, Dr. Christof Rühl, Group Chief Economist, BP, made a presentation highlighting the results from the review, which were later discussed in an Indian context by two discussants, namely Dr. Subir Gokarn, Research Director, Brookings Research and Ambassador H.K. Singh, Professor, ICRIER.

Dr. Christof Rühl, in his presentation, highlighted the fact that the economic gravity of the world has over a period of time shifted from the developed to the developing world. An overwhelming share of the globe’s current energy production as well as consumption is being reported from Asia as well as other emerging markets. Despite this, the demand dampening effects of the economic recession within many countries of the OECD block has led to total global primary energy consumption falling to 2002 levels. It is however interesting to note that the demand dynamics has not had much impact on energy prices, which continue at a record high. The reason, as suggested by Dr. Rühl, lay in price expectations and the increase in inventories maintained within countries. High international liquidity was also suggested as a cause of this price rigidity in the discussion following the presentation. The *BP Statistical Review of World Energy 2013* also highlights the change in the oil order with the traditional oil markets (OPEC) no longer being dependent just on the OECD, and the US changing from a net energy importer to a net energy exporter backed by its shale gas discoveries. Dr. Rühl pointed out that these non-conventional oil discoveries in the US are led not just by resource abundance but also by the existence of domestic open access and competition policies. According to him, the entry of cheap gas is proving to be a dampener for the renewable energy and energy-efficiency movement. While the substitution of coal to gas (in US and EU) for power is an improvement from the carbon emission angle, the lack of global agreement regarding emissions regulation – EU ETS, United Nations Framework Convention on Climate Change (UNFCCC), Clean Development Mechanism (CDM), etc. and trade of cheap ‘brown’ fuels would hurt the renewable cause.

**How India Fits into Global Production Sharing: Experience, Prospects and Policy Options**  
July 19, 2013

In a seminar organised by ICRIER on July 19, 2013, Dr. Prema Chandra Athukorala presented a paper on “How India Fits into Global Production Sharing: Experience, Prospects and Policy Options.” The paper examined India’s role in global production networks and explains why India is lagging behind China and other East Asian countries. The share of network products in total manufacturing exports of India is much smaller compared to the East Asian countries. He argued that India still remains a small player in global production networks, particularly in electronics and electrical goods. Its relative ‘success’ in automobiles seems product-specific, which can be explained partly by the characteristics of auto components and partly by the failure of Indian SEZs in attracting foreign electronics companies. He argued that a country’s success in joining global production networks and industrial advancement does not depend solely on the availability of labour at relatively low wages, but also on human capital development. India should also focus on creating an investment enabling environment which includes lowering the cost of service links (transportation, communication) that complement the labour cost advantage.

**Evaluation of Intermittent versus 24x7 Water Supply in Hubli-Dharwad, Karnataka, India**  
July 26, 2013

The first seminar of the ICRIER-HUDCO Seminar Series for the year 2013-14 on urbanisation and competitiveness of cities was held on July 26, 2013 in New Delhi. The seminar titled, “Evaluation of Intermittent versus 24x7 Water
Supply in Hubli-Dharwad, India” was presented by an interdisciplinary team from the University of California, Berkeley. Headed by Dr. Kara Nelson, Professor, Civil and Environmental Engineering, the team included doctoral candidates Zach Burt, Ayse Ercumen and Emily Kumpel. The team presented the findings of their study where they evaluated the impact of a pilot-scale conversion from intermittent to 24x7 water delivery in Hubli-Dharwad, Karnataka. The study included a comparison of areas of the city that received 24x7 delivery with areas that continued to be served by intermittent water supply, to assess the effect of the conversion on drinking water quality, waterborne illness among children and household economics. The conclusion of the study is that while 24x7 water delivery system was more expensive than intermittent supply, it resulted in an improved quality of water due to reduced contamination. An important issue highlighted in the study was that the practice of water storage in households increased the contamination of both sets of water.

**Labour Intensive Industrialisation in India: Examining the Constraints to Employment Intensive Growth**

July 26, 2013

A seminar on “Labour Intensive Industrialisation in India: Examining the Constraints to Employment Intensive Growth” was held on July 26, 2013 in New Delhi. The seminar was chaired by Prof. Meenu Tiwari, which was followed by a presentation by Professor Kunal Sen and Dr. Deb Kusum Das. The speakers highlighted the fact that India has been an outlier among all major Asian economies. A comparison among 13 labour intensive industries showed that the manufacturing sector for food products employed the highest numbers, whereas the performance of labour intensive sectors in terms of labour productivity has been dismal. The key constraint to the growth of labour-intensive sectors was road infrastructure and labour regulations with openness and human capital. Emphasis was laid on the need for a more systematic analysis of industry-level barriers.

The participants made several suggestions to the speakers. They highlighted that profit making, unorganised manufacturing sector should be considered during the analysis. Individual product share in the production basket of the state should be considered during the computation of Revealed Comparative Advantage along with the impact of National Rural Employment Guarantee Act (NREGA). Further, incorporation of the informal sector of manufacturing and the missing middle story in the analysis was suggested.
International Networking

South Asia Network of Economic Research Institutes (SANEI)
The 12th Annual SANEI Conference was held during December 11-12, 2012 in Colombo. The Conference was organised by the South Asia Network of Economic Research Institutes (SANEI) in partnership with Marga Institute, Sri Lanka. The theme of the conference was “South Asia: Sustaining Growth in the Face of the Global Economic Turmoil.” The conference was attended by well-known academics, researchers, senior policymakers and others from South Asia and other countries including the US. The conference provided an opportunity to the grantees of SANEI’s 13th Regional Research Competition (RRC) to present their research results.

The SANEI Secretariat has received the reviews from the Research Advisory Panel (RAP) members for the proposals submitted under the SANEI 14th Round RRC. The theme of the SANEI 14th Round RRC is “Sustaining Rapid Growth in South Asia in the Face of the Current Global Financial and Economic Turmoil.” Nineteen proposals were received of which seven were selected by the SANEI RAP members for funding.

Sixteen South Asian representatives of SANEI attended the 14th Annual Global Development Network conference in Manila, Philippines in June 2012. The SANEI Secretariat organised a parallel session on “Sustaining Rapid Growth in South Asia in the Face of the Current Global Financial and Economic Turmoil” where five country papers were presented by the SANEI representatives of the South Asia Region.

MOU with Policy Research Institute, Japan
With the objective of promoting and strengthening mutual cooperation, ICRIER and the Policy Research Institute (PRI), Ministry of Finance, Japan have extended their Memorandum of Understanding (MOU) by three years in March 2013. The two institutions will: (i) facilitate exchange of researchers between both sides; (ii) cooperate to organise an annual workshop on issues of common interest; (iii) exchange research materials in accordance with the needs of both sides and (iv) promote joint research activities regarding the economies of both countries.

MOU with Korea Institute for International Economic Policy, South Korea
The Korea Institute for International Economic Policy (KIEP), South Korea and ICRIER have signed an MOU in October 2012. Recognising the need for cooperation on research and academic activities, the two institutions have agreed to: (i) exchange research information; (ii) conduct joint research activities; (iii) collaborate in organising joint conferences and workshops on relevant issues and (iv) provide facilities and administrative support to visiting scholars from the other side. The MOU is effective for a period of two years.

MOU with Sustainable Development Policy Institute and Lahore University of Management Sciences, Pakistan
The Sustainable Development Policy Institute (SDPI), Pakistan and ICRIER have signed an MOU in 2012. The two institutions have agreed to: (i) co-organise workshops/conferences/seminars; (ii) conduct collaborative research studies in mutually agreed areas and (iii) exchange research information. A similar MOU has been signed between Lahore University of Management Sciences (LUMS), Pakistan and ICRIER. The MOUs are effective for one year and have been signed under ICRIER’s project on “Strengthening Research and Promoting Multi-level Dialogue for Trade Normalisation between India and Pakistan.”
Book/Report Releases

Book Release – Devaluing to Prosperity: Misaligned Currencies and their Growth Consequences

December 17, 2012

In collaboration with Oxford University Press, ICRIER hosted the release of Dr. Surjit Bhalla’s book, “Devaluing to Prosperity: Misaligned Currencies and their Growth Consequences,” on December 17, 2012 in New Delhi. The book examines the veracity of various propositions relating to currency misalignments and their effect on policy. It highlights methodological limitations caused by measurement problems in estimates of currency undervaluation in previous analyses of exchange rate management and growth. The main conclusions are: (i) the real exchange rate can be affected by nominal devaluations; and (ii) currency undervaluation does help growth but the global economic system becomes unstable if too many countries, and especially large countries, pursue this approach. The book reflects on the Japanese and Chinese examples in particular and puts forward policy suggestions for India.

The book was released by the Union Minister of Finance, Mr. P. Chidambaram. The Hon’ble Minister termed the book as ‘extraordinary’ and praised the amount of research that the author had undertaken. The book release was followed by a vibrant panel discussion moderated by Mr. T.N. Ninan, Chairman, Business Standard Ltd. The panelists included Dr. Raghuram G. Rajan, former Chief Economic Adviser, Government of India, Dr. Shinji Takagi, Professor, Osaka University, and Dr. Surjit Bhalla.

Report Launch – BIT and Beyond: Advancing India-US Economic Relations

January 23, 2013

The ICRIER-Wadhwani Chair’s Policy Report, “BIT and Beyond: Advancing India-US Economic Relations,” by Ambassador Hemant Krishan Singh and Ms. Tincy Sara Solomon was formally launched by Mr. Salman Khurshid, Minister of External Affairs, on January 23, 2013. Following an introduction of the report by Ambassador Hemant Krishan Singh and remarks by Ms. Nancy Powell, US Ambassador to India, and Dr. Rajat Kathuria, Director and CE, ICRIER, Mr. Khurshid delivered the keynote address. The report launch was chaired by Ambassador Ronen Sen, former Indian Ambassador to the US.
The “BIT and Beyond” report provides an in-depth analysis of India’s investment climate and India-US trade and economic relations and makes recommendations for reconciling the respective approaches of the Indian and the US governments towards a Bilateral Investment Treaty (BIT/BIPA). It also assesses trends towards regional trade agreements, such as RCEP and Trans-Pacific Partnership (TPP) and the challenges and opportunities they present for India.

**Book Release – Indian Tax Administration: A Dialogue**

June 24-25, 2013

The book, “Indian Tax Administration: A Dialogue,” edited by Dr. Parthasarathi Shome, published by Orient Blackswan was released on June 24, 2013 by Dr. Bimal Jalan at a conference organised on June 24-25, 2013 to disseminate the findings of the study on “Advancements in Tax Administration: Lessons and Experiences of UK, Brazil and India.” The publication is born out of first-of-its-kind discussion series between tax officials and tax practitioners. It does the following: (i) provides a detailed analysis of organisational structure, risk assessment and management in audit selection; (ii) discusses computerisation in both direct and indirect tax administration and the newly established Large Taxpayer Units (LTU) at the central level for large enterprises; (iii) undertakes a statistical study of the effectiveness of value added taxes of state-level administrations; and (iv) examines the procedure of dispute resolution. Comprising compilations by both serving and retired bureaucrats and stakeholder voices from outside the government, the contributors occupy both ends of the tax spectrum.

AUDITORS’ REPORT

The Members,
Indian Council for Research on
International Economic Relations,
Cradle 6A, 4th Floor,
India Habitat Centre,
Lodi Road,
New Delhi

We have audited the accounts of your Council and certify that the annexed Income and Expenditure Account for the year ended March 31, 2013 and Balance Sheet as at March 31, 2013 for the year read with the Statement of Accounting Policies and Notes thereon have been correctly drawn from the books of accounts and vouchers examined and the information and explanations given to us.

It is further certified that:

(a) We have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit;

(b) Proper books of accounts have been kept by the Council so far as it appears from our examination of those books;

(c) The Council’s Balance Sheet and Income and Expenditure account dealt with by this report are in agreement with the books of accounts and in our opinion and to the best of our information and according to the explanations given to us, the said accounts give a true and fair view:

(i) in the case of the Balance Sheet of the state of affairs of the Council as at March 31, 2013; and

(ii) in the case of the Income and Expenditure account of the excess of Income over Expenditure for the financial year ending on March 31, 2013.

Schedule-4

Indian Council for Research on International Economic Relations
For the Year Ended March 31, 2013

Significant Accounting Policies and Notes to the accounts

(A) Accounting Policies

1. a. Accounts are maintained on accrual basis.

   b. Grants are accounted for in the year in which they are received.

   c. Grants recoverable are accounted for as income if either sanction orders have been received or the amounts have been recovered in the subsequent period.

   d. In cases where projects for which the grants were received have not been completed the unspent grants are estimated and are carried forward as a liability. In subsequent years unspent grants are transferred to the Income and Expenditure Account to match them with related costs which they were intended to cover.

2. a. Mutual Fund investments, which are readily encashable, are shown under current assets. Increase in net asset value at the end of the year over its cost/opening net asset value, as the case may be, is shown as income for the year and a reduction, if any, as an expense.

   b. Investment for fixed periods is shown as long term investments at their cost. Provision for diminution in the value is made only if in the opinion of the management the fall in value is of a permanent nature.

3. The Council follows the written down value method for providing depreciation at rates provided in the Income Tax Act, 1961 except for assets below Rs. 5,000 which are fully depreciated in the year of purchase. On fixed assets added/disposed off during the year depreciation is charged on a pro-rata basis from/to the date that the asset is put to use or disposed off.

4. a. Expenditure on books and publications is charged to the Income and Expenditure Account but a separate record of items purchased is maintained.

   b. Expense on computer software is fully charged to the Income and Expenditure account when the expense is incurred.

5. Donations received towards the corpus are carried forward in the Balance Sheet under Endowment Fund.

6. An LIC Policy has been taken to cover against future liability on account of gratuity payable to the staff. The premium when demanded and paid is charged to the Income and Expenditure Account.

7. Gifted assets are valued by the management and shown as an addition to the fixed assets with a corresponding credit to a "Gifted Assets Fund" account. Annual depreciation on gifted assets is deducted from the cost as well as the 'Gifted Assets Fund' account.

8. Encashment of earned leave salary is accounted for on the basis of actual payment to the employees at the time of retirement/leaving.
9. Keeping in view the nature of activities of the Council and the method of accounting followed only the following Accounting Standards are applicable:

(i) AS-1 Disclosure of Accounting Policies
(ii) AS-5 Net profit or Loss for Period, Prior period items and changes in Accounting Policies
(iii) AS-6 Depreciation Accounting
(iv) AS-9 Revenue Recognition
(v) AS-10 Accounting for Fixed Assets
(vi) AS-11 Effect of Changes in Foreign Exchange Rates
(vii) AS-12 Accounting for Government Grants
(viii) AS-13 Accounting for Investments
(x) AS-16 Employee Benefits
(x) AS-26 Intangible Assets
(xi) AS-28 Impairment of Assets
(xii) AS-29 Provision, Contingent Liabilities and Contingent Assets

The above Accounting Standards have been generally followed, except to the extent stated otherwise.

(B) Notes to the Accounts:

1. a. During the year Investments of Rs. 28.50 Lacs was made in Government securities the maturity value of which will be Rs. 29.30 Lacs after six years. The difference of Rs. 0.80 Lacs will be treated as interest income. During the year Rs. 0.13 Lacs was taken as interest income on proportion basis and the balance of Rs. 0.67 Lacs will be treated as income in five subsequent years on an equated basis.

b. In the previous year Investment of Rs. 265.86 Lacs was made in Government securities of which the maturity value was Rs. 275 Lacs, interest of Rs. 0.67 Lacs is being credited till maturity.

2. Interest on Building Fund Investments amounting to Rs. 71.87 Lacs for this year has, as per decision of the Board will transfer to the Income of the year to pay for the rent & maintenance for extra space taken from II-I.C.

3. Contingent Liability on account of a labour dispute awaiting settlement in the Hon'ble Delhi High Court is estimated at Rs. 10.00 Lacs.

4. The Director General of Income Tax (Exemptions) has with effect from the financial year 2006-07 and onwards granted us exemption from income tax under sub-clause (iv) of section 10 (23C) subject to our fulfilling certain conditions including application of 85% of our income during the year and investment of our surplus funds in specified investments.

5. During the year Rs. 10.60 Lacs upto March, 2013 has been transferred to the Endowment Fund from the Income & Expenditure account on account the transfer of income on the Investments made out of the RBI-Chair Fund as per their Endowment Grant conditions.

6. Schedules 1 to 6 form an integral part of the Balance Sheet and Income and Expenditure account.

7. Previous year's figures have been adjusted to make them comparable with the figures for the current year.
ICRIER cherishes its status as the country’s premier autonomous and independent economic policy think tank. It has been able to nurture its treasured autonomy by establishing an Endowment Fund, the income from which helps to meet administration expenses and support research on important topics where project grant is not immediately available. Income from the endowment fund has also helped to enhance ICRIER’s research capacity and networking.

We appreciate the generosity of our donors and assure them that ICRIER will continue to strive to maintain its focus on policy-oriented research and achieve international standards in the quality of its research output. Prominent corporate donors to ICRIER’s Endowment and Building Fund include:

- Abhishek Industries
- American Express Foundation
- BCCI
- Bank of Baroda
- Bank of India
- Bharat Forge Ltd.

ICRIER, one of India’s leading think tanks, was established in August 1981 as a not-for-profit research organisation to provide a strong economic basis for policy making. Under the current Chairperson, Dr. Isher Judge Ahluwalia, ICRIER has continued and reinforced the pursuit of its original vision and in the process significantly expanded the scope of its research activities.

ICRIER is ably supported by a Board of Governors, which includes leading policymakers, academicians, opinion makers and well-known representatives of the corporate world.

ICRIER’s success lies in the quality of its human capital. Led by Dr. Rajat Kathuria, Director & Chief Executive, ICRIER’s research team consists of highly qualified professors, senior fellows, fellows, research associates and assistants and consultants. The RBI, HUDCO and Wadhwani Chairs in ICRIER focus on macroeconomic, urbanisation and India-US strategic issues respectively.

ICRIER conducts thematic research in the following seven thrust areas:

- Macroeconomic Management in an Open Economy
- Financial Sector Liberalisation and Regulation
- Trade Openness, Restructuring and Competitiveness
- WTO Related Issues
- Regional Economic Co-operation with Focus on South Asia
- Strategic Aspects of India’s International Economic Relations
- Environment and Climate Change

International conferences, seminars, public policy workshops, public lectures and publications form an integral part of ICRIER’s outreach activities. ICRIER maintains a wide network of resource persons from India and abroad. It strives to attract well-qualified researchers, provides them a stimulating and scholarly work environment and encourages researchers to work in teams. ICRIER’s research is widely cited by both academia and the popular press, and has over the years provided critical inputs for policy making.
