## 2. Impact of Global Crisis on India

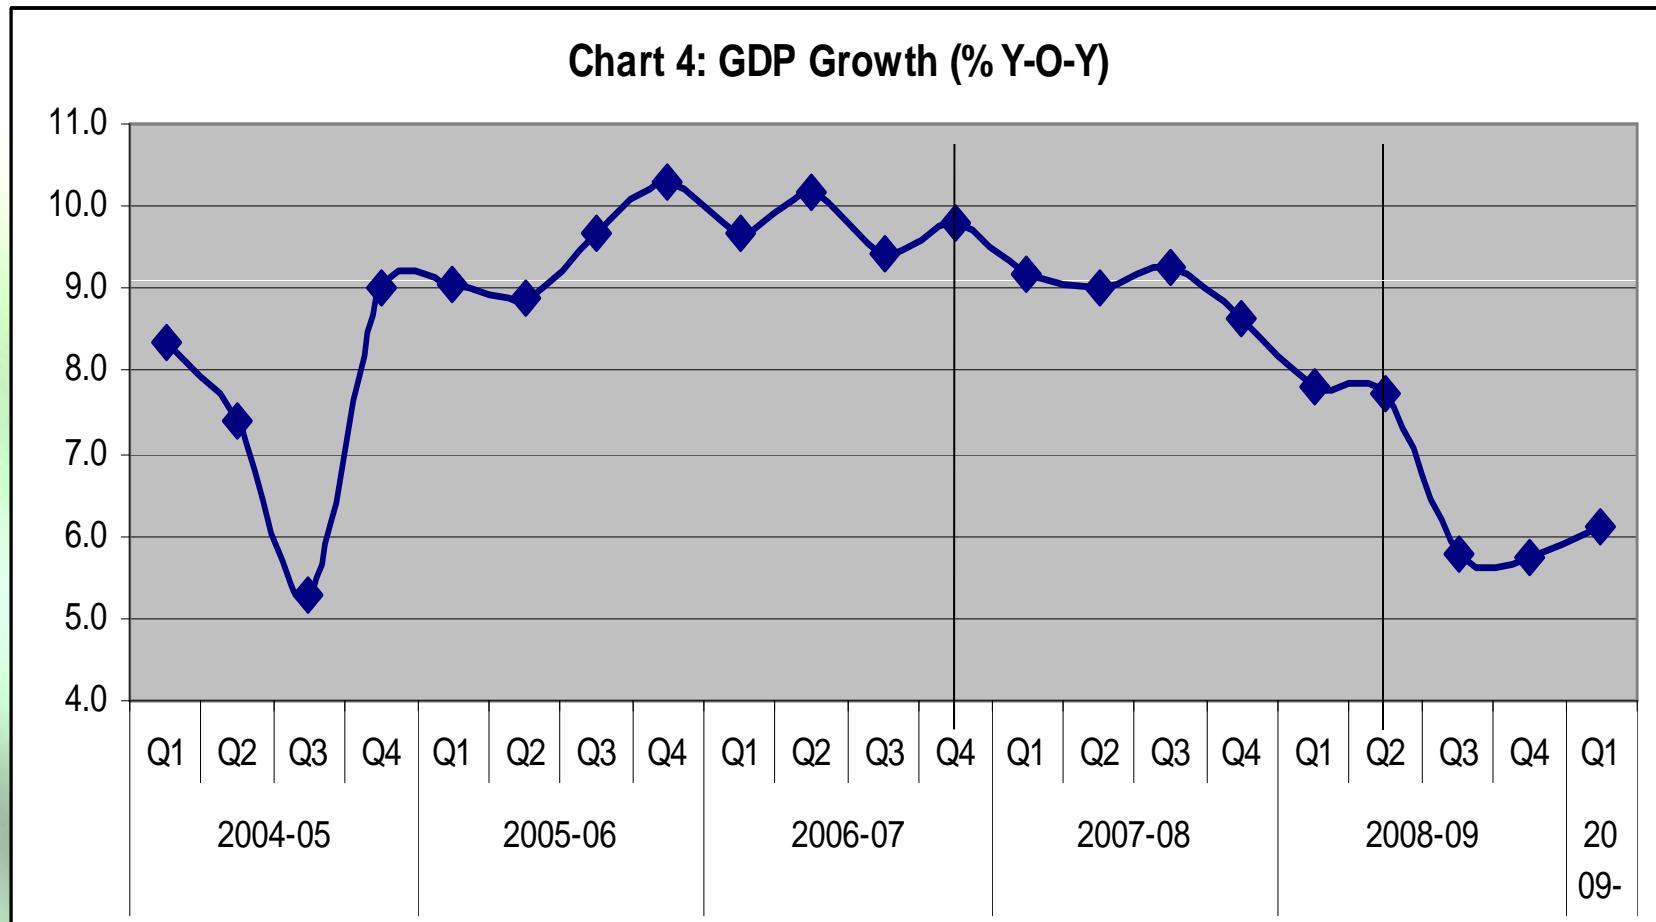

# Impact of Global Crisis on India

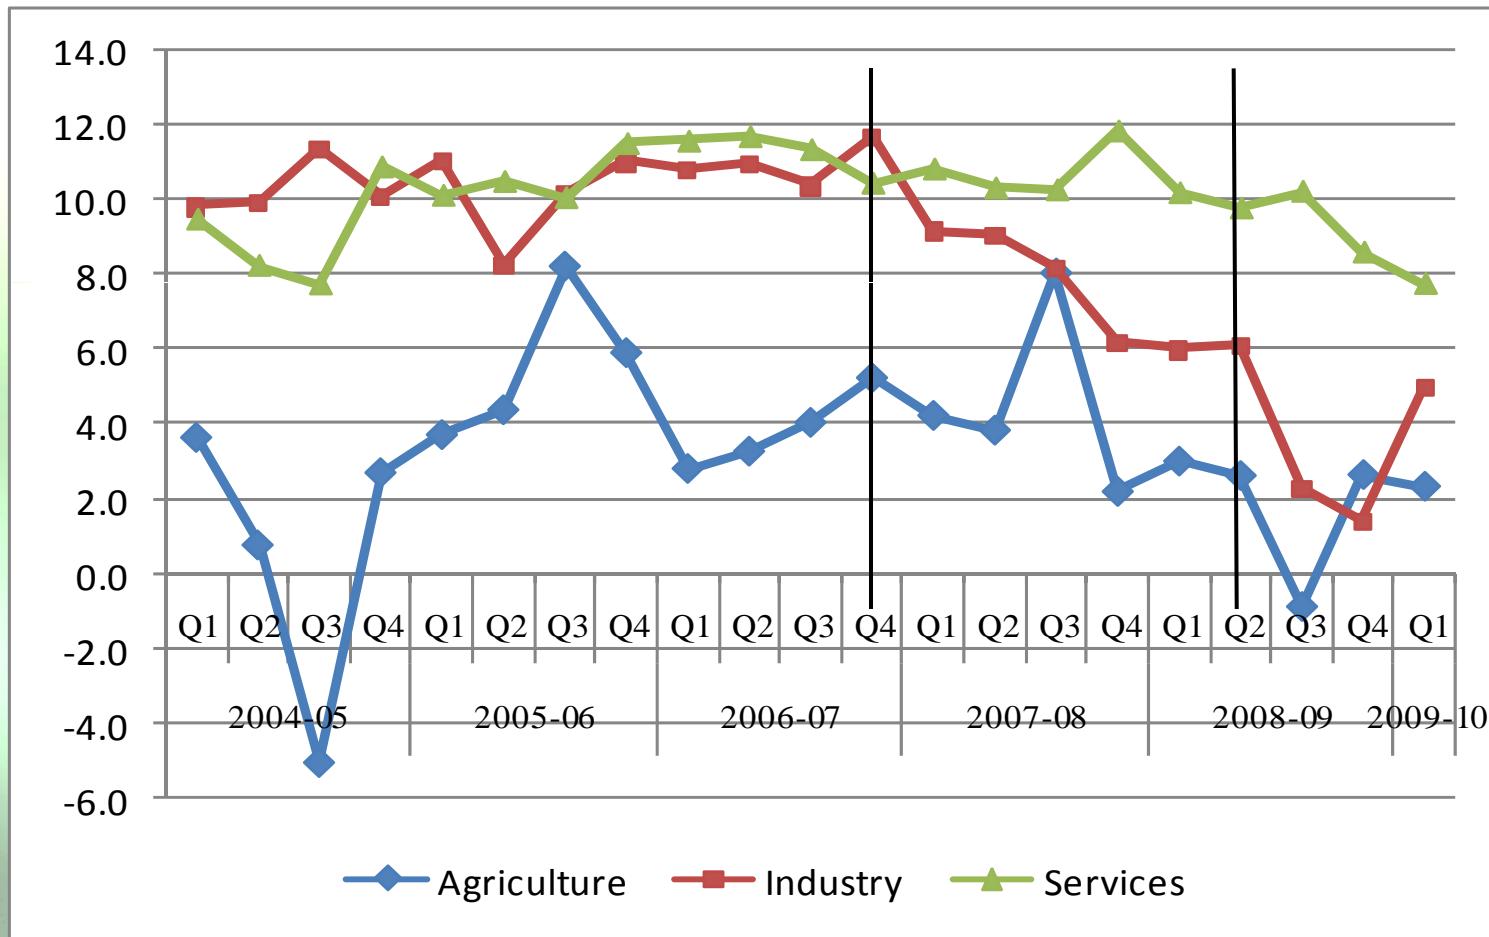

- Sudden cutback and reversal of capital flows
- Collapse in external demand
- Waning of consumer and business confidence
  - Drop in consumption demand growth
  - Drop in investment demand growth
  - Drop in exports and imports
  - Drop in GDP growth

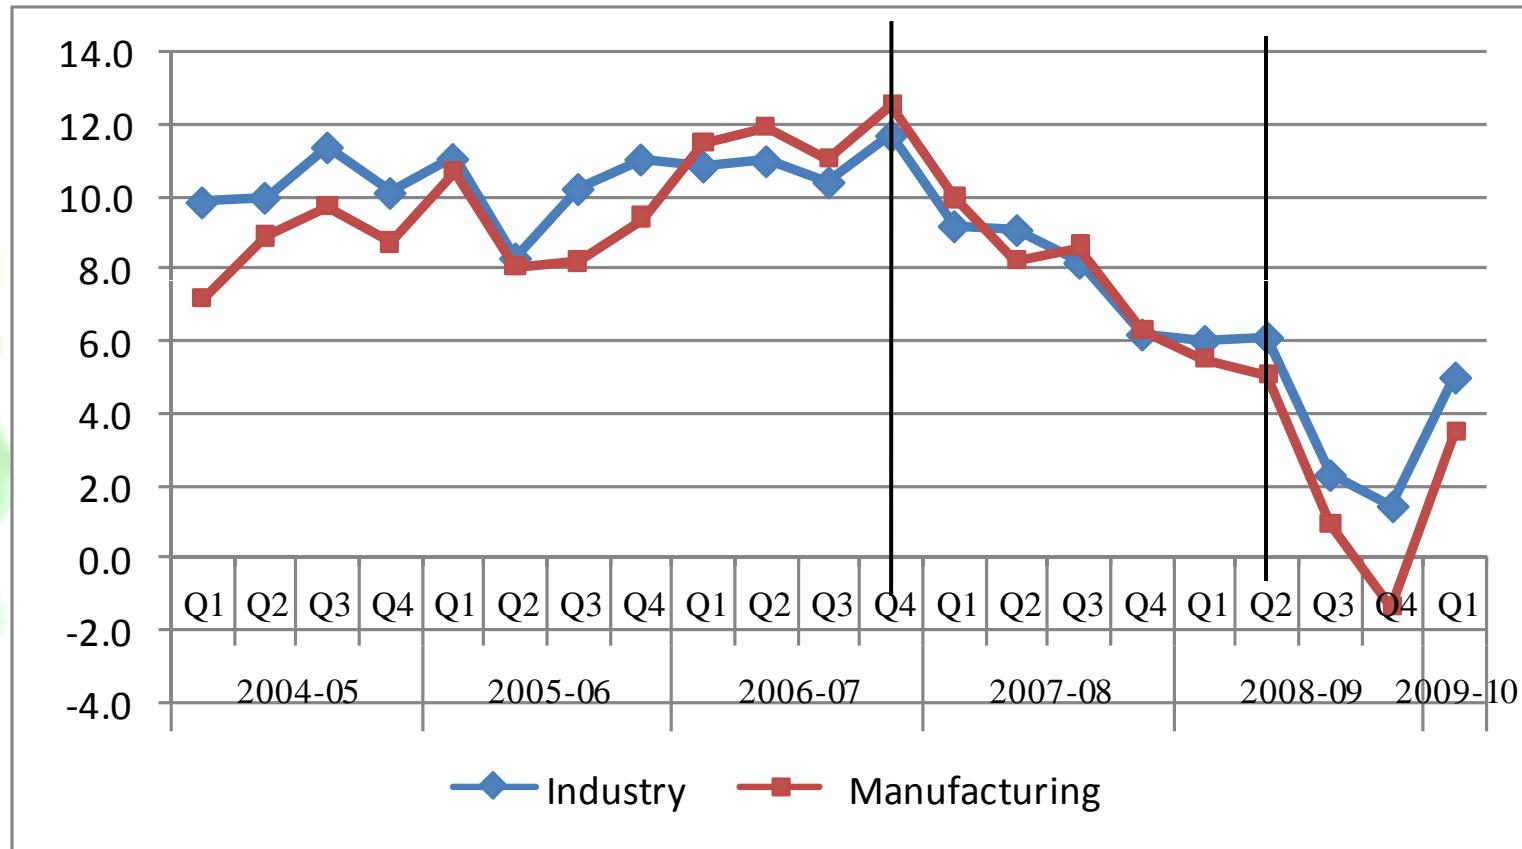

# Falling GDP Growth

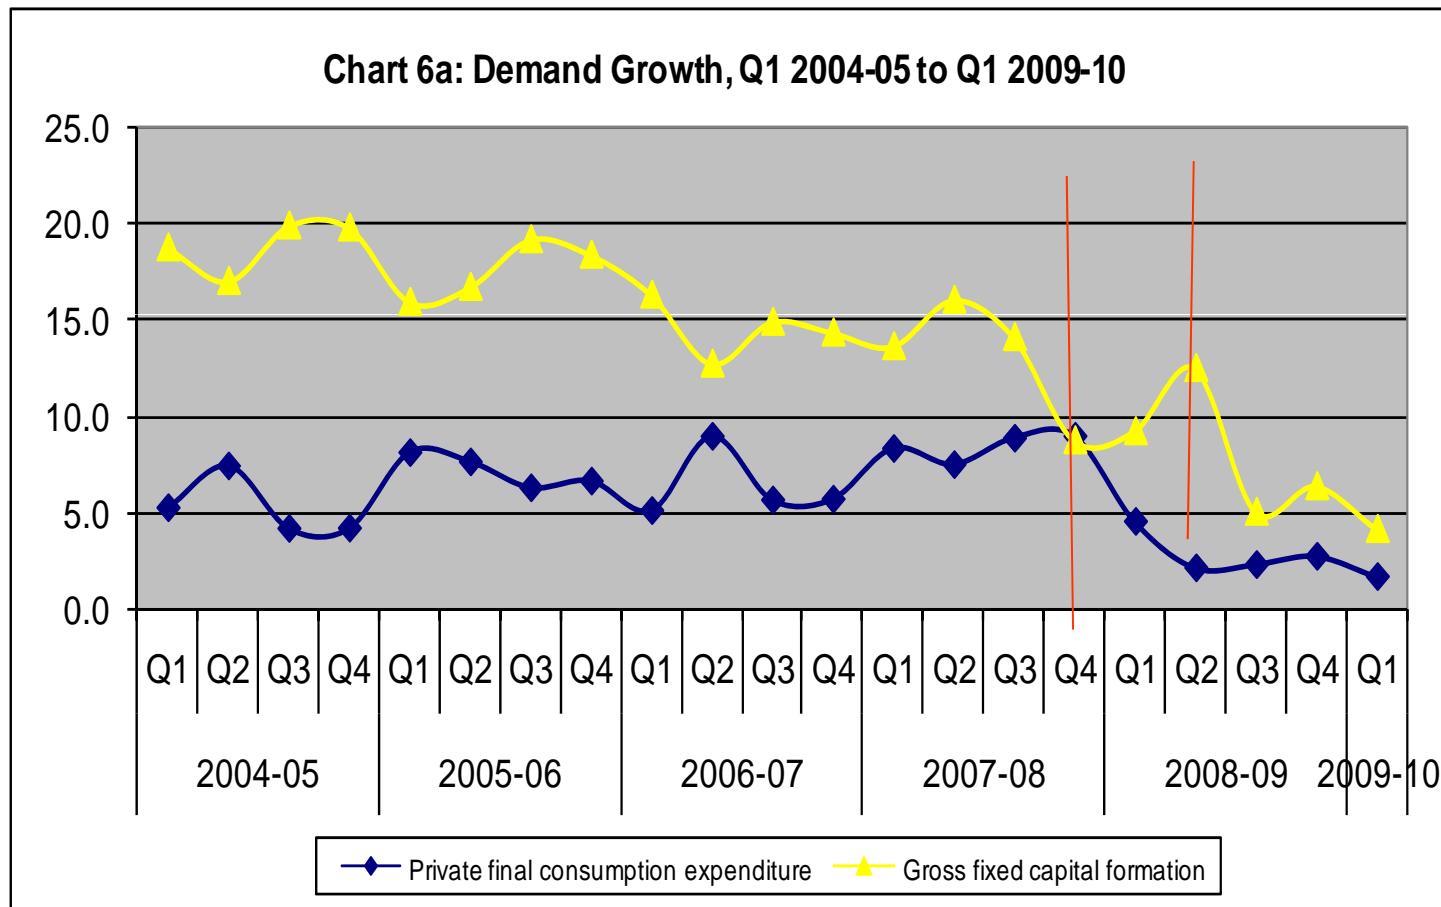

# Sectoral Growth Rates

# Industry and Manufacturing

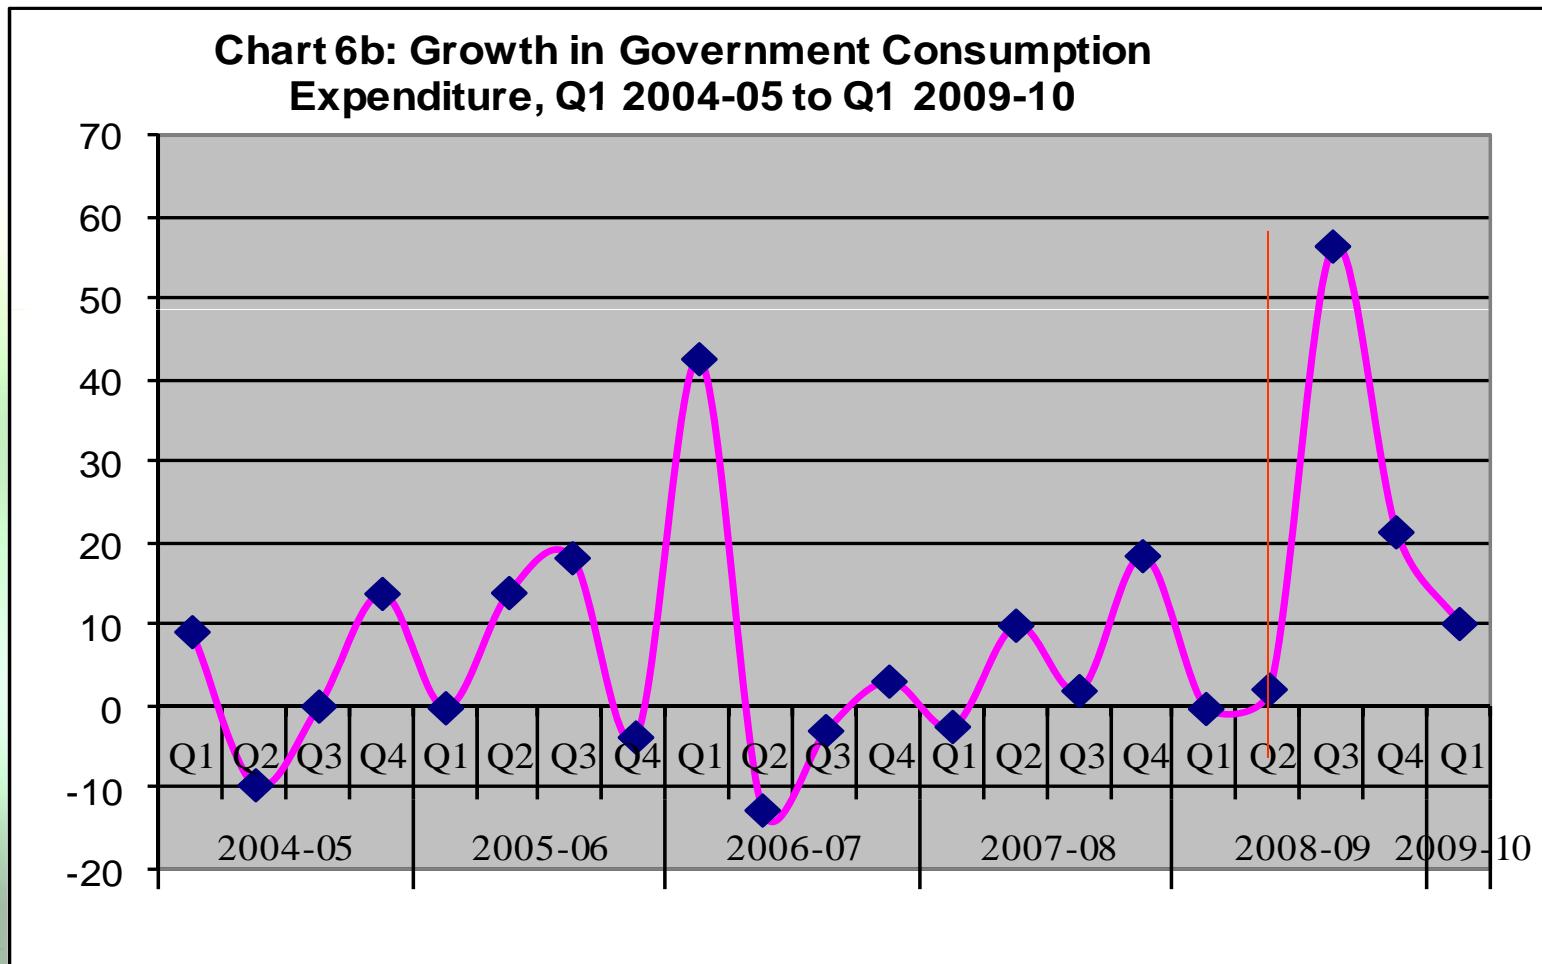

# Demand Growth

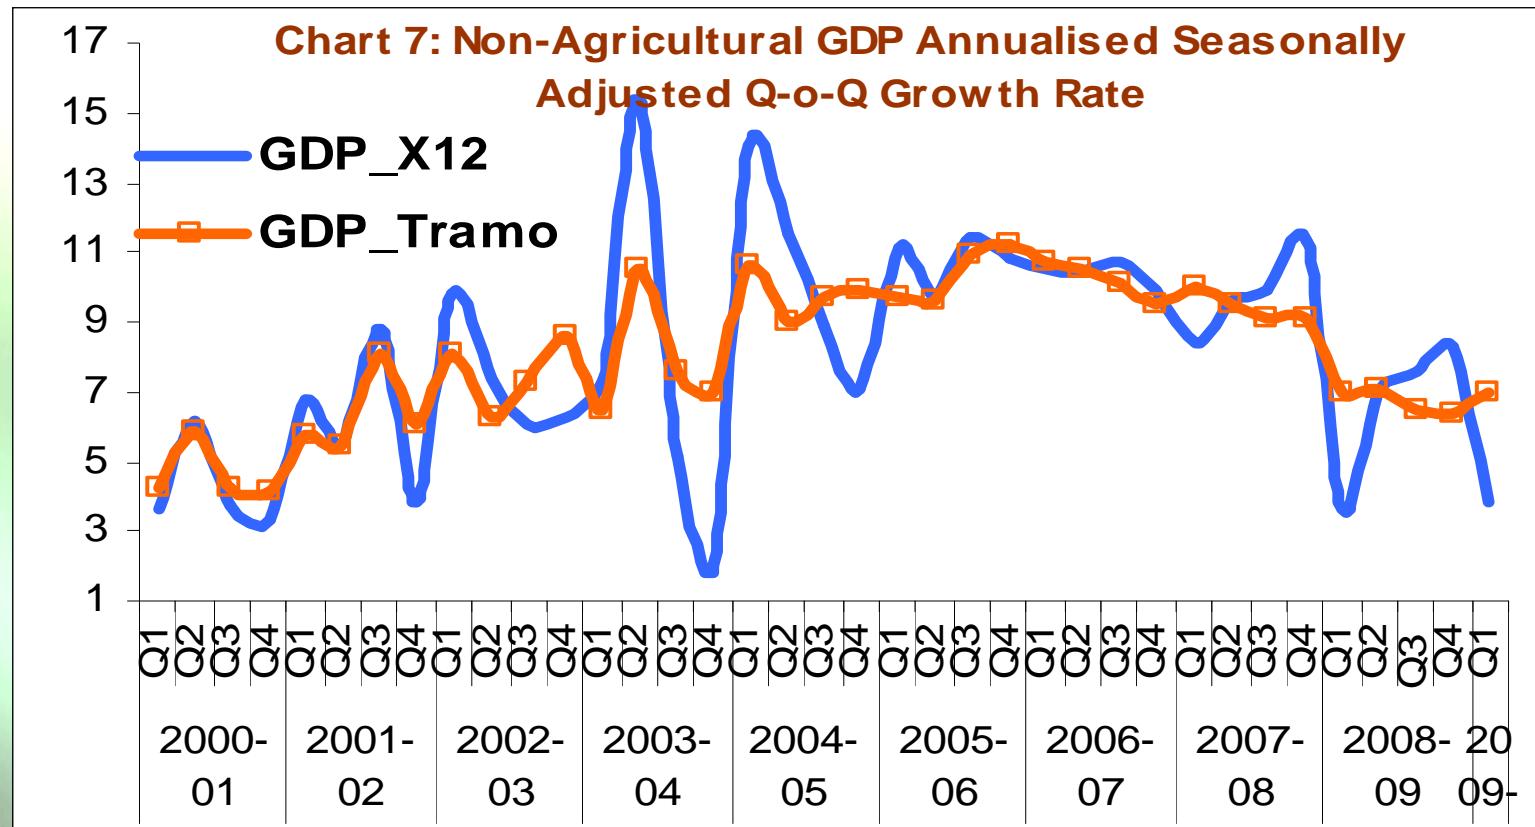

*Drop in consumption growth followed by drop in investment growth*

# Fiscal Stimulus

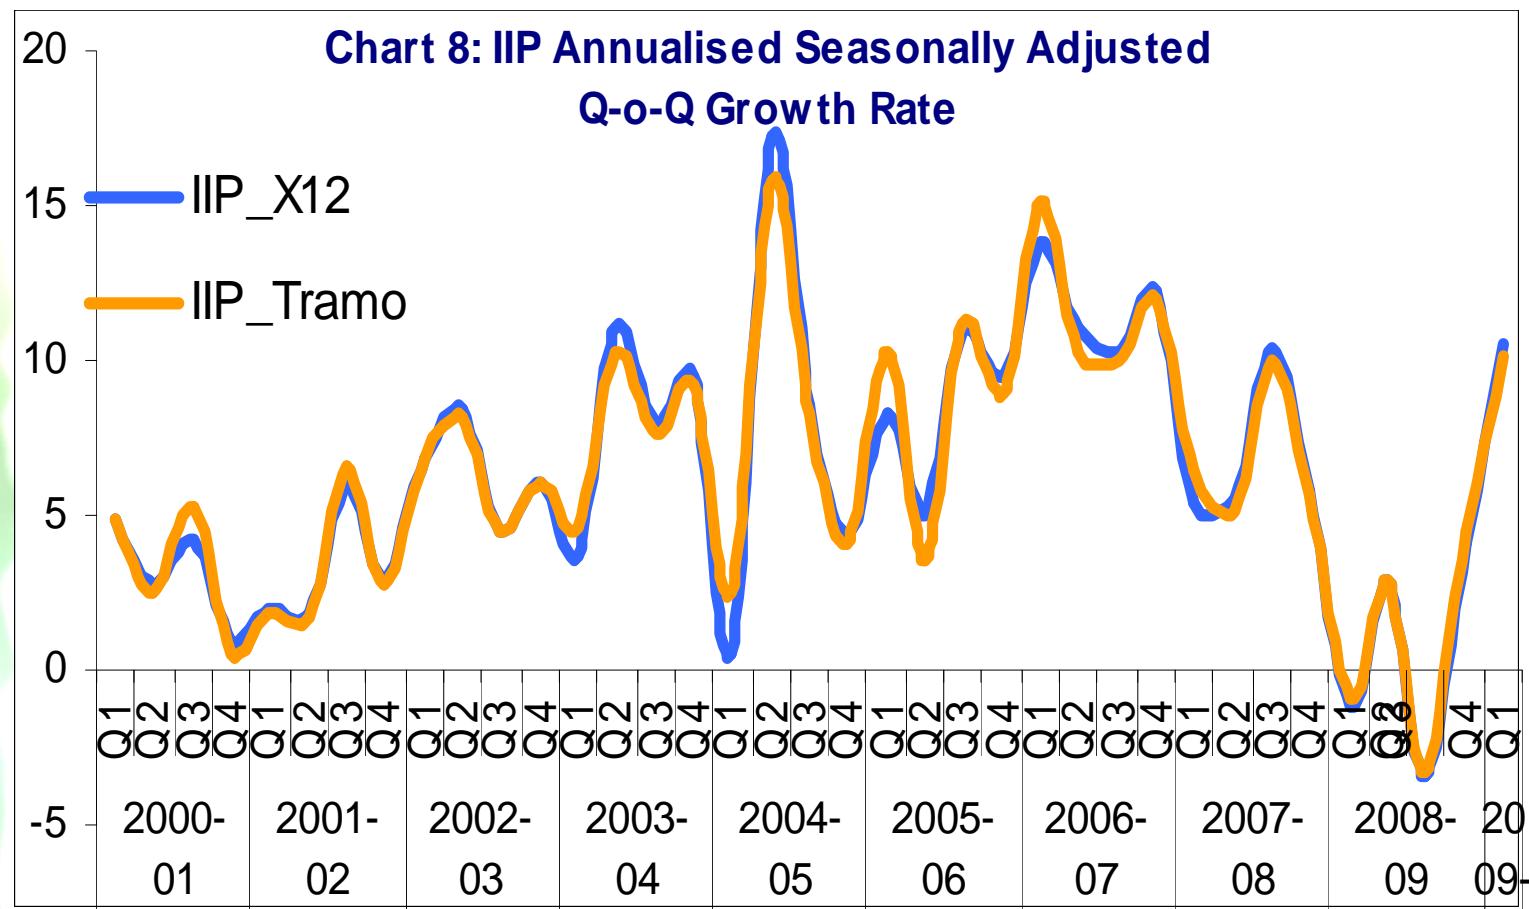

*Fiscal stimulus cushioned the fall in demand growth*

### 3. Fiscal Sustainability

# Fiscal Sustainability

- Falling fiscal deficits brought down debt-GDP ratios
  - Centre from 63% in 2004-05 to 59% in 2008-09
  - Centre and states combined from 81% to 75%
- Expected to rise this year to 60% for the centre and 77% for the centre and states combined

# Fiscal Sustainability

- Debt ratio is determined by:
  1. Difference between nominal GDP growth and nominal interest rate on debt and
  2. Primary balance

# Debt Ratios: Two Scenarios

Year	Best Scenario $g = 14\%, i = 7\%, p = 3\%$	Worst Scenario $g = 12\%, i = 9\%, p = 5\%$
2008-09	74.7	74.7
2009-10	73.1	77.7
2010-11	71.6	80.6
2011-12	70.2	83.5
2012-13	68.9	86.2
2013-14	67.7	88.9
2014-15	66.5	91.5
2015-16	65.4	94.1
2016-17	64.4	96.6

Note:  $g$  = Nominal growth rate,  $i$  = Interest rate on debt,  $p$  = primary deficit.

# Policy Options

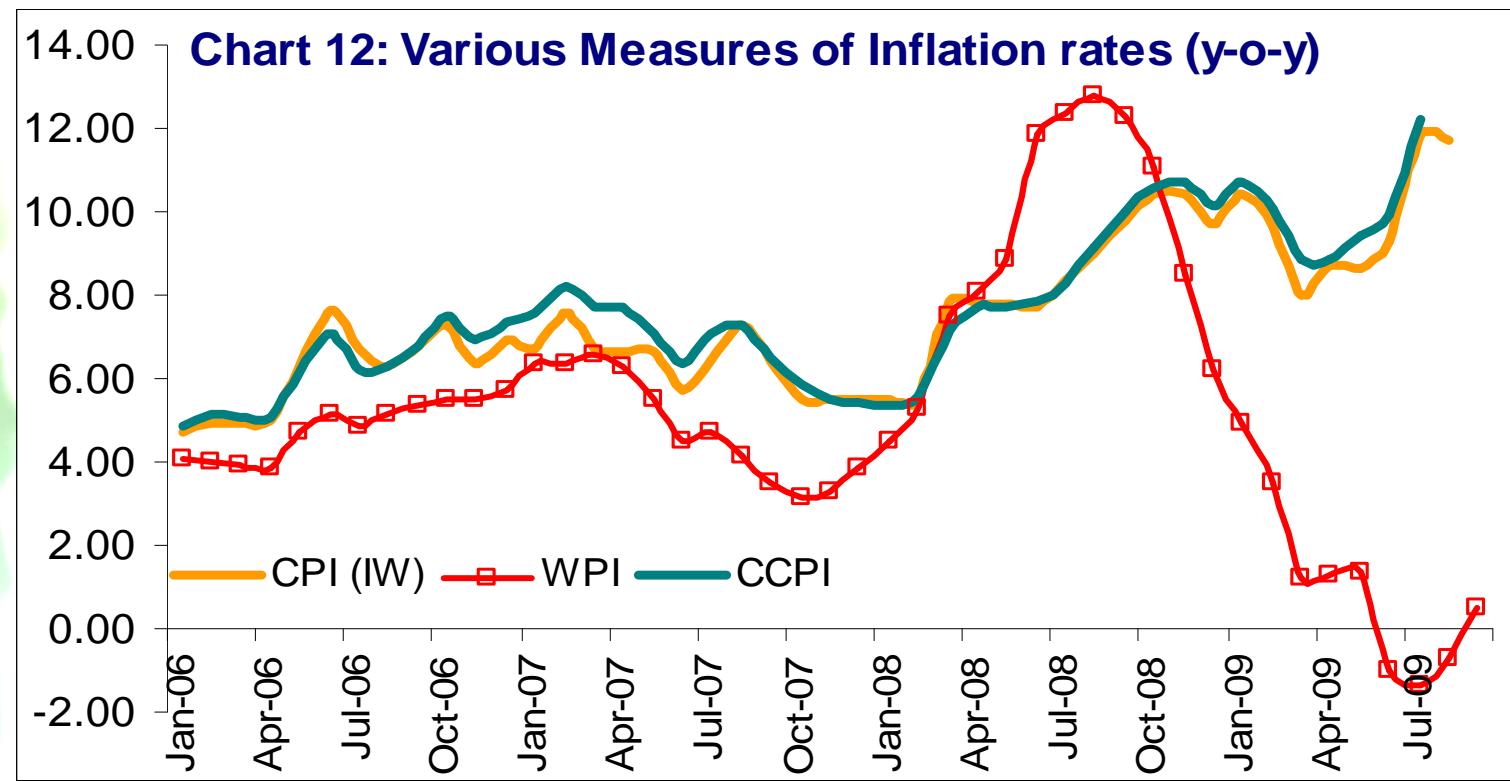

- With nominal GDP growth less than 12%, interest rate on debt at 7.5% and primary deficit of 4.5% of GDP debt ratio is bound to rise
- Need to reduce primary deficit
- Interest rate reduction may not be possible
- Inflation option?
  - Not feasible in India

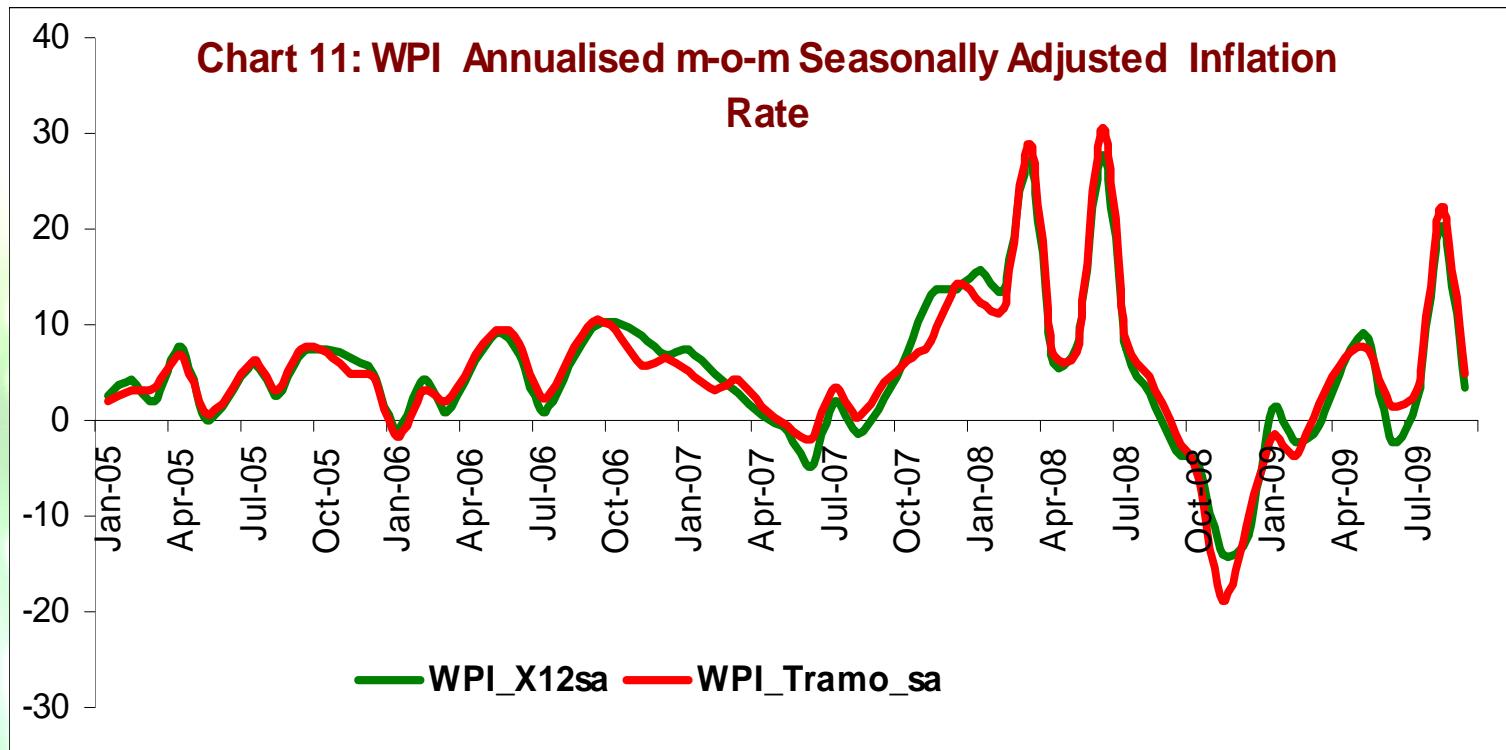

## 4. Inflation

# WPI and CPI: Diverging Trends

# Month-on-Month Trends: WPI

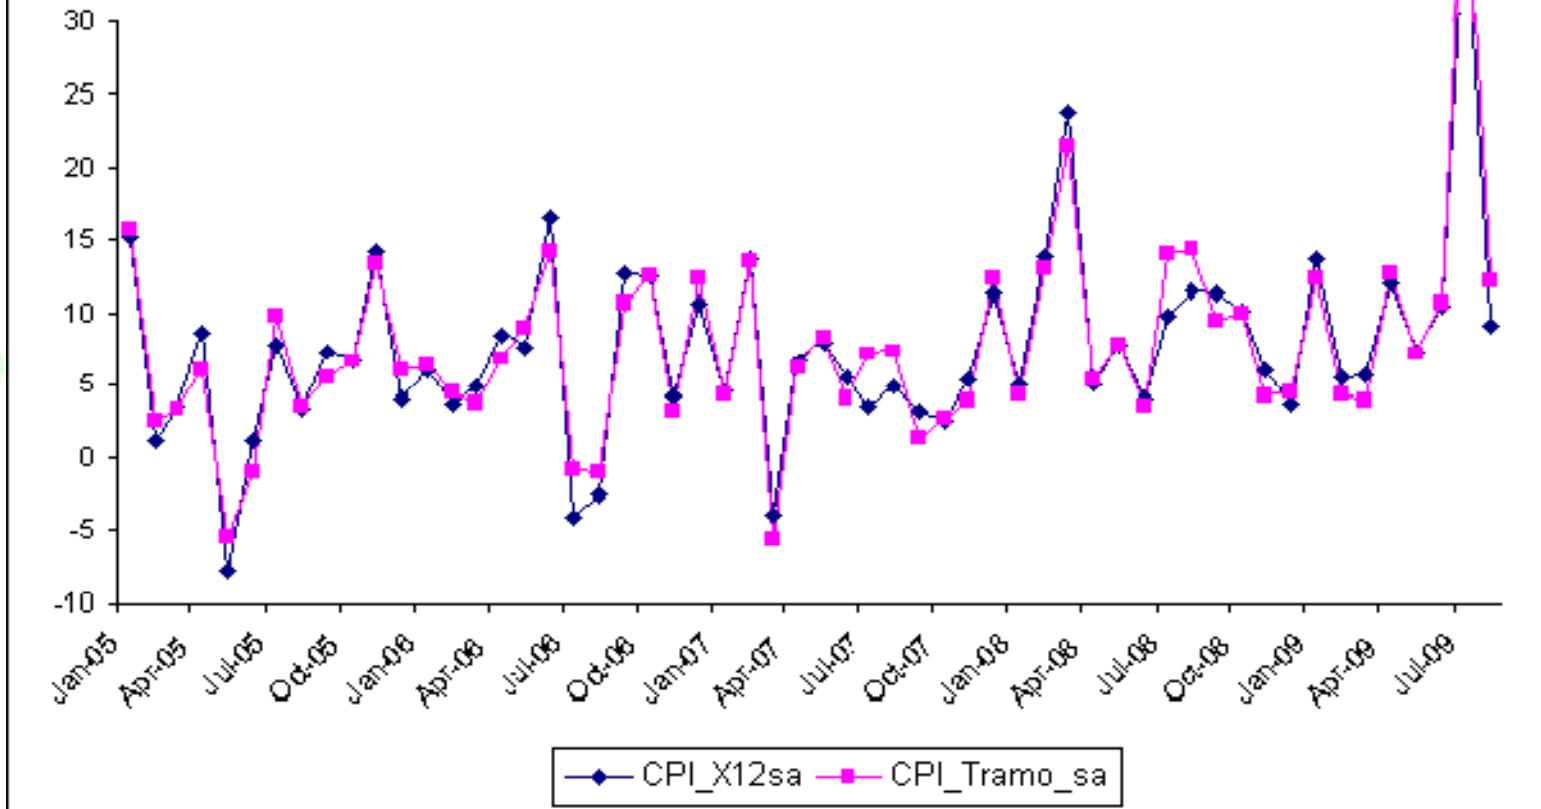

*Moved up fast from deflation to high inflation in July & August 09, but moderation in September*

# Month-on-Month Trends: CPI

Chart 12: CPI-IW Annualised m-o-m Seasonally Adjusted Inflation Rate

*Moving up very high in June & July 2009, but moderated in August.*

*High inflation in food items and negative in others*

# Food Inflation Vs General Inflation

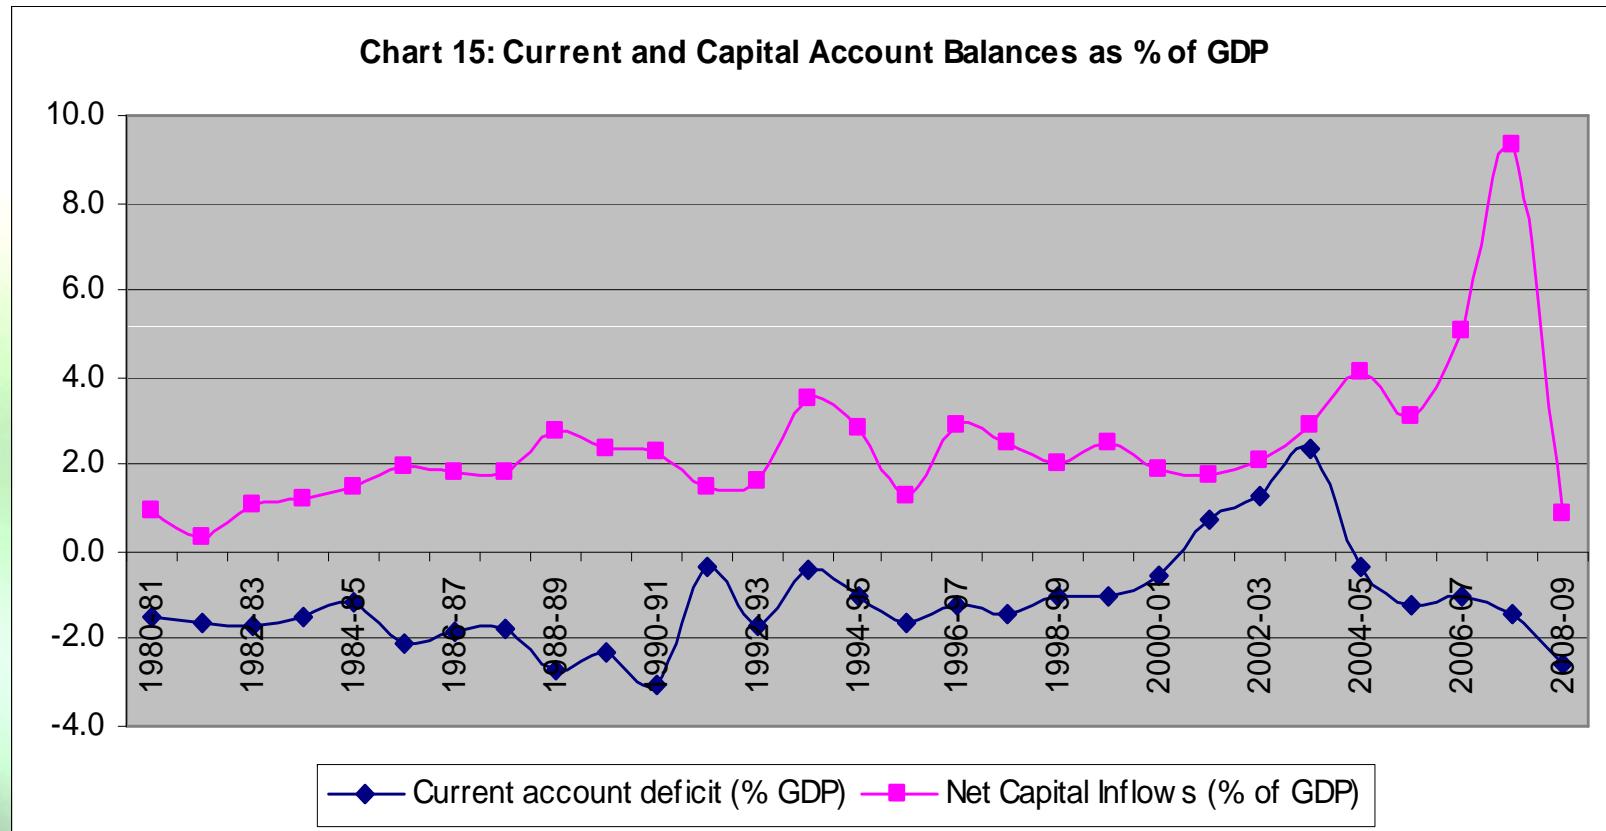

- Current inflation just a “food inflation” due to agricultural crop failure?
  - WPI inflation mainly food items
- CPI (IW) inflation also seen in “personal care & effects” (mostly FMCGs) and “other miscellaneous items” (mostly consumer durables) with a combined weight of 7.6%
  - 12% for personal care & effects
  - 20% for other miscellaneous items

## 5. Balance of Payments

# Balance of Payments

- 2008-09 current a/c deficit highest since 1990-91
- Capital surplus lowest since 1981-82

# BOP 2009-10

- Assumptions:
  - Exports to fall by 10% and imports by 12.5%
  - Oil import price \$70/bbl against \$81/bbl last year
  - Software exports to rise by 5% against 19% last year
  - Private remittances to decline by 7% against a growth of 5% last year

## 7. Summary & Policy Suggestions

# Summary & Policy Suggestions

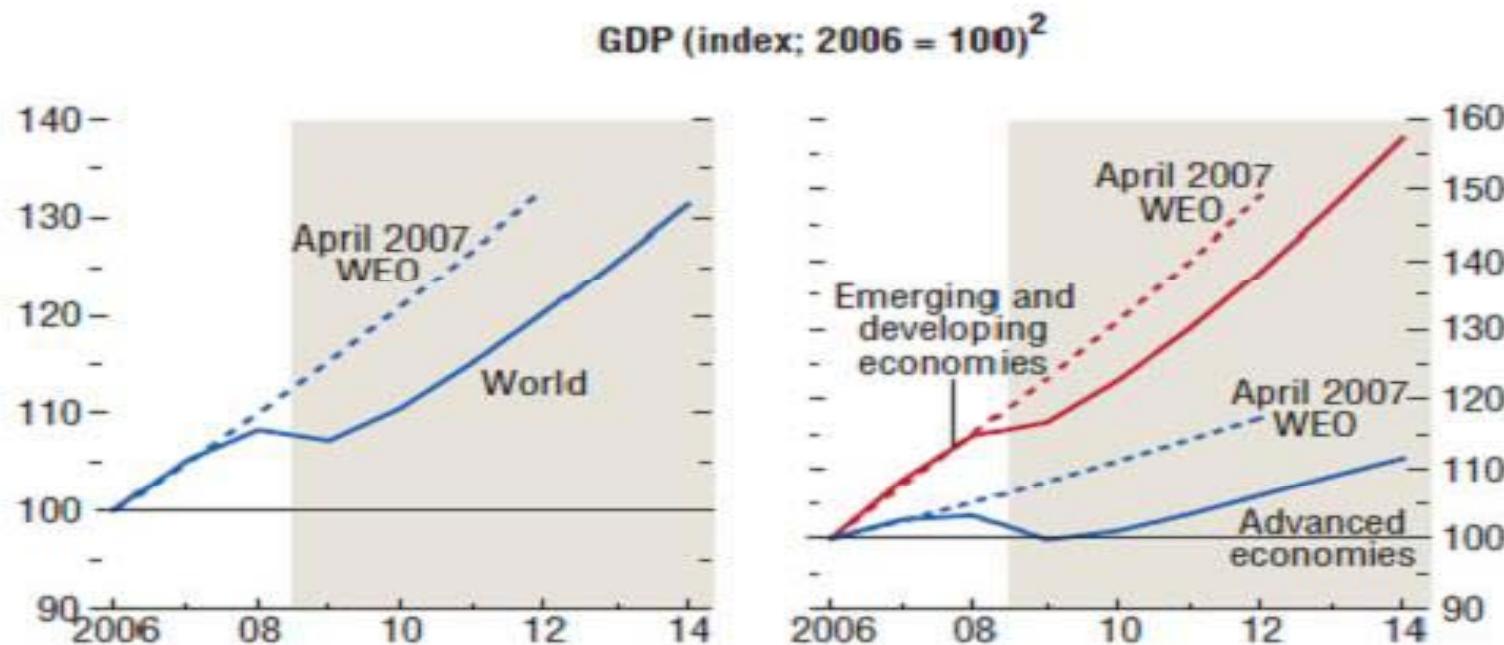

- Recovery has started but not yet fully secure
- Inflation high but moderation in recent weeks
- Rupee to be under upward pressure
- Fiscal correction needed from next year
- Status quo in monetary policy in the immediate future
- A gradual and moderate rupee appreciation tolerable
