Liberalizing India’s Insurance Sector: Challenges and Opportunities

OBJECTIVES OF THE STUDY

• Evaluating the benefits of liberalisation to the Indian insurance sector
• Assessing the regulatory structure and the hindrances to foreign investment in the sector
• Comparing the Indian insurance industry with BRICS countries
• Reviewing the contribution of the insurance sector to economic growth

“[A] sound national insurance and reinsurance market is an essential characteristic of economic growth.”

Economic Growth and Development
THE INDIAN INSURANCE SECTOR

Despite gradual and steady growth, insurance penetration and density rates of the Indian insurance sector remain low in comparison to its global counterparts. The total insurance penetration and density rates stood at 3.69% and $73 respectively in 2017. Public sector insurers have a greater market share compared to the private sector insurers (including insurers with foreign partners). In terms of premiums, life insurance segment dominates.

Regulatory Milestones of the Indian Insurance Sector

- The Insurance Act, 1938 was enacted which brought together and amended earlier legislations.
- In 1956, the entire life insurance sector was nationalised and Life Insurance Corporation (LIC) was incorporated. Thereafter, the general insurance sector was also nationalised in 1972 and General Insurance Company (GIC) was formed.
- The insurance sector was further liberalised in 2015 with the increase in the foreign investment cap in an Indian insurance company from 26 percent to 49 percent as was provided for under the Insurance Laws (Amendment) Bill, 2016.
- Based on the recommendations of the Maitri Committee, IRDAI was constituted as an autonomous body in 1999 and finally as a statutory body in 2000. In August 2020, the sector was opened up to the private and foreign players and foreign companies were allowed ownership of 20 percent.

- Life insurance penetration
- Non-life insurance penetration
- Total insurance penetration

- Life insurance density
- Non-life insurance density
- Total insurance density

Segment-wise Premium (2017-18)

- General insurance premium (incl. premium of specialised insurers and standalone health insurers)
- Life insurance premium

Market Share of Public and Private Insurers (2017-18)

- Private sector insurers’ (incl. the insurers with foreign partners) market share
- Public sector insurers’ market share

Note: Market share of public sector insurers of the general insurance segment includes specialised insurers.

Barriers to Foreign Investment

- Ownership restrictions
- Limits on promoting and diversifying insurance businesses
- Regulatory
- Price restrictions

The government is deliberating increasing the foreign direct investment limit in the insurance sector to 74 percent from the current 49 percent.

THE INDIAN INSURANCE INDUSTRY IN A GLOBAL CONTEXT

In comparison with BRICS economies (and developed countries), India lags in terms of insurance penetration and density. India’s insurance density in 2017 is $73, whereas Singapore’s density is $4,749 and the US’ insurance density is $6,706. Globally, India’s share in the insurance market was 2.0 per cent during 2017. India is ranked 10th among the 88 countries in the life insurance business and 15th in global non-life insurance markets.

IMPACT OF LIBERALIZATION ON BRICS

Brazil

• Progressive opening up of the Brazilian insurance sector has helped in growth and expansion of its insurance sector.
• The insurance sector has evolved from a participation rate of 0.8% of the GDP in 1994 to 2.55% in 2008, and the penetration ratio rose to 3.2% in 2008 from 0.7% in 1995.
• Brazil emerged as one of the highest growth rates in insurance premiums worldwide: 12.1% between 2013 and 2014, and 10.2% between 2014 and 2015.

China

• Opening up of the Chinese economy has brought strong growth for the insurance sector with the premium income experiencing an uptick.
• Influx of financial capital after liberalization has had a significant positive effect on firm operating efficiency.
• Entry of foreign competitors has benefited domestic insurers, as their average efficiency has improved after the WTO accession.

South Africa

• Presence of foreign firms in the South African insurance market has enhanced industry competitiveness.
• Entry of foreign firms has also encouraged higher price competition and improved product offering, service quality, and product development.

India

• Benefits of liberalization on India’s insurance sector can be seen in terms of penetration and density, product innovation, introduction of alternate channels, distribution, and customer services.
• Opening up of the sector has led to huge growth in the life insurance business and LIC
• Significant capital flows to the insurance sector due to the earlier FDI limit hike

Key findings of study:

Hiking the FDI limit will be beneficial for the industry
